course at least 3 courses.

1. 0.6mm kliplock chromadek roof sheeting.

expoxy paint installing Enviro-Loo units.

CONCRETE WORKS

All pits to face North.

3rd course in superstructure.

Engineer and signed off.

NOTES AND SPECIFICATIONS:

All work to comply with SANS, PW371 and SABS.

Use dimensions provided and do not scale drawing.

All concrete work to be as per Engineer's details and

All dimensions, levels and positions to be verified on site prior to

All brickwork have brickforce at every 2nd course in pit lining and

All stages of pit excavation to be inspected and approved by

All pit lining to be inspected by EnviroLoo Services before slab

All ground surfaces receiving concrete floors / slab should be compacted

All concrete to be as per Engineer's details and specifications. 25 MPa strength concrete to be used throughout construction: Trial

All concrete aprons to be 1000mm wide.. MORTAR Mixed proportions to be: 1 cement : 3 sand (i.e.1 bag cement : 3

All pit lining / foundation brickwork to be solid NFP clay brick.

All internal surface of pit lining to be painted with two coats black

All external walls / partitions to be of clay face brick to SABS quality.

All brickwork above door openings should have brickforce on every

Air bricks: Standard 230X152mm terra-colts vermin proofed lourved

1. All roof timbers to be machined SABS treated wood with three coats

All wash troughs should be connected to the school's water supply system and the waste water should be piped to a soakaway. The soakaway should be as per Engineer's detail and position to be

All cubicle partition walls to be 3 courses above door height.

air grating to be used above all window openings.

2. Timber connections (Hurricane Clips) are required all

intercessions between timber rafters and purlins.

All metalwork should be primed before installation. All steel window should have 6x20mm flat bar burglar

Double concrete wash trough to be used.

Sisalation is to be applied interval under all roof surfaces.

Only 20mm and galvanised pipework should be used as

1. All paintwork to comply with SABS and PW371 specification.

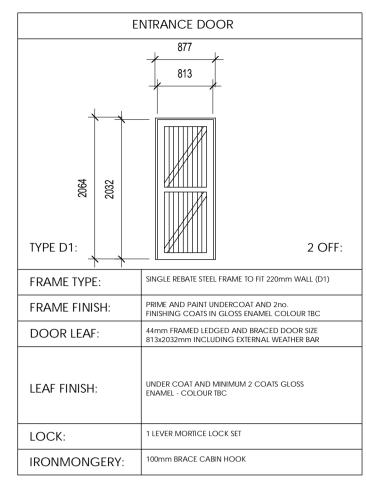

All steel window and door frames including doors and fascia /

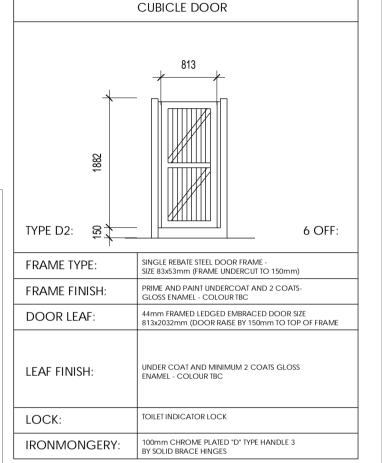

connection from wall to the discharge points.

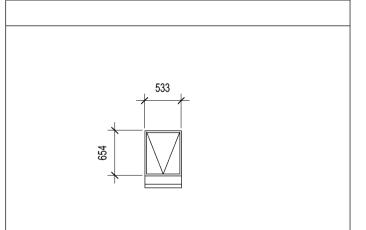

Concrete Mixes: Proportions Concrete Strenght at 28 Days 25Mpa: 1:2:2 (mix proportion by volume) 1 bag cement: 0.08m3 Sand: 0.09m3 Stone (Volume/Bag) 385 kg cement : 820 kg sand : 960 kg

Pre-cast concrete lintols to be used as support under top slab of pit.

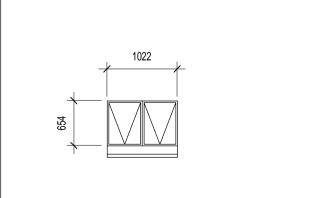

to 150mm layers 93% ModAASHTO density before casting concrete.
