2. SECTION 2: BACKGROUND, PURPOSE, AND SCOPE OF WORK

Grass cutting and vegetation management are crucial for the compliance of OR Tambo International Airport with the SACAA and ICAO requirements. The control of grass and vegetation growth plays a major role in the upkeep, safety, and security of the airport precinct. It includes the management of trees, weeds, and alien vegetation. It also assists in managing the habitat of birds and wildlife found on the airfield. Importantly, OHS requirements must be met by reducing potential hazards that arise with uncontrolled vegetation and tree growth. For example, the visibility of ground-mounted airfield signage must be maintained to allow a clear line of sight for aircraft movement, and provisions must be made to minimize the impact of possible fires.

The objective is to maintain the legislative requirements of the vegetation on the airfield of O R TAMBO International Airport in a sustainable manner at the lowest operating and maintenance costs while also ensuring compliance with general safety and environmental management regulations.

The contractor will be responsible for scheduled and ad hoc grass cutting and vegetation management of the entire airfield and airside areas at OR Tambo International Airport for a period of six (6) months or until the contract value is depleted (whichever comes first).

Airside refers to the restricted areas of the airport that are permit- and security-controlled. Grass cutting and vegetation management will be defined as the control of all vegetation through the cutting of grass, shrubs, trees, etc. (i.e., all indigenous and invasive plant species at the airport) to a specified height.

It is critical that the bidder have sufficient resources available for this contract to execute all needed actions to maintain the 3m clearance line on the airside portion of the perimeter fence within two weeks, even though the perimeter fence is more than 27km long. Furthermore, the contractor must have adequate resources to his disposal to enable him to cut the grass within 50m of all taxiways and runways within a two-week period to the regulated height and standard.

The successful bidder will provide grass cutting and vegetation management services in relation to the following sub-categories:

- (a) Grass cutting and vegetation management on the airfield and airside areas to the regulated height and standard
- (b) Clear vegetation in the 3m clearance line on the airfield's inner perimeter fence to the regulated standard
