

PRODUCT AND SERVICES SPECIFICATION

SELF BUNDED DIESEL TANKS FOR AUTOPAX

1. DESCRIPTION OF THE PRODUCT OR SERVICE

- To supply, fit/install/set-up/commission and maintain self-bunded diesel tanks and operating equipment at the Autopax operating sides as stipulated.

DETAILED SPECIFICATION

To supply, fit/install/set-up/commission and maintain self-bunded diesel tanks and operating equipment at AUTOPAX premises as per the following minimum requirements:

- Tanks must be self-bunded built on/into the standard container, for easy movement if necessary.
- Container to be fitted with corner locks, security doors and locks.
- Tanks to be primed, coated, and painted.
- Tanks to be supplied with hose filler with dust cover protection.
- Tanks to be supplied with full pump bay solution (pump assembly/system, filtration & electrical controls, flow meters, dispenser, etc.).
- Supplied with fuel anti syphon valves.
- Dipstick or measuring equipment to measure/inspect any lubricants and daily available fuel.
- All necessary caps, dipstick, breather vents and points to be dust filtered/protected.
- Fitted with platform and ladder for easy and safe access.
- Mechanical shut-off and overfill protection.
- Safe pressure relief vent in compartment.
- Management systems that can integrate information of fuel received/dispensed as well as fuel utilized per specific bus/service vehicle/generator and generate reports for management reporting.
- Full system/equipment to comply to available South African legal/statutory and/or available international standards compliance requirements with certificates to be provided.
- All statutory signage to be applied to the equipment.

Autopax operations sides below

- Pretoria (Min: 60 000L)
- Harmony (Min: 60 000L)
- Cape Town (Min: 60 000L)

Disclaimer:

Potential suppliers will be requested to do a compulsory site viewing/visit at their own costs to all identified Autopax operations sides to assess space and flow process for the setup before submitting quotations. Side visits is not a guarantee of work allocation but an opportunity to ensure that correct facts are taken into consideration before quotations are concluded.
