SOL PLAATJE LOCAL MUNICIPALITY

CONTRACT NUMBER: INF/CEE07/2023 - BI-ENNIAL CONTRACT FOR THE SUPPLY, TESTING, TREATMENT OF TRANSFORMER OIL AND REPAIRS TO DISTRIBUTION TRANSFORMERS

SPECIFIC REQUIREMENTS

BACKGROUND INFORMATION

Transformers is one of the most expensive components within an electrical network. In order to extend the life of distribution transformers routine maintenance must be conducted, and to ascertain what is happening inside a transformer, oil samples must be taken regularly and then, based on the results from the analyses corrective measures must be taken to prevent premature failure of the transformer.

The Sol Plaatje Municipality has 20 x 66/11kV and 2 x 66/3.3 kV transformers, approximately 260 miniature substations, 230 pole mounted transformers and 238 x 11/0.4kV substations. All the aforementioned transformers must be maintained by the Electricity Distribution Section and the successful bidder will assist the Electricity Distribution Section with this maintenance on a as and when required basis.

1. TECHNICAL REQUIREMENTS

- 1. The supply and delivery of virgin transformer oil in Kimberley by bulk tanker or in drums must be delivered to the stores complex in Ashburnham.
- 2. The collection of contaminated oil stored in drums or bulk containers in Kimberley must be transported to the regeneration plant and regenerated oil must be transported back to the stores complex in Ashburnham.
- 3. The PCB-contaminated oil contained in a transformer must be disposed of according to specifications.
- 4. The removal of sludge from transformers while still on-site in Kimberley must have acceptable acidity levels and tan delta measurements after the de-sludge process.
- 5. Containers used to transport oil to the site must be certified to be uncontaminated from PCB.

2. <u>TECHNICAL SPECIFICATIONS</u>

- 2.1 All virgin and regenerated oil must comply fully with standard specification SABS 555:1985 [as amended]. The 'acidity' or neutralization value must be below 0.03 mg KOH/g, moisture content below 35ppm, and dielectric strength 66kV or above.
- 2.2 The plant used for filtration must preferably operate on a filter-cartridge (collessor type) as opposed to a centrifuge principle. The rates quoted for filtration shall be based on reducing the water content to 15 ppm maximum and the gas to 0.1% by volume, together with removal of 98% of particles larger than 0.5 micrometer. Measurement must be in accordance with relevant ASTM method.

The minimum dielectric strength measured after filtration shall be 66 kV and the maximum acidity 0.2 mg KOH/g and maximum moisture content 15 ppm.

- 2.3 The transformers to be filtered on site range in size from 200 kVA with an oil volume of 500 litres to 30 MVA with a maximum oil volume of 15 000 litres. With on-site filtering, it is expected that 3 small units would be completed per day, while one large unit in 3 days maximum. On average, 3 to 4 passes would be needed to bring old/used oil within specification. However, bidders are requested to please furnish prices by category of transformer size as per the schedule in the document.
- 2.4 Sludge removal must be priced on the basis of the conventional method of:

Draining transformer of all oil, Removal of top cover, Heat up new oil and spray wash the entire interior, core and coils with a high pressure spray gun in a manner not to further damage any brittle cellulose or other insulation materials.

Flush out the coolers and where possible remove radiators and clean out sludge.

Re-assemble transformer.

Draw and hold vacuum until all air is evacuated.

Fill with pre-heated new oil.

4x cycles of purification

2.5 PCB eradication from transformers on site must involve the removal of all the oil from the transformer, flushing of the interior, core and windings with oil certified to be uncontaminated and transport of all oil from site to a plant where it can be decontaminated. The supply of replacement oil for the transformer will be dealt with separately and need not be allowed for as a part of the PCB eradication exercise.

3 RATES

All repair and sampling rates must be inclusive of VAT, labour costs, transport costs and accommodation costs.

4. **CERTIFICATION**

All oil supplied as virgin or regenerated must be accompanied by a certificate to state that the oil complies with the required SANS 555:1985 [as amended] standard as well as that the oil is PCB-free.

5. Occupational Health and Safety

Successful bidder must compile and submit a Health and Safety File Successful bidder must at all times adhere to the Occupational Health and Safety Act and Regulations. Successful bidder must at all times have a copy of the workers Operating Regulations for High Voltage Systems (ORHVS) on site.

6. SPECIAL CONDITIONS

Bidder MUST submit with his/her bid valid copies of the following documents:

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids invited.
- Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging). Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

Includes price quotations, advertised competitive bids, limited bids and proposals.

Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
