# T1.1: TENDER NOTICE AND INVITATION TO SUPPLIER

# T1.1: TENDER NOTICE AND INVITATION TO SUPPLIER THE EASTERN CAPE DEPARTMENT OF HEALTH INVITES SUPPLIERS FOR:

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

Any reference to words "Bid" or Bidder" herein and/or in any other documentation shall be construed to have the same meaning as the words "Supplier" or "Tender".

The attention of Suppliers is drawn to the eligibility criteria in the table below. Suppliers are required to familiarize themselves thoroughly with the conditions of Supplier as contained in the Supplier Data (T1.2) and the Standard Conditions of Supplier (T1.3) which form part of the Supplier document. Only Suppliers that are responsive to responsiveness criteria contained in the table below are eligible to have their Suppliers evaluated:

$\boxtimes$	Joint ventures are eligible to submit tenders provided that:  They have a signed joint venture agreement
	Only Suppliers who have access to a suitably qualified and experienced contract manager who will be the single-point of accountability and responsibility for the management of the contract works as described in clause F.2.1.2 shall be eligible to have their Tenders evaluated. <i>Experience must be on Laundry and associated equipment maintenance industry.</i>
	Only Suppliers who have access to a suitably qualified and experienced contract supervisor as described in clause F.2.1.3 shall be eligible to have their Tenders evaluated. <i>Experience must be on Laundry and associated equipment maintenance industry.</i>
	Suppliers that are responsive to the criteria stated above shall be evaluated further in accordance with the conditions of Supplier as stipulated in the Tender Data (T1.2) and the Standard Conditions of Tender (as amended), which form part of this Tender document.

# Preferences are offered to Suppliers in accordance with the points systems as below:

|--|

Preference:		Price:	
SPECIFIC GOALS Status Level:	20 Points	Price:	80 Points
Total must equal:	20 Points	Total must equal:	80 Points

# 1. AVAILABILITY OF SUPPLIER DOCUMENTS:

☐ Tender documents may be freely downloaded from Tender portal <a href="www.echealth.gov.za/tenders">www.echealth.gov.za/tenders</a> OR <a href="www.etenders.gov.za">www.etenders.gov.za</a>

A compulsory clarification meeting with the representatives of the Employer will take place as follows:

Date: 19 March 2024 Venue: John Tremble Hall,

Frere Hospital, Amalinda

East London Time: 11h00am

### 2. ENQUIRIES RELATED TO TENDER DOCUMENTS MAY BE ADDRESSED TO:

Procurem	nent Contact:	Ms Thabisa Notshe	E-mail	thabisa.notshe@echealth.gov.za
Tel. No.	040 608 9641			

Prospective bidders are required to seek additional information through inquiries no later than 7 days before the closing date.

### 3. DEPOSIT / RETURN OF TENDER DOCUMENTS:

The closing time and date for submission of Tender is 11:00am on the 12 April 2024 where Tenders will be opened to the public. The following must be noted by all Suppliers;

- 1. Telegraphic, telephonic, telex, facsimile (faxed), email and late Tenders will not be accepted.
- 2. The requirements for sealing, addressing, delivery, opening and assessment of Tenders are stated in the Tender Data (T1.2)
- 3. All Suppliers must be submitted on the official, hardcopy documents issued with the bid including any addenda issued to prospective Suppliers by the Department.
- 4. Tender documents must be deposited in the Tender box at the address indicated below:

### **DEPOSITED IN THE TENDER BOX AT:**

Department of Health Global Life Centre, SCM Unit c/o Phalo Avenue and R63 (opposite Engen Garage) BHISHO

#### **Volume 3: The Draft Contract**

# Part C1: Agreement and Contract data

C1.1: Form of offer and Acceptance

C1.2: Contract Data

C1.3: Fixed Performance Guarantee

C1.4: Agreement in terms of section 37(2) of the OH&S Act (Act no 85 of 1990)

### Part C2: Pricing Data

C2.1: Pricing Instructions

C2.2: Bills of Quantities

# Part C3: Scope of Works

C3.1: Scope of Works

C3.6: Health and Safety Specification

#### Part C4: Site Information

C4.1: Site Information as per Scope of Works

	Add the following:
	The employer's agent:
F 4 4	
F.1.4	Zutari (Pty) Ltd
F1.6.1	Add the following to the clause:  The Department reserves the right to not accept the tender from the tenderer with the highest number of points, or award any contract.
F1.6.3	Add the following: A two-stage system will not be followed.
F.2.1	Add the following:
	Only those Tenderers who satisfy the following eligibility criteria are eligible to submit tenders:
	1. 1 Tenderers who are registered with the CIDB, or are capable of being so prior to the evaluation of submissions, in ac Contractor grading designation equal to or higher than a Contractor grading designation determined in accordance with the sum tendered, or a value determined in accordance with Regulation 25 (1B) or 25 (7A) of the Construction Industry Development Regulations, for Class ME, Grade 5ME PE or 6 MEor higher construction work, are eligible to have their tenders evaluated.
	2. Joint ventures are eligible to submit tenders provided that:
	<ol> <li>Every member of the joint venture is registered with the CIDB;</li> <li>The lead partner has a Contractor grading designation in Class ME, Grade 5ME PE orGrade 6 ME construction work;</li> <li>The combined Contractor grading designation calculated in accordance with the Construction Industry Development Regulations is equal or higher than the Contractor grading designation determined in accordance with the sum tendered for Class ME, Grade 5ME PE or Grade 6 ME or higher construction work or a value determined in accordance with Regulations 25 (1B) or 25 (7A) of the Construction Industry Development Regulations; and</li> <li>The joint venture is registered on Central Supplier Database or proof of application.</li> <li>All members of the joint venture must submit copies of the returnable documentations or original where it is so stipulated for all members.</li> <li>In the case of a Partnership/Joint Venture/Consortium the tax clearance must be the Partnership/Joint Venture/Consortium.</li> <li>In the case of a Partnership/Joint Venture/Consortium.</li> <li>In the case of a Partnership/Joint Venture/Consortium the CIPRO certificates must be submitted indicating percentage of ownership for specific goals points scoring, failing which the tenderer will score zero points.</li> <li>The partner of the JV must be registered with CIDB with a grading that is not lower than one level of the required grading.</li> </ol>

F2.2	Add the following to the clause:  Accept that the Employer will not compensate the Tenderer for any costs incurred in attending briefing session, negotiation meetings or any meeting or interviews in the office of the Employer or Employer's agent (if required).
F.2.7	For particulars regarding a pre-Tender site inspection meeting, see Tender Notice and Invitation to Supplier T1.1  "A compulsory briefing session will be held and no compensation will be paid for attendance at this meeting. Tenderers must be represented by a person who is suitably qualified and experience to comprehend the extent of the work involved and who is at the employ of the prospective tenderer.  The tenderer's representative must sign the attendance register in the name of the tendering entity. Addenda will be issue to and tenders will be received only from those tendering entities appearing in the attendance register of the briefing session."
F.2.12	No alternative tenders are allowed.

F.2.13.2	Replace sub-clause F.2.13.2 with the following; Return all returnable documents to the employer after completing them in their entirety by writing in <b>non-erasable ink</b>
F.2.13.3	Add the following: Parts of each Supplier offer communicated on paper shall be submitted as an original, plus 0 (nought) copies.
F.2.13.4	Add the following: The Supplier shall be signed by a person duly authorized to do so. Tenders submitted by joint ventures of two or more firms shall be accompanied by the document of formation of the joint venture, in the form of a joint venture agreement, in which it is defined precisely the conditions under which the joint venture will function, its period of duration, the persons authorized to represent and obligate it, the participation of the several firms forming the joint venture, and any other information necessary to permit a full appraisal of its functioning. Failure to provide the joint venture agreement, bound with the Supplier submission, on the date and time of the closing of the bid, shall render the Supplier non-responsive.
F.2.13.5	Add the following: The employer's address for delivery of Supplier offers and identification details to be shown on each Supplier offer package are:
	Location of Supplier box: Department of Health Physical address: Eastern Cape Department of Health Global Life Center, SCM Unit c/o Phalo Avenue and R63 Bhisho Identification details: Tender No. SCMU3-23/24-0785-HO Title of Supplier: Schedule maintenance of laundry and associated equipment at cluster one (1) – OR Tambo and Alfred Nzo district – health facilities (36 months) Sealed Tender with the identification details on the envelope must be placed in the appropriate official Tender box at the abovementioned address
F.2.13.6	Add the following: A two-envelope procedure will not be followed.
F2.13.9	Telephonic, telegraphic, telefax, facsimile or e-mailed tender offers will not be accepted.
F.2.13.10	Add the following: By signing the offer part of C1.1 Form of Offer and Acceptance the Supplier declares that all information provided in the Supplier submission is correct and free of misrepresentation.
F.2.15.1	Add the following to F.2.15.1: The closing time for submission of Supplier offers is as stated in the Tender Notice and Invitation to Supplier. Telephonic, telegraphic, telex, facsimile or e-mailed Supplier offers will not be accepted.
F.2.16.1	Add the following to F.2.16.1: The Supplier offer validity period is <b>12 weeks.</b>
F.2.17	Insert the following at the end of the last sentence of the note:
	"elect to do so, provided that the competitive position of the preferred Supplier is not affected"

	A Supplier may be rejected as non-responsive if the Supplier fails to provide any clarification requested by the employer within the time for submission stated in the employer's written request for such clarification. The clarification of a Supplier offer includes the provision of the priced bills of quantities (Part C2.2: Bills of Quantities).
F.2.18	Add the following:  The tenderer will be required to submit his fully priced Bills of Quantities (complete document inclusive of all parts) together with this tender.
F.3.4	Add the following: The opening of the tender offers will take place immediately after the closing time of tenders.

#### F.3.8 *Add the following:*

Suppliers will be considered non-responsive if, inter alia:

- 1. the Supplier has failed to attend the compulsory briefing meeting.
- 2. the Supplier is submitted by Telegraphic, telephonic, telex, facsimile (faxed) or email media or if the Supplier is submitted late.
- 3. the Supplier does not comply with the eligibility criteria listed in F2.1 above;
- 4. The resolution for signatory is not attached to the Supplier submission on a company letterhead.
- 5. the Supplier has failed to fully complete and sign SBD1, SBD4 & the Compulsory Enterprise Questionnaire. Failure to submit the required information shall be subjected to a request from SCM to the bidder to submit the required information within 7 days of the request. Failure to comply with such request will result in the bid being deemed non-responsive

# F.3.11.1 Add the following:

This is a two-stage evaluation process:

- Stage 1: Administrative compliance and mandatory requirements
- Stage 2: Evaluation for price and preference

The following procedure will be used to evaluate tender offers received:

- a. Open and record tender offers received
- b. Determine whether or not tender offers are complete.
- c. Determine whether or not tender offers received are responsive and reject non-responsive tenders.
- d. Score tender evaluation points for each price
- e. Confirm that tenderers are eligible for the preferences claimed and, if so, score tender evaluation points for preferencing.
- f. Calculate total tender evaluation points
- g. Rank tender offers from the highest number of tender evaluation points to the lowest.
- h. Perform a risk analysis on the tenderer having the highest ranking/number of points to ascertain if the submission presents an acceptable risk to the employer.
- Recommend the tenderer with the highest number of tender evaluation points for the award of the contract, unless there are compelling and justifiable reasons not to do so.
- j. In the event where the recommended Bidder has failed to comply with the conditions as set out in the letter of award, the client shall notify the recommended Bidder of his/her failure to comply and recommend for award the next bidder that scored the highest points. The Conditions as set out in the letter of award are as follow:
  - I. Proof of having All risk, public liability and support insurances as stipulated in the contract.
  - II. Submission of a Construction Safety, Health and Environmental Plan.
  - III. Contract Guarantee (as selected in the tender document)
- k. An appointment letter/acceptance letter does not constitute a contract or commencement date of a contract. The recommended Bidder is required to sign an official contract with the Department.

The Employer shall in the evaluation of tender offers take due account of the Tenderer's past performance in the execution of similar engineering works of comparable magnitude, and the degree to which possesses the necessary technical, financial and other resources to enable him to complete the Works successfully with the contract period. The tenderer shall be required to satisfy the Employer and the Engineer as to his ability to perform and complet3 the Works timeously, safely and with satisfactory quality, and furnish details in section T2.2z of contracts of a similar nature and magnitude which they have successfully executed in the past.

<u> </u>
The Employer is restricted in accordance with clause 7.(c)(iii) of the Construction Regulations, 2014, to only appoint a contractor to whom he is satisfied has the necessary competencies and resource to carry out the work safely.
Submitting inferior and inadequate information relating to health and safety shall be regarded as justifiable and compelling reasons not to accept the tender offer of the tenderer scoring the highest number of tender evaluation points.

F.3.11.3	The procedure for the evaluation of responsive tenders is <b>Method 3</b> : <b>Administrative compliance, Price and Specific Goals</b> <u>Equipment Functionality – Technical Compliance Verification</u> The bidder is required to provide details pertaining to laundry experience as detailed in the specifications. The compliance of the equipment with the scope of work and specification will be evaluated.
F.3.11.7	Add the following:  The financial offer will be scored using Formula 2 (Option 1): $N_{FO} = (1 - (P-P_M)/P_m) \times W_1$ Where. $N_{FO} = \text{number of Supplier evaluation points awarded for financial offer}$ $W_1 = \text{the maximum possible number of Supplier evaluation points Tender}$ $P_M = \text{the comparative offer of the most favorable Supplier offer}$ $P_M = \text{the comparative offer of the Supplier offer under consideration}$
F.3.11.8	Up to 100 minus W <sub>1</sub> (refer F.3.11.7 above) Supplier evaluation points will be awarded to Suppliers according to their SPECIFIC GOALS status level, determined in accordance with section 9(1) of the Broad-Based Black Economic Empowerment Act (No 53 of 2003), and who have submitted original valid or valid, certified copies of SPECIFIC GOALS status verification certificates issued by either a verification agency accredited by the South African Accreditation System (SANAS) or a sworn affidavit in terms of the amended SPECIFIC GOALS codes. The points will be awarded as follows, based on the SPECIFIC GOALS status level of the Supplier:

The specific goals allocated points in terms of this tender	Number of points  allocated (80/20 system) (To be completed by the organ of state)	Number of points claimed (80/20 system) (To be completed by the tenderer)
Historically Disadvantaged Individuals Ownership	20% (4)	
Women Ownership	20% (4)	
Youth Ownership	20% (4)	
Disability Ownership	20% (4)	
Military Veterans Ownership	10% (2)	
Locality Ownership (Eastern Cape)	10% (2)	
TOTAL	100% (20)	

A trust, consortium or joint venture will qualify for points for their SPECIFIC GOALS status level as a legal entity, provided that the entity submits their SPECIFIC GOALS status level certificate. A trust, consortium or joint venture will qualify for points for their SPECIFIC GOALS status level as an unincorporated entity, provided that the entity submits their consolidated SPECIFIC GOALS scorecard as if they were a group

Bank Rating Certificate  Annexure F as per returnable list	Bank rating of A: Undoubted for the amount of enquiry – Good to do business with	Annexure F as per returnable list Bank rating certificate issued by the bank.
	Bank rating of B: Good for the amount of the enquiry – Amount is well within the capacity of ordinary business commitments	Annexure F as per returnable list Bank rating certificate issued by the bank.
	Bank rating of C: Good for amount quoted if strictly in the way of business – Unlikely to commit themselves beyond their means	Annexure F as per returnable list Bank rating certificate issued by the bank.

# F.3.11.10 Add the following new sub-clause: The Employer will perform a risk analysis in respect of the following: (a) reasonableness of the financial offer (b) reasonableness of unit rates and prices (c) the Suppliers ability to fulfil its obligations in terms of the tender document, that is, that the Supplier can demonstrate that he/she possesses the necessary professional and technical qualifications, professional and technical competence, financial resources, equipment and other physical facilities, managerial capability, reliability, experience, reputation, personnel to perform the contract, etc. F.3.13.1 Supplier offers will only be accepted if: a) the Supplier is registered and in good standing with the South African Revenue Service (SARS) or proof that he or she has made arrangement with SARS to meet his or her outstanding tax obligations. This will be verified by the Employer on the Centralized Supplier Database. Where the recommended bidder is not tax compliant, the bidder will be notified of the non-compliant status and be granted seven (7) working days to rectify their compliance status with the SARS. The bidder must thereafter provide the Department with proof of its tax compliance which must be verified via the CSD or eFiling. b) the Supplier or any of its directors is not listed on the Register of Supplier Defaulters in terms of the Prevention and Combating of Corrupt Activities Act of 2004 as a person prohibited from doing business with the public sector: c) the Supplier or any of its directors is not listed on the Database of Restricted Suppliers kept by the National Treasury and updated from time to time; c) the Supplier has not: i) abused the Employer's Supply Chain Management System; d) The Supplier has completed the Compulsory Enterprise Questionnaire and there are no conflicts of interest which may impact on the Supplier's ability to perform the contract in the best interests of the employer or potentially compromise the Supplier process. F.3.17 Add the following: The number of paper copies of the signed contract to be provided by the Employer is one.

# F.4 ADDITIONAL CONDITIONS OF TENDER The additional conditions of Tender are: F.4.1 **Invalid Tender** Suppliers shall be considered invalid and shall be endorsed and recorded as such in the Supplier opening record, by the responsible official who opened the Tender, in the following circumstances: a) if the Supplier offer is not submitted on the Form of Offer and Acceptance bound into this Tender document (form C1.1, Part C1: Agreements and Contract Data); b) if the Form of Offer and Acceptance has not been completed or has not been signed by the authorized representative of the Supplier c) if the Form of Offer and Acceptance is signed, but the name of the Supplier is not stated or is indecipherable d) if the Supplier offer is not completed in non-erasable ink; F.4.2 Negotiations with preferred Suppliers The Employer may negotiate the final terms of a contract with Suppliers identified through a competitive Supplying process as preferred Suppliers provided that such negotiation: a) does not allow any preferred Supplier a second or unfair opportunity; b) is not to the detriment of any other Supplier; and c) does not lead to a higher price than the Supplier as submitted. Minutes of any such negotiations shall be kept for record purposes F.4.3 General supply chain management conditions applicable to Supplier In terms of its Supply Chain Management Policy the Employer may not consider a Supplier unless the provider who submitted the Supplier: a) has furnished the Employer with that provider's: full name; identification number or company or other registration number; and tax reference number and VAT registration number, if any; b) has indicated whether: the provider is in the service of the state, or has been in the service of the state in the previous twelve months: the provider is not a natural person, whether any of the directors, managers, principal shareholders or stakeholders is in the service of the state, or has been in the service of the state in the previous twelve months; or whether a spouse, child or parent of the provider or of a director, manager, shareholder or stakeholder referred to above is in the service of the state, or has been in the service of the state in the previous twelve months. Irrespective of the procurement process followed, the Employer is prohibited from making an award to: a person who is in the service of the state; a juristic entity of which any director, manager, principal shareholder or stakeholder is in the service of the state; an advisor or consultant contracted with the Employer; or a person, advisor or corporate entity involved with the tender specification committee, or a director of such corporate entity.

In this regard, Suppliers shall complete Returnable Schedules: Compulsory Enterprise Questionnaire. Failure to complete this schedule will result in the Supplier not being

considered further.

# F.4.4 | Combating abuse of the Supply Chain Management Policy

In terms of its Supply Chain Management Policy, the Employer may reject the Supplier of any Supplier if that Supplier or any of its directors has:

- a) failed, during the last five years, to perform satisfactorily on a previous contract with the Employer or any other organ of state after written notice was given to that Supplier that performance was unsatisfactory;
- b) abused the supply chain management system of the Employer or has committed any improper conduct in relation to this system;
- c) been convicted of fraud or corruption during the past five years;
- d) will fully neglected, reneged on or failed to comply with any government, municipal or other public sector contract during the past five years; or
- e) been listed with the Register of Supplier Defaulters in terms of section 29 of the Prevention and Combating of Corrupt Activities Act (No 12 of 2004) or has been listed on National Treasury's database as a person or juristic entity prohibited from doing business with the public sector.

In this regard, Suppliers shall complete Part T2.2: Returnable Schedules: Certificate of Independent Supplier Determination and Declaration of Supplier's Past Supply Chain Management Practices. Failure to complete these schedules will result in the Supplier not being considered further.

# F.4.6 Claims arising after submission of Supplier

No claim for any extras arising out of any doubt or obscurity as to the true intent and meaning of anything contained in the Conditions of Contract, Scope of Work and Pricing Data, will be admitted by the Employer after the submission of any Tender and the Supplier shall be deemed to have:

- 1) read and fully understood the whole text of the Contract Data, Scope of Work and Pricing Data and thoroughly acquainted himself with the nature of the works proposed and generally of all matters which may influence the Contract.
- 2) visited the site of any proposed works.
- 3) requested the Employer or his duly authorized agent to make clear the actual requirements of anything contained in the Scope of Work and Pricing Data, the exact meaning or interpretation of which is not clearly intelligible to the Supplier.
- 4) received any Addenda to the Supplier documents which have been issued in accordance with the Employer's Supply Chain Management Policy.

Before submission of any Supplier, the Supplier should check the number of pages, and if any are found to be missing or duplicated, or the figures or writing indistinct, or if the Pricing Data contain any obvious errors, the Supplier must apply to the Employer's Agent at once to have the same rectified, as no liability will be admitted by the Employer in respect of errors in any Supplier due to the foregoing.

### F.4.7 Imbalance in Supplier rates

In the event of Supplier rates or lump sums being declared by the Employer to be unacceptable to it because they are either excessively low or high or not in proper balance with other rates or lump sums, the Supplier may be required to produce evidence and advance arguments in support of the Supplier rates or lump sums objected to. If, after submission of such evidence and any further evidence requested, the Employer is still not satisfied with the supplied rates or lump sums objected to, it may request the Supplier to amend these rates and lump sums along the lines indicated by it.

The Supplier will then have the option to alter and/or amend the rates and lump sums objected to and such other related amounts as are agreed on by the Employer, but this shall be done without altering the Supplier offer as Supplied or, if applicable, the corrected total of prices in accordance with F.3.9.3. Should the Supplier fail to amend his tender in a manner acceptable to the Employer, the Employer may reject the Tender.

- F.4.8 The Employer shall not formally issue Tender documents in electronic format as contemplated in F.2.13.2 and F.2.13.3 and shall only issue Supplier documents in hardcopy. An electronic version of the issued Tender documents may be made available to the Supplier, upon written request in terms of this clause, subject to the following:
  - (a) Electronic copies of the contract document, or parts thereof, will only be provided to Suppliers who have been issued with the Tender documents as contemplated in F.1.2 in hardcopy.
  - (b) The electronic version shall not be regarded as a substitute for the issued Tender documents.
  - (c) The Employer shall not accept tender submitted in electronic format. Suppliers may not complete and submit a printed copy of the electronic version of the Tender document or part thereof. Only those Suppliers that have been completed on the issued hard copy Tender document shall be considered.
  - (d) The Employer accepts no responsibility or liability arising from any reliance on or use of the electronic version provided in terms of this clause. The Employer further does not guarantee that the electronic version corresponds with the issued Tender documents in all respects. Suppliers are alerted to the fact that electronic versions of the Tender documents may not reflect any notices or addenda that amend the Tender document.
  - (e) Any non-compliance with these provisions, including effecting any unauthorized alterations to the Supplier document as contemplated in F.2.11, shall render the Tender invalid. The Employer reserves the right to take any action against such Supplier allowed in law including, in circumstances where the Supplier had already been awarded, the right to cancel the contract.
  - (f) In requesting the electronic version of the Tender document or parts thereof, the Supplier is deemed to have read, understood and accepted all of the above conditions.

## **SBD 4: DECLARATION OF INTEREST**

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

#### **BIDDER'S DISCLOSURE**

## 1. PURPOSE OF THE FORM

Any person (natural or juristic) may make an offer or offers in terms of this invitation to bid. In line with the principles of transparency, accountability, impartiality, and ethics as enshrined in the Constitution of the Republic of South Africa and further expressed in various pieces of legislation, it is required for the bidder to make this declaration in respect of the details required hereunder.

Where a person/s are listed in the Register for Tender Defaulters and / or the List of Restricted Suppliers, that person will automatically be disqualified from the bid process.

#### 2. Bidder's declaration

2.1 Is the bidder, or any of its directors / trustees / shareholders / members / partners or any person having a controlling interest1 in the enterprise?

Employed by the state?

YES/NO

2.1.1 If so, furnish particulars of the names, individual identity numbers, and, if applicable, state employee numbers of sole proprietor/ directors / trustees / shareholders / members/ partners or any person having a controlling interest in the enterprise, in table below.

Full Name	Identity Number	Name institution	of	State
				·

- 2.2 Do you, or any person connected with the bidder, have a relationship with any person who is employed by the procuring institution? **YES/NO**
- 2.2.1 If so, furnish particulars: ......
- Does the bidder or any of its directors / trustees / shareholders / members / partners or any person having a controlling interest in the enterprise have any interest in any other related enterprise whether or not they are bidding for this contract?

  YES/NO
- 2.3.1 If so, furnish particulars:

••••••

## 3 DECLARATION

- 3.1 I have read and I understand the contents of this disclosure;
- 3.2 I understand that the accompanying bid will be disqualified if this disclosure is found not to be true and complete in every respect;
- The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However, communication between partners in a joint venture or consortium2 will not be construed as collusive bidding.
- 3.4 In addition, there have been no consultations, communications, agreements or arrangements with any competitor

<sup>1</sup> the power, by one person or a group of persons holding the majority of the equity of an enterprise, alternatively, the person/s having the deciding vote or power to influence or to direct the course and decisions of the enterprise.

<sup>2</sup> Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

- regarding the quality, quantity, specifications, prices, including methods, factors or formulas used to calculate prices, market allocation, the intention or decision to submit or not to submit the bid, bidding with the intention not to win the bid and conditions or delivery particulars of the products or services to which this bid invitation relates.
- 3.4 The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.
- There have been no consultations, communications, agreements or arrangements made by the bidder with any official of the procuring institution in relation to this procurement process prior to and during the bidding process except to provide clarification on the bid submitted where so required by the institution; and the bidder was not involved in the drafting of the specifications or terms of reference for this bid.
- I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No 12 of 2004 or any other applicable legislation.

I CERTIFY THAT THE INFORMATION FURNISHED IN PARAGRAPHS 1, 2 and 3 ABOVE IS CORRECT.
I ACCEPT THAT THE STATE MAY REJECT THE BID OR ACT AGAINST ME IN TERMS OF PARAGRAPH 6 OF PFMA SCM

INSTRUCTION 03 OF 2021/22 ON PREVENTING AND COMBATING ABUSE IN THE SUPPLY CHAIN MANAGEMENT SYSTEM SHOULD THIS DECLARATION PROVE TO BE FALSE.

#### SBD 6.1

## PREFERENCE POINTS CLAIM FORM IN TERMS OF THE PREFERENTIAL PROCUREMENT REGULATIONS 2022

This preference form must form part of all tenders invited. It contains general information and serves as a claim form for preference points for specific goals.

NB: BEFORE COMPLETING THIS FORM, TENDERERS MUST STUDY THE GENERAL CONDITIONS, DEFINITIONS AND DIRECTIVES APPLICABLE IN RESPECT OF THE TENDER AND PREFERENTIAL PROCUREMENT REGULATIONS, 2022

#### 1. GENERAL CONDITIONS

- 1.1 The following preference point systems are applicable to invitations to tender:
  - the 80/20 system for requirements with a Rand value of up to R50 000 000 (all applicable taxes included);
  - the 90/10 system for requirements with a Rand value above R50 000 000 (all applicable taxes included).

## 1.2 To be completed by the organ of state

(delete whichever is not applicable for this tender).

The applicable preference point system for this tender is the 80/20 preference point system.

The lowest/ highest acceptable tender will be used to determine the accurate system once tenders are received.

- 1.3 Points for this tender (even in the case of a tender for income-generating contracts) shall be awarded for:
  - (a) Price; and
  - (b) Specific Goals.

## 1.4 To be completed by the organ of state:

The maximum points for this tender are allocated as follows:

	POINTS
PRICE	80
SPECIFIC GOALS	20
Total points for Price and SPECIFIC GOALS	100

- 1.5 Failure on the part of a tenderer to submit proof or documentation required in terms of this tender to claim points for specific goals with the tender, will be interpreted to mean that preference points for specific goals are not claimed.
- 1.6 The organ of state reserves the right to require of a tenderer, either before a tender is adjudicated or at any time subsequently, to substantiate any claim in regard to preferences, in any manner required by the organ of state.

## 2. **DEFINITIONS**

- (a) "tender" means a written offer in the form determined by an organ of state in response to an invitation to provide goods or services through price quotations, competitive tendering process or any other method envisaged in legislation:
- (b) "price" means an amount of money tendered for goods or services, and includes all applicable taxes less all unconditional discounts;
- (c) "rand value" means the total estimated value of a contract in Rand, calculated at the time of bid invitation,

and includes all applicable taxes;

- (d) "tender for income-generating contracts" means a written offer in the form determined by an organ of state in response to an invitation for the origination of income-generating contracts through any method envisaged in legislation that will result in a legal agreement between the organ of state and a third party that produces revenue for the organ of state, and includes, but is not limited to, leasing and disposal of assets and concession contracts, excluding direct sales and disposal of assets through public auctions; and
- (e) "the Act" means the Preferential Procurement Policy Framework Act, 2000 (Act No. 5 of 2000).

#### 3. FORMULAE FOR PROCUREMENT OF GOODS AND SERVICES

#### 3.1. POINTS AWARDED FOR PRICE

#### 3,1,1 THE 80/20 PREFERENCE POINT SYSTEMS

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20

$$Ps = 80 \left(1 - \frac{Pt - P \min}{P \min}\right)$$

Where

Ps = Points scored for price of tender under consideration

Pt = Price of tender under consideration

Pmin = Price of lowest acceptable tender

## 3.2. FORMULAE FOR DISPOSAL OR LEASING OF STATE ASSETS AND INCOME GENERATING PROCUREMENT

## 3.2.1. POINTS AWARDED FOR PRICE

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20

$$Ps = 80 \left(1 + \frac{Pt - P \max}{P \max}\right)$$

Where

Ps = Points scored for price of tender under consideration

Pt = Price of tender under consideration

Pmax = Price of highest acceptable tender

#### 4. POINTS AWARDED FOR SPECIFIC GOALS

- 4.1. In terms of Regulation 4(2); 5(2); 6(2) and 7(2) of the Preferential Procurement Regulations, preference points must be awarded for specific goals stated in the tender. For the purposes of this tender the tenderer will be allocated points based on the goals stated in table 1 below as may be supported by proof/ documentation stated in the conditions of this tender:
- 4.2. In cases where organs of state intend to use Regulation 3(2) of the Regulations, which states that, if it is unclear whether the 80/20 preference point system applies, an organ of state must, in the tender documents, stipulate in the case of—
  - (a) an invitation for tender for income-generating contracts, that either the 80/20 preference point system will apply and that the highest acceptable tender will be used to determine the applicable preference point system; or
  - (b) any other invitation for tender, that either the 80/20 preference point system will apply and that the

then the organ of state must indicate the points allocated for specific goals for both the 80/20 preference point system.

Table 1: Specific goals for the tender and points claimed are indicated per the table below.

(Note to organs of state: Where either the 80/20 preference point system is applicable, corresponding points must also be indicated as such.

Note to tenderers: The tenderer must indicate how they claim points for each preference point system.)

The specific goals allocated points in terms of this tender	Number of points allocated (80/20 system) (To be completed by the organ of state)	Number of points claimed (80/20 system) (To be completed by the tenderer)
Historically Disadvantaged Individuals Ownership	20% (4)	
Women Ownership	20% (4)	
Youth Ownership	20% (4)	
Disability Ownership	20% (4)	
Military Veterans Ownership	10% (2)	
Locality Ownership (Eastern Cape)	10% (2)	
TOTAL	100% (20)	

- a) Service providers must submit proof of its Specific Goals points claimed / status of contributor.
- b) The Specific Goals supporting documents required to verify claimed points may inline with the specified requirements include:
  - Historically Disadvantaged Individuals Ownership: Proof of ownership (CIPRO certificate) with id no.
  - Women Ownership: Ownership: Proof of ownership (CIPRO certificate) with id no.
  - Youth Ownership: Ownership: Proof of ownership (CIPRO certificate) with id no.
  - Disability Ownership: Proof of ownership (CIPRO certificate) with valid medical documentary proof.
  - Military Veterans Ownership: Proof of ownership (CIPRO certificate) with valid proof of veteran status.
  - Ownership: Proof of business address (municipal account or valid lease agreement)
  - Updated CSD report

TYPE OF COMPANY/ FIRM

4.5.

## **DECLARATION WITH REGARD TO COMPANY/FIRM**

4.3.	Name of company/firm
4.4.	Company registration number:

Partnership/Joint Venture / Consortium
One-person business/sole propriety
Close corporation
Public Company
Personal Liability Company
(Pty) Limited
Non-Profit Company
State Owned Company
[TICK APPLICABLE BOX]

- 4.6. I, the undersigned, who is duly authorised to do so on behalf of the company/firm, certify that the points claimed, based on the specific goals as advised in the tender, qualifies the company/ firm for the preference(s) shown and I acknowledge that:
  - i) The information furnished is true and correct;
  - ii) The preference points claimed are in accordance with the General Conditions as indicated in paragraph 1 of this form;
  - iii) In the event of a contract being awarded as a result of points claimed as shown in paragraphs 1.4 and 4.2, the contractor may be required to furnish documentary proof to the satisfaction of the organ of state that the claims are correct;
  - iv) If the specific goals have been claimed or obtained on a fraudulent basis or any of the conditions of contract have not been fulfilled, the organ of state may, in addition to any other remedy it may have -
    - (a) disqualify the person from the tendering process;
    - (b) recover costs, losses or damages it has incurred or suffered as a result of that person's conduct;
    - (c) cancel the contract and claim any damages which it has suffered as a result of having to make less favourable arrangements due to such cancellation;
    - (d) recommend that the tenderer or contractor, its shareholders and directors, or only the shareholders and directors who acted on a fraudulent basis, be restricted from obtaining business from any organ of state for a period not exceeding 10 years, after the *audi alteram* partem (hear the other side) rule has been applied; and

(e)	forward the matter for	criminal prosecution, if deemed necessary.

# T2.2: OTHER DOCUMENTS REQUIRED FOR TENDER EVALUATION PURPOSES

## T2.2g: SPECIFIC GOALS CLAIMED (CIPRO CERTIFICATE)

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

Suppliers must attach CIPRO CERTIFICATE.

## T2.2y: Proof of Registration with Centralized Supplier Database

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

Suppliers must attach Full CSD report.

## Annexure A1: Method Statement (Generic)

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

Suppliers are required to submit a method statement.

## **Annexure A2: Method Statement (Summary Task)**

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

Suppliers are required to submit a summary task. The summary task must indicate the major tasks and subtasks of the works. Contractor must indicate how they would approach the works to achieve the required outcomes from start to end of the project.

## **Annexure A3: Method Statement (Programme with Timelines and Resources)**

PROJECT NAME	SCHEDULE MAINTENANCE OF GENERATOR TAT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

Suppliers are required to submit Programme with timelines such as a Gantt Chart (quarterly and biannual inspections) and planned resources (human resources and tools).

## **Annexure B1: Key Personnel Qualification (Maintenance manager)**

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

Suppliers are required to submit proof of maintenance manager's experience (CV) and qualifications. All certified documents must not be older than three (3) months.

Maintenance Manager Mechanical/Electrical Engineering, Construction Project Management	Electrical / Mechanical Engineering Degree with Registration as per Act 43 of 2000 (Candidate Registration will not be accepted)	Attached certified copies of qualification	
	OR		
	Electrical / Mechanical Engineering Diploma with Registration as per Act 43 of 2000 (Candidate Registration will not be accepted)	Attached certified copies of qualification

## **VOLUME 3: CONTRACT**

# PART C1: AGREEMENT AND CONTRACT DATA

#### C1.1 FORM OF OFFER AND ACCEPTANCE

#### OFFER

The Employer, identified in the acceptance signature block, has solicited offers to enter into a Contract for the procurement of:

CONTRACT NUMBER: SCMU3-23/24-0785-HO

CONTRACT NAME: SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))

The Tenderer, identified in the offer signature block below, has examined the documents listed in the Tender Data and addenda thereto as listed in the tender schedules, and by submitting this offer has accepted the conditions of tender.

By the representative of the Tenderer, deemed to be duly authorized, signing this part of this form of offer and acceptance, the Tenderer offers to perform all of the obligations and liabilities of the Contractor under the Contract including compliance with all its terms and conditions according to their true intent and meaning for an amount to be determined in accordance with the Conditions of Contract identified in the Contract Data.

	e prices inclusive of Value-Added Tax is:

#### **ACCEPTANCE**

By signing this part of this form of offer and acceptance, the Employer identified below accepts the Tenderer's offer. In consideration thereof, the Employer shall pay the Contractor the amount due in accordance with the Conditions of Contract identified in the Contract data. Acceptance of the Tenderer's offer shall form an agreement between the Employer and the Tenderer upon the terms and conditions contained in this agreement and in the Contract that is the subject of this agreement.

The terms of the Contract are contained in:

Part C1: Agreements and Contract data (which includes this agreement)

Part C2: Pricing data
Part C3: Scope of work

Part C4: Site Information and drawings and documents or parts thereof, which may be incorporated by reference into the above listed Parts.

Deviations from and amendments to the documents listed in the Tender Data and any addenda thereto, as listed in the returnable schedules as well as any changes to the terms of the offer agreed by the Tenderer and the Employer during this process of offer and acceptance, are contained in the schedule of deviations attached to and forming part of this agreement. No amendments to or deviations from said documents are valid unless contained in this schedule, which must be duly signed by the authorised representative(s) of both parties.

The Tenderer shall, within two weeks after receiving a completed copy of this agreement including the schedule of deviation (if any), contact the Employer's Agent (whose details are given in the Contract data) to arrange the delivery of any securities, bonds, guarantees, proof insurance and any other documentation to be provided in terms of the Conditions of Contract identified in the Contract data at or just after, the date this Agreement comes into effect. Failure to fulfil any of these obligations in accordance with those terms shall constitute a repudiation of this agreement.

Notwithstanding anything contained herein, this agreement comes into effect on the date when the Tenderer receives one fully completed original copy of this document, including the schedule of deviations (if any). Unless the Tenderer (now Contractor), within five (5) working days of the date of such receipt, notifies the Employer in writing of any reason why he cannot accept the contents of this agreement, this agreement shall constitute a binding Contract between the parties.

#### **SCHEDULE OF DEVIATIONS**

#### Notes:

- The extent of deviations from the tender documents issued by the Employer prior to the tender closing date is limited to those permitted in terms of the conditions of tender.
- A Tenderer's covering letter shall not be included in the final Contract document. Should any
  matter in such letter, which constitutes a deviation as aforesaid become be the subject of
  agreements reached during the process of offer and acceptance, the outcome of such
  agreement shall be recorded here.
- Any other matter arising from the process of offer and acceptance either as a confirmation, clarification or change to the tender documents, and which it is agreed by the parties becomes an obligation of the Contract, shall also be recorded here.
- Any change or addition to the tender documents arising from the above agreements and recorded here, shall also be incorporated into the final draft of the Contract.

A Tenderer's covering letter shall not be included in the final Contract document. Should any matter in such letter, which constitutes a deviation as aforesaid, be the subject of agreements reached during the process of offer and acceptance, the outcome of such agreement shall be recorded here.

### **Annexure CD1 – Demerit Table and Penalty Calculation System**

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS))
TENDER No.	SCMU3-23/24-0785-HO

Attach document here

### ANNEXURE CD1: DEMERIT TABLE AND PENALTY CALCULATION SYSTEM

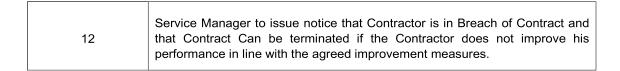

If the Contractor fails to remedy any sub-standard work within the time frame stipulated by the Service Manager, the conditions as per GM 3.1 will apply.

The contractor will incur demerit points for specific measurable poor performance incidents which can lead to the early termination of the Contract as described below.

DESCRIPTION	DEMERIT POINT
Failure to submit the Functional Condition Assessment Report by the due date	1 point/ week that the report is late
Exceeding the maximum allowable response and resolve time for a P1 Breakdown	3 points/ incident
Exceeding the maximum allowable response and resolve time for a P2 Breakdown	2 points/ incident
Exceeding the maximum allowable response and resolve time for a P3 or P4 Breakdown	1 point/ incident
Not meeting the Planned Maintenance Performance KPI	1 point/ incident
Not meeting the Rework Rate KPI	1 point/ incident
Not meeting the Contractor Contactability KPI	1 point/ incident

The demerit points will accumulate and trigger the following actions:

ACCUMULATED DEMERIT POINTS	ACTION
6	Service Manager to discuss Contractor's performance deviation and agree on improvement measures. If improvement measures are successful and the Contractor has been consistently meeting the required KPI targets for the following two months, the demerit points can be cancelled by the Service Manager.

15	Service Manager to Terminate Contract as per Clause 9 of the NEC3 Term Service Contract.
----	------------------------------------------------------------------------------------------

Poor performance by the Contractor due to late payments by the Employer will not incur demerit points.

Financial penalties, as per the requirements of Secondary Options Clause X17, will be applied on the effected payments at 1% penalty per demerit point by the Service Manager, in the month that the demerit points are allocated to the Contractor.

### **Annexure CD2 – Key Performance Indicator Listing**

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT – HEALTH FACILITIES (36 MONTHS)
TENDER No.	SCMU3-23/24-0785-HO

#### ANNEXURE CD2: KEY PERFORMANCE INDICATOR LISTING

The following Key Performance Indicators (KPI's) will be applicable to this Contract and must be monthly updated and reported on by the Service Manager:

KPI Name	KPI Equation				Target
Emergency Job Rate	=	Total Number of Emergency Jobs Done  Total Number of Jobs Done	X 100%	Monthly	<10%
Planned Maintenance Performance	=	Total Number of Scheduled Planned Maintenance Jobs Completed Total Number of Planned Maintenance Jobs	X 100%	Monthly	100%
Cost Estimation	=	Scheduled  Total Actual Cost of Work  Total Estimated Cost Of Work	X 100%	Monthly	100%
Response Performance	=	Number of Service Calls Completed within Targeted Response Time	X 100%	Monthly	100%
Rework Rate	=	Total Number of Service Calls  Number of Jobs Requiring Rework  Total Number of Jobs Done	X 100%	Monthly	0%
SHEQ	=	Number of SHEQ Incidents Involving the Contractor		Monthly	0
Contractor Contactability = Number of Times that Contractor was not tre			Monthly	0	

The Service Manager must also ensure that the following items are routinely inspected and reported on by the Site Representative for each Health Facility:

1. Compliance with general maintenance requirements as specified in the Service Information.

- 2. Manner in which preventative and corrective maintenance is carried out.
- 3. Manner in which the Maintenance Control Plan is implemented and updated.
- 4. Manner in which Task Orders received from the Service Manager is dealt with.
- 5. Manner in which records are kept as required by the Service Information as well as the Occupational Health and Safety Act, Act No 85 of 1993 as amended.
- 6. Quality of services carried out for the month prior to the inspection.

**Note:** The aim of the above inspection is to determine that all the requirements of the specification have been complied with. Should the Service Manager believe that one or more maintenance items referred to above, have been neglected or totally ignored by the Contractor he may decide to implement demerit points as penalty as per X17 for each type of non-compliance found during the inspection.

TENDER No.	SCMU3-23/24-0785-HO

### **C2.1 Pricing Data**

#### **GENERAL NOTES**

#### 1 Documents

The Schedule of Quantities form part of the Document and must be read in conjunction with the other parts forming the Document in order to gain the full meanings of the descriptions of the work to be done and materials and equipment to be used.

#### 2 Alterations

No alterations, erasure or addition is to be made in the text of the Schedule of Quantities. Should any alteration, erasure or addition be made, it will not be recognised and the original wording of the Schedule of Quantities will be adhered to.

#### 3 Issue of Schedule of Quantities in Electronic Format

The Engineers will make the Schedule of Quantities available to Tenderers in electronic (Microsoft Excel Workbook) format, upon request.

If utilized for tender submission, the Tenderer will be responsible for ensuring the correctness of all calculations. The Consulting Electrical Engineers cannot be held responsible for any arithmetic inaccuracies in the electronic Schedule of Quantities.

#### 4 Pages

Before submitting his Tender, the Tenderer must check to ensure all pages have been included and are distinct. Should any obvious errors be found the Engineer is to be notified immediately to have them corrected as no liability whatsoever will be admitted by the Engineer in respect of errors in the Tender due to the foregoing.

#### 5 Responsibility

The responsibility for the accuracy of the quantities written into the Schedule of Quantities remains with the person who prepared the Schedule of Quantities. The Tenderer shall be relieved of the responsibility of measuring quantities at the Tender stage, and the Tender Price submitted shall be in respect of the quantities set out in the Schedule of Quantities.

The Tenderer will be required to make his assessment of items such as brackets, fixings, etc., from details stated in the Schedule of Quantities and shall make allowances therefore within the rates tendered.

Tenderers shall make due allowance in their rates for any item of incidental or contingent work, labour and materials not contained in the Schedule of Quantities but deemed necessary for the successful completion of the Works.

#### 6 Offered rates in the Schedule of Quantities

The rates in the Schedule of Quantities shall be final and no further adjustment will be made.

#### 7 Currency

All the offered rates in the Schedule of Quantities shall be in South African Rands (R). Any items purchased overseas must be converted to local currency with all exchange rates and export charges.

#### 8 Unit Rates

Unless a separate rate for the supply and the installation of any item is specifically called for, the supply and installation costs of any items shall be fully included in the unit price.

The description of each item shall, unless otherwise stated herein, be held to include making, conveying and delivering, unloading, storing, unpacking, hoisting, setting, fitting and fixing in position, cutting and

waste, patterns, models and templates plant, temporary works, return of water establishment charges, profit and all other obligations arising out of the Conditions of Contract.

#### 9 Variations

Variations in the scope and extent of the work included in the Schedule of Quantities shall be allowed in order to meet the Employer's requirements and shall be measured and costed at the rates entered in the Schedule of Quantities, where appropriate, forming an addition to or deduction from the total of the Schedule of Quantities. Any items or variations for which rates have not been added in the Schedule of Quantities shall be agreed and priced as non-scheduled items in accordance with the provisions of the contract.

The rules governing the extent and costing of the variations shall be those provided for in the Conditions of Contract and Variations to Sub-contract.

Variations to the planning before the work has been executed shall be priced as above. Alterations to work already executed cannot necessarily be priced as above and must be reviewed on its merits.

The appropriate portions of the Preliminary & General Costs are to be adjusted proportionately to the nett additions or omissions of the variations to the contract

#### 10 Preliminary and General

Tenderers are to note that no allowances have been made in the Schedules of Quantities for the pricing of "Preliminary & General" items.

Tenderers shall therefore, include the "Preliminary & General" component of their Tender Price in their tendered rates for the respective items of equipment / Work.

#### 11 Provisional Sums

All Provisional Sums shall be expended only as directed by the Client and Engineer and any balance remaining shall be deducted from the amount of the Sub-contract sum. No work for which Provisional Sums are provided shall be commenced without written instructions from the Engineer.

All Provisional Sums may be utilized in full or in part. These Provisional Sums may be deleted in full or in part if not required.

#### 12 Contingency Sums

All Contingency Sums shall be expended only as directed by the Client and Engineer. No work for which Contingency Sums are provided shall be commenced without written instructions from the Engineer.

All Contingency Sums may be utilized in full or in part. These Contingency Sums may be deleted in full or in part if not required.

#### 13 Dayworks

The rates included for daywork shall not form part of the Tender Price, but Tenderers shall note that this item must be regarded as provisional and will only be payable to the Sub-contractor if and when a written order to this effect has been issued.

#### 14 Value Added Tax

This Schedule of Quantities shall be priced nett, excluding VAT.

VAT shall only be added at the Summary at the end of the Schedule of Quantities for the Principal Contract.

#### 15 Adjustment

The Employer reserves the right to adjust arithmetical errors in the extension of rates and totals in the Tender, and the Tenderer will be informed of the effect of any corrections on his Tender Sum prior to the award of the Contract. In no case will tendered rates be adjusted when correcting such errors.

In the event of there being tendered rates or prices which are declared by the Employer to be unacceptable to him, because they are either excessively low or high or not in proper balance with other rates, the Tenderer may be required to produce evidence and advance arguments in support of the tendered rates or prices objected to. If after submission of such evidence and any further evidence requested, the Employer is still not satisfied with the tendered rates or prices objected to, he may request the Tenderer to amend these rates and prices along the lines indicated by him.

In the case of Tenders with Schedule of Quantities, the total corrected Tender Price in the Tender Form shall constitute the Sub-contract Sum. Tenderers are advised to check their extensions and additions. In the case of a Lump Sum Tender, the original uncorrected Tender Price shall be considered. The Engineer shall negotiate adjustments to the rates tendered in order to correct the arithmetical extension or addition, whilst the Tender Price as submitted, remains unaltered.

manner acceptable to the Employer, or at all, it may prejudice his Tender.

In either case, the Tenderer shall be notified of any arithmetical error in his Tender and shall be given the opportunity to withdraw the Tender at this stage.

#### 16 Quantification

The successful Tenderer and the Employer or his Agent may agree that the total of any Schedule, including any variations by way of additions thereto or deductions there from, represents a fair and accurate quantification of the items set out in the Schedule of Quantities and the parties may agree final payment on that basis. In the event of any dispute as to the quantities, the disputed item or items shall be adjusted where necessary.

#### 17 Ordering

The quantities in this Schedule of Quantities shall not be used for ordering materials. The onus is on the successful Tenderer to order the correct quantities of materials as per the drawings.

#### 18 Payment

The measurement and payment of Work done shall be made in accordance with the unit price rates, and rates of pay listed in the Schedule of Quantities. No payment will be made for any item of associated work not specifically detailed in the Schedule of Quantities.

# STANDARD SPECIFICATION FOR THE GENERAL MAINTENANCE AND REPAIRS OF LAUNDRY & ASSOCIATED EQUIPMENT

#### **GM 1 GENERAL**

The successful Contractor will be responsible for, and is expected to, maintain all the plant and installations detailed in the Price List and the Inventory of Equipment attached to this Contract.

The intention of this comprehensive maintenance Contract is to assess the current laundry and associated equipment's condition of each asset, repair what is needed, and maintain all equipment included as part of the Contract, in such a manner that, except for normal wear and tear, their condition don't deteriorate during the initial Service Period of 36 (thirty six) months. Instruction to proceed with any work related to this Contract shall be authorized by means of a Task Order from the Service Manager.

As skills transfer are an integral part of this Contract the Employer's Operating and Maintenance staff will be responsible for all operating and daily inspections on the equipment, unless otherwise specified in the relevant asset specific Supplementary Specification and/or Relevant Price List.

The Contractor is required to provide pricing for the following items in the Contract as expanded on in this specification for each asset type and equipment quantity as covered by this Tender:

- Verify the Assets and update the Asset Inventory List that is provided with this Contract;
- Compile a Preliminary Maintenance Control Plan (Annexure I) to determine what routine servicing should take place on each type of equipment covered by the Contract, and at what frequency the services should take place during the Contract Period if this does not correlate to the Price List service frequency proposed by the Service Manager. With reference to the Price List and C3.1b Supplementary Specification requirements, the Contractor must submit an all-inclusive price and quantity of, for each Service Activity required. Service Activities may include Operations, Minor Services, Major Services or Statutory Inspections as detailed in the Supplementary Specification related to this bid as well as the Price List.
- Cost to do a full functionality test and condition assessment of all equipment and installations included in the Contract (after Contract award), and provide a priced key spare part pricelist for this equipment;
- Cost to provide a detailed Functional Condition Assessment Report based on the findings from the functionality test and condition assessment process.

It is to be noted that the aim of the maintenance Contract is NOT to replace random components at the beginning of the Contract in anticipation of a possible breakdown during the Service Period. Only known defects shall be repaired once approved by the Service Manager. It is the Contractor's responsibility to decide if he/she wants to visit each site and familiarize themselves with the actual condition of each installation before submitting a Tender, or to rely on the information as contained in the Inventory of Equipment that is attached to this Contract.

- 1. This Standard Specification for the General Maintenance and Repairs of Electrical and Mechanical Installations,
- 2. The Technical Specifications that may be applicable,
- 3. The Supplementary Specification for this Asset Type,
- 4. The Operating and Maintenance Manuals (where applicable) for this Asset Type,
- 5. Relevant Inspection Check sheets for this Asset Type,
- 6. The Maintenance Control Plan per Health Facility,
- 7. All relevant SANS Standards and Legislation that is referred to in the above listed documents, and
- 8. All relevant drawings forming part of this Contract.

The main mechanical and electrical sections of a facility with their subsections as set out in the Service Information and in the Price List will each be deemed "an installation". Maintenance, as specified, will be applicable to all these installations.

All Contractors are to undergo an approximately three-hour long Contractor's induction process before being allowed to work at any of the sites. This induction shall cover the General Rules for Contractors on Site, the penalty system applicable to this Contract, as well as the minimum work quality standards for the work to be done on site.

Major equipment replacement, major upgrades and/or redesigned functionality will be handled outside of this Contract via a separate projects program, and are therefore not part of this Contract. The maintenance and repair work phase will run parallel to each other at the same time.

#### **GM 2 MAINTENANCE REQUIREMENTS**

- i The Contractor will adhere to the Task Order and when completed, contact the Service Manager for formal approval and signing off, of the Task Order. The Engineering Representative will assist the Service Manager in verifying completed work.
- ii The Contractor is expected to be fully aware of his obligations in so far as this Contract is concerned and he shall attend to the maintenance procedure within the time limits specified for each class of maintenance procedure.
- iii The completed Task Order will be returned to the Service Manager, who will forward it to the Call Centre to log the completed Task Order into the system. When the completed Task Order is logged into the system the job will be closed.
- iv When a maintenance procedure cannot be completed within the specified downtime the Contractor should apply in writing to the Service Manager for an extension of time with reasons for the delay. This application should be submitted as soon as the details of the maintenance procedure and availability of spare parts are known.
- v The Call Centre Manager will submit a weekly response performance report to the Service Manager, who will make a decision on the implementation of penalties which will depend on the nature of each breakdown, as well as valid claims in delays received from the Contractor. The recorded report date and time as well as the recorded completion date and time will be regarded as sufficient and final proof for the proper administration of this aspect of the Contract.

#### GM 2.2 SERVICE MANAGER

Eastern Cape Department of Health's agent will be appointed as **Service Manager** (Project Manager) to manage and administrate all work and financial aspects related to this particular bid. He/she will be supported on the ground by an Engineering Representative to verify workmanship and compliance of completed activities to Contract requirements. The Service Manager will be responsible for the following:

- i Perform duties as per the NEC3 Term Services Contract Standard Clauses;
- i Ensure that either he/she, or the Facility Specific Site Representative, visit the Facility and compile reports on the status of the Facility infrastructure that forms part of this bid;
- ii Liaise with the Call Centre and check on call outs;
- iii Determine routine maintenance work to be done, and issue Task Orders for routine maintenance and repairs/refurbishment/upgrades (that was accepted by the Employer), to the relevant Contractor;
- iv Consult and co-ordinate with the Program Lead Consulting Engineer as needed on specific maintenance aspects, designs and specifications to be done;
- v Assess the completed work for the assessment period, consider the payment applications lodged by the Contractor during this period, Certify the payment due, and issue a Payment Certificate for the accepted work as per the Standard Contract clauses;
- vi Monitor the logging of regular maintenance work done;
- vii Prepare reports on maintenance and repair work done;
- viii Liaise with the hospital Site Representative regarding all work to be done on this asset type at the facility;
- ix Liaise with management of the facility;
- x Obtain approvals from the Employer where required for

#### GM 2.3 CONTRACTOR'S RESPONSIBILITIES

The Contractor shall maintain the complete installation as specified in the **Service Information** for the full Contract period subject to the agreed repairs and performance criteria.

Maintenance implies and shall include routine preventative maintenance on a schedule as approved by the Service Manager, corrective maintenance, as well as breakdown Statumaintenances all components of the specified installation.

The Contractor shall be responsible to perform all tasks as specified in this specification, subject to the requirements of the NEC3 Term Service Contract Standard Clauses. In addition, the Contractor must:

- 1. Record work done, performance indicators, defects identified and/or corrected, and spares used;
- 2. Obtain work done sign-off on site as well as from the Engineering Representative;
- 3. Submit completed Task Orders and invoices to the Service Manager;
- 4. Attend scheduled project meetings with the Service Manager.

The Contractor shall, as part of his maintenance responsibilities repair or replace faulty equipment upon logging of a breakdown, within the down-time as defined in Paragraph GM 7, and against the Tendered rates as provided for in the Price List, and within the down-time as specified in the applicable Task Order. In the event of any repair item for which a rate is not available in the Price List, the rate as specified in the Task Order will apply.

#### **GM 2.4 TASK ORDERS**

All works required to be done by the Contractor will be instructed by issuing of a **Task Order** by the **Service Manager**. No Works shall be conducted without a Task Order.

The Call Centre may issue breakdown and defects correction/repair Task Orders to the Contractor at any time during the Service Period, but they must all be copied to the Service Manager. The time for the completion of the Breakdown Task Order will be as per the allowable response times in Table 1 in Section GM 7.

If the exact nature and possible cost of rectifying a breakdown is not known when the Breakdown Task Order is issued to the Contractor, the task order will be issued with provisional information and costs estimates. The Contractor shall respond to such a Breakdown Task Order by traveling to the site to evaluate the breakdown (scope of repair work), estimate the realistic cost as well as downtime and provide feedback to the Service Manager to form the basis of the revised Task Order.

Should the Contractor not be able to complete the Breakdown Task Order within the agreed and approved time for completion, it shall be the Contractor's responsibility to obtain an extension of time from the Call Centre Manager. The written report shall clearly state the reasons for requiring the extension, as well as the actual extension period required.

Should the actual time for completion of the Breakdown Task Order exceed the agreed time allowed, including any extension of time, the Contractor shall be liable for damages at the rate stated in the Task Order.

The Service Manager will issue Task Orders for the routine maintenance services, and approved repair/upgrade work once the Maintenance Control Plan has been approved and updated with the relevant information from the Repair Schedule as per GM 3.

Routine maintenance, approved repairs and breakdown repairs will all be done parallel to each other on the equipment as per the Maintenance Control Plan and Call Centre priorities.

#### **GM 2.5 FUNCTIONAL CONDITION ASSESSMENT**

Immediately after handing over of the site, and having attended the Contractor's Induction Training Session, the Contractor shall start with a **detailed functional test and condition assessment process** of the specified installation/equipment at each Health Facility and **submit a detailed report** to the Service Manager regarding the functionality, performance and condition of the equipment. It is this Contract's intention that this task be completed within **two weeks** of each site handover to the Contractor, but the Service Manager will arrange and agree specific deliverable dates for each Health Facility with the Contractor in this regard as part of the Contractor's Maintenance Control Plan.

The following work shall be carried out during the time allowed for the execution of the Functional Condition Assessment:

- Verify the Asset Data from the Asset Inventory List in C4.1, obtain the additional asset information that might be required for a specific piece of equipment, and update the Inventory of Mechanical and Electrical Equipment for each Health Facility with make and model numbers, capacities and general condition, year of manufacture (age), additional equipment to be added to the list, and equipment to be deleted from the list (i.e. equipment not on site anymore), etc., as per the fields provided in the format provided by the Service Manager after Contract award.
- ii **Prepare a clear A4 size line drawing** of the building/ward/room in which the plant is installed, typically as per one of the two examples below, and show positions of the equipment schematically on this drawing. Please provide basic information regarding the general condition of the room/facility/building where the asset is located (this will assist to provide information to the facility repair teams), next to, or below the line drawing;

One line drawing per location per Health Facility must be provided and can be hand drawn, provided that the drawing is clear, neat and all info is readable. Where applicable the position of the equipment on the walls must be shown (i.e. laundry equipment).

- i Record the number/name of each piece of equipment on the line drawing. If no name/number exists on the equipment itself, allocate a descriptive number (i.e. Washer) and mark this on the equipment with a black permanent marker pen. Reference shall be made to this ID number in the defects listed in the Repair Schedules for each item of equipment to identify the equipment accurately.
- ii **Verify what spare parts (if any) are available** on site for the equipment covered by the Contract, as well as the condition there-off;
- iii **Compile a Priced Spare Part List,** (based on the Contractor's cost price for the spares) for the relevant spare parts required for a repair of all the types of equipment listed in the Asset Inventory, and indicate on this list what spares should be kept in stock on site for use by the site maintenance staff. The Employer however retains the right to negotiate the offered spare part prices with like type spares prices solicited through the Tender process, if they are not in line with national price norms.
- iv **Inspect the condition and test the functionality** of all components of the installation to confirm the extent of the repair work required (if any). If the equipment is not in an operable state record this and proceed with item 7 below;
- v Verify if the equipment meets current standard technical specifications for the specific application (for example: a split system air conditioner may be functionally good and serviceable, but does not meet the criteria to operate inside Statutory Inspection (Agrerating theatre or infection control area). Advise on an alternative if

- applicable. Please consult the Facility Manager when doing the assessment to get information regarding any issues that they are experiencing with the equipment.
- vi **Verify the estimated remaining service life** for the equipment based on the equipment's age and current condition. If the equipment is old and in a bad state it might be more cost effective to replace the unit rather than rebuilding it. Please advise in this regard;
- vii Should it be impossible to determine the details of the defect without dismantling the machine/equipment item, the Contractor shall nevertheless prepare an estimate with a cost breakdown for repairs he/she anticipates will be needed. After a written instruction has been received to repair the machine/equipment item, the final cost will be determined after the machine/equipment item has been dismantled for repairs. **Equipment shall not be dismantled for inspections during the equipment functional condition assessment period.**
- viii Compile a detailed Repair Schedule for each separate equipment unit (machine). This Repair Schedule will consist out of a clear identification of the equipment unit, a detailed description of what is wrong with the equipment unit, a detailed repair or replacement method statement (and explanation on why it is recommended that the unit be replaced if applicable), and an accurate detailed quote, with estimated lead times and a high-level project plan to enable the work to proceed if the approval to do so is granted by the Service Manager via a Task Order. (See GM 2.8 for the rates requirements)
- ix The Employer does not guarantee that any, or all, of the repairs/replacements recommended via the repair schedules, will be accepted for implementation by the Contractor. Accepted Repair Schedules will however become part of the Final Maintenance Control Plan once approved by the Employer, and will then be included in the work scheduled for this Contract. Depending on the cost and complexity, equipment replacement recommendations might be
  - transferred to the Repair Project Work Stream of the Employer's Mechanical and Electrical Equipment Repair Programme.
- x Compare the identified defects of each item of equipment with the components already included under the standard minor and major services scopes in the Contract Price List, and remove costing for these from the repair requirements. Include all identified defects into the Functional Condition Assessment Report, but only price the defects not covered by the standard servicing scope of works. (See GM 3.2 (3) for costing of the standard services)
- xi Where applicable, **obtain copies of Statutory Inspection and Test Reports** from the Health Facility (if available) and attach these to the Defects Inspection Report.
- xii **Submit the detailed Functional Condition Assessment Report** to the Services Manager who shall thereafter demarcate any areas to be repaired and forward this information to the Contractor. Once approval is granted, the Service Manager will instruct the Contractor about the repair work to be done.

#### GM 2.6 FUNCTIONAL CONDITION ASSESSMENT REPORT

A Functional Condition Assessment Report must be compiled for each Health Facility, and shall contain the following:

- 1. The updated Asset Inventory List (both hard and electronic copies) completed in the Excel Format provided by the Service Manager after Contract Award;
- 2. Clear location identifiable layout line drawings of the equipment, with ID numbers and brief room/facility/building condition description as per GM 2.5 (2)
- 3. A list of spare parts, and their condition, that is currently available on site;
- 4. A priced spare part list of the typical spare parts that might be needed to do repairs on the equipment if it should breakdown or fail. The Contractor must also indicate on this spare part price list which consumable spare parts (i.e. fan belts, filters, oil, fuses, light globes, etc.) that can be replaced by the site maintenance staff, should be kept in stock at the Health Facility;
- 5. A summary of the equipment per Health Facility indicating: i

## Condition;

- ii If the equipment meets current technical specifications;
- iii Estimated remaining Service life before replacement will be due; and
- iv Recommended work to be done (i.e. service only, minor repairs required, major repairs required, replacement or upgrade recommended).
- 6. A Repair Schedule for each repair that is required. This information will be used to populate the Task Orders for accepted repairs, or feed the Tender document information in case it is moved to the Project Work Stream;
- 7. A description of the defect for which repair work is not easily identifiable with an estimate of the final cost for repairs. This item will typically apply to breakdowns or defects where the machine or equipment must be de-commissioned and at least partially dismantled before the extent of the work can be fully established;
- 8. Compile a list of equipment for which a Statutory Inspection and Test is, or will become due during the Contract period. Copies of previous Inspection and Test Certificates to be attached to the report (if available).

Should the Contractor not be able to complete the Functional Condition Assessment Report within the period as specified GM 2.5, it shall be his responsibility to obtain extension of the Functional Condition Assessment period from the Service Manager. The written report shall clearly state the reasons for the extension, as well as the actual extension required. An extension of time shall only be considered by the Service Manager if the Engineering Representative believes the Contractor has carried out the already completed portion of the report with the due diligence and attention to detail.

Should the actual time for the completion of the report exceed the specified time for completion, including any extension granted, the Contractor shall be liable to a payment reduction for the difference between actual and approved completion periods. The value of the payment reduction for each health facility shall be as specified in Section X18 of the Secondary Options Clauses of the Contract.

After the repair phase work and costs have been accepted, the Contractor shall commence with the known and approved repair work only after site access for repair work has been approved and the Task Order issued. The Contractor shall complete the work within the period allowed for the repair work as specified in the applicable Task Order.

#### GM 2.7. OPERATING AND MAINTENANCE MANUALS

The Contractor shall, where specified, and as part of the repairs to each installation, compile and submit a comprehensive Operating and Maintenance Manual based on the Original Equipment Manufacturer's requirements. The Contractor shall ensure through training that the operating and maintenance personnel of the Health Facility are conversant with the instructions as presented in the Operating and Maintenance Manual, as per SS 8 and SS 9.

The Operating and Maintenance Manual, as accepted by the Service Manager, shall be used as a basis for preventative maintenance. The Contractor shall perform all preventative and corrective maintenance as described in the Operating and Maintenance Manual. This shall be in accordance with the Standard and Supplementary Specifications.

The Operating and Maintenance manuals must be based on the updated Inventory of Equipment (C4.1) data after completion of the Functional Condition Assessment, and shall be updated with respect to Make, Model Number, Capacity and any other relevant data.

The Contractor must provide three (3) sets of each required Operating and Maintenance Manual as follows:

- One set to be installed at a suitable position on a short chain, against a wall in the room/area where the equipment is located, or as otherwise instructed by the Service Manager for outside and spread out equipment;
- ii Two sets to the Services Manager.

The Operating and Maintenance Manuals must be delivered as soon as possible after the Functional Condition Assessment Report has been completed. Also see Section GM 3.3 (15).

Where several of the same equipment is in the same room/area, only one set of three Operating and Maintenance Manuals is required. If the same equipment is spread out throughout the health facility the Contractor must install one Operating and Maintenance Manual near each one, or group of the equipment unless otherwise instructed by the Service Manager. This does not apply to equipment like split air conditioners, etc. for which only one set of three Operating and Maintenance Manuals per make and model will be required. The Service manager will instruct the Contractor where to install the chained Operating and Maintenance Manual for equipment like air conditioners.

The Contractor will be required to install several Document Consoles (storage and writing platform units) with sleeve anchors or bolts, into the walls at different locations of each Health Facility, to secure and store the chained manuals and maintenance logs. A Provisional sum will be included for this in the Price List.

#### **GM 2.8. RATES**

Scheduled work is all planned routine servicing of the equipment at the all-inclusive Contracted Rates contained in Schedule 3 of the Contract. Unscheduled work is all repairs, breakdowns, special maintenance activities, special tests and/or replacement tasks, that is ordered via a Task Order by the Service Manager, in addition to the scheduled work. Payment for this work will be based on the Contracted Rates from Schedule 4.

Where no rates exist in the Contract, the itemized breakdown shall be accompanied by documentary proof from the Supplier, Manufacturer, Engineering Works, etc., where materials were bought or Statutory Inspection List

services out-sourced from. The Employer however retains the right to verify and test these rates against the market.

The Contractor shall submit quotes for all Unscheduled work with an itemized breakdown of the total cost involved for acceptance by the Service Manager, in a quotation as detailed below:

#### **GM 2.8.1 MATERIALS AND OUTSOURCED SERVICES**

Unscheduled: List all items with quantities and rates as per

quotations or price lists obtained from suppliers or service providers (proven reasonable cost), and attach a copy of the quotation/price list to the quotation. Apply the Direct Fee Percentage (Mark-up %) to all proven reasonable material costs and outsourced services.

Direct Fee % (Mark-up %): Mark up percentage on proven cost to cover P's & G's,

overheads, profit, etc. as per Schedule 4 based on NEC3 TSC

Contract Data.

Scheduled: All materials required for Scheduled Servicing are

included into the pricing for the Service as per Schedule 3.

#### GM 2.8.2 LABOUR

Unscheduled: List time required for travelling to and back from site

(subject to conditions contained in GM 2.8.3 below), actual repair and/or replacement, testing and commissioning time of all unscheduled items at the applicable labour rates as stated in Schedule 4. No Direct Fee % will be applicable to Contracted labour

rates.

Scheduled: Cost is included in Service costs as per Schedule 3.

#### **GM 2.8.3 TRANSPORT AND ACCOMMODATION**

#### Unscheduled:

Traveling and Accommodation claims will be subject to the condition contained in GM 2.8.4 below. Travelling cost will be as per the rates for reimbursable expenses published monthly by the National Department of Public Works applicable at the time of rendering the service/repair. Allow for the actual distance travelled (and specify the reason for the traveling). All travel time and disbursements need to be supported by a Google Maps route planner printout for proof of travelling distance and time. Kilometre claims can be claimed from point of departure to destination and back, but must be linked to the indicated kilometres as per the Google Map attached and referenced to. The Contractor must submit proof of registration to verify the engine cubic capacity of the vehicle, in respect of any vehicle to be claimed for. Allow for the actual accommodation and disbursements (and specify the reason for the accommodation requirement) at the rates as per Schedule 4. **Trips must be combined with** 

Scheduled Servicing trips where possible, to minimize additional expenditure. Trips will be in accordance with the approved Maintenance Control Plan.

**GM 2.8.4** The Employer requires that the Contractor be based in a location inside the Cluster or District Area that the Contract is awarded for. The home base (departure point) must therefore be located inside the Cluster Area. If the Contractor does not have a home base in the Cluster Area, the traveling rates (for both distance and labour) will be calculated based on a location inside the Cluster which will typically be the largest Town or City located inside the Cluster or District, as may be applicable as instructed by the Service Manager.

#### **GM 2.8.5 PROVISIONAL SUMS**

It is the Employer's sole discretion to decide on spending any, all or none of the Provisional Amounts listed in the different Price List Schedules of this Contract.

#### **GM 2.9 REPAIR WORK**

#### **GM 2.9.1 Definitions**

#### 1. Defect

For this maintenance Contract, a defect shall mean a deficiency in any component of an installation which impairs the functionality of that component or equipment. Worn parts of a component which do not impair the functionality and/or performance of the component will not be regarded as a defect.

Defects may be classified in the following three groups:

#### (i) Type A defect

Those deficiencies which can be rectified by proper maintenance only, i.e. set parameters of a control system, proper lubrication, balancing, alignment, set pressures on safety valves, cleaning and de-staining, etc.

#### (ii) Type B defect

Those deficiencies which can only be rectified by replacing parts of, or the complete component as in the case of a breakdown or where a certain amount of upgrading is necessary such as the provision of anti-vibration mountings, removal of rust and re-painting, etc.

## (iii) Type C defect

Those deficiencies which are visible but which do not impair on the functionality of the installation or system yet, such as structural cracks in parts of a component, rust, bad workmanship during a previous Contract, etc.

Components in which abnormal noise and/or vibration is present shall be serviced in accordance with the Manufacturer's recommendations and if the noise and/or vibration persists, the deficiency will be classified as a defect.

## 2. Repairs

Repairs of an installation shall mean the elimination of the deficiencies classified as types B and C defects in Paragraph (1.) above.

The specific repair phase commences as indicated on the Task Order issued by the Service

Manager for each approved repair. The repairs must be completed within the period as determined by the Task Completion Date as stated in the Task Order. Delay damages for late completion will be applicable as indicated on the Task Order.

Depending on the nature of the work and availability of funds access may be given at any time during the Service Period and not necessarily directly after site hand-over.

A representative of the user department or person in charge of the plant, system or building shall endorse the schedule after completion of the maintenance or servicing procedure to the effect that the maintenance or service is, to his opinion, completed satisfactorily and shall countersign the service schedule. Where necessary the Site Representative will inspect the work done and report his findings to the Service Manager.

## GM 2.9.2 Scope of Repair Work

The repair work shall be completed within the time allowed for repairs for each installation as defined in the applicable Task Order. If the work is to be carried over two or more financial year's the work will be segmented and prioritized according to the Final Maintenance Plan. The Contractor will be informed of the work to be completed within each financial year. **The starting date for repair work for the current financial year will be the date of acceptance of the measured Price List from the Functional Condition Assessment Report.** The starting dates for subsequent years will be on 1 April of that particular year.

All repair work shall be executed using resources (labour, equipment materials and spare parts) that comply with the requirements of GM 2.11.

The said repair work shall be executed in accordance with the relevant codes of practice, standards, regulations, municipal laws and by-laws, manufacturers' specifications and codes of practice included in this specification.

#### **GM 2.10 MAINTENANCE WORK**

Maintenance work commences with the acceptance of the Tender bid and expires at the end of the Service Period. As compensation, the Contractor is paid the **remeasured** Contracted quantities, distributed in agreed intervals and amounts over the Service Period as per the Final Maintenance Control Plan, at the rate Contracted for the applicable maintenance work, subject to the requirements of GM 8.

#### **GM 2.10.1 ROUTINE PREVENTATIVE MAINTENANCE**

This entails the rendering of services and servicing of equipment according to a predetermined Maintenance Control Plan to:

- i Repair, lubricate, clean and service components of equipment, units or parts thereof for each installation at pre-scheduled intervals regardless of condition;
- ii Re-adjust, reset, clean, balance, corrosion protect all components of equipment, units or parts thereof for each installation, and
- iii Carry out all necessary and implied actions to maintain installations in a functional condition (i.e. replace or clean filters, replace or top up fluids, etc.)

Preventative maintenance shall be aimed at prevention or at least minimization of breakdowns.

#### **GM 2.10.2 CORRECTIVE MAINTENANCE**

This entails regular observation of the equipment, identifying impending breakdowns, maladjustment or anomalies of equipment, units or parts of installations and subsequent action to restore installations to a fully functional condition before a breakdown occurs.

The Maintenance Procedures for Corrective Maintenance shall be compiled by the Contractor and is included in the Maintenance Control Plan for each system or plant. Inspection items shall include, inter alia, the following:

## Checking for:

- i Unusual noise and vibration;
- ii Abnormal surface temperature of machines such as electric motors;
- iii High temperatures of equipment and wiring inside switchboards;
- iv Incorrect settings or operation of safety devices;
- v Alarm conditions of any instrument or control panel;
- vi Gas or fluid leaks from the equipment or associated piping systems.

The frequency of corrective maintenance shall be determined by the Contractor himself in line with the recommendations from the Operating and Maintenance Manuals, and actual operational environment where the equipment is operating. This may vary from once every day for high-risk, sensitive installations to once a month for low-risk installations such as exhaust fans and office air conditioners. The frequency of corrective maintenance must be accepted by the Service Manager in the Maintenance Control Plan.

#### **GM 2.10.3 BREAKDOWN MAINTENANCE**

This entails repair and/or replacement of defective equipment, units or parts of installations following a breakdown that leaves the installation inoperable or unsafe, and subsequent action to restore the installation to their normal functional condition, within the maximum down-time allowed.

Breakdown repairs will be controlled via the Call Centre and approved Breakdown Repair Task Order process as per GM 2.1. A provisional amount will be included in the Contract Price List Schedules to cover Break Down Task Order expenditure.

#### GM 2.10.4 COMMENCEMENT OF SERVICE PERIOD

The Contractor shall accept full maintenance responsibilities for each installation from the date on which the site has been handed over to the Contractor. **An annual maintenance service shall be carried out on all installations during the period in which the Defects Inspection Report is compiled, or as soon as possible thereafter.** If the current statutory compliance of a qualifying asset cannot be verified with the correct documentation of proof, a statutory inspection must be performed immediately after the first annual service has been completed.

For equipment or installations where the complete installation is shut down for the repair phase, no maintenance services will be required during the repair period.

#### GM 2.11 SUPPLY OF LABOUR, EQUIPMENT AND MATERIAL

#### 1. Labour

Only competent, qualified personnel shall be allowed to execute all maintenance work.

#### 2. Equipment

All tools, equipment and consumables required for performing maintenance work shall be supplied by the Contractor at his own cost (except where otherwise agreed to in writing and provided by the Employer). The Contractor may use already installed Employer equipment such as crawl beams and crawls, etc. provided that they obtain written approval from the site Maintenance/Technical Manager to do so. Such site approval will be based on the serviceability of the equipment, and upon confirmation of the Contractor's competency compliance in being able to use and operate this equipment during maintenance.

#### 3. Materials and Parts

All materials, spare parts, components, equipment and appurtenances necessary for the complete maintenance of each installation shall be supplied and installed by the Contractor **at the rates and quantities as instructed by the Service Manager**, after the Functional Condition Assessment Report as specified in GM 2.5 has been accepted.

Only original parts as specified by the Original Equipment Manufacturer may be used for replacement purposes. Generic or alternative parts will only be allowed if they comply fully with all the specifications of the original parts, but may only be used upon written acceptance by the Service Manager.

Substitute electronic components will be acceptable, PROVIDED that they are equal to, and

of the same quality as, or superior to, the original components and are accepted, in writing, by the Service Manager.

All parts, spares and materials which are used, shall conform to the applicable SANS Specifications and shall, where possible, carry the SANS mark of approval.

Substitute parts, as well as the serial numbers (where available) of the original and new components, shall be entered on the service sheets and in the maintenance/repair log-book.

The Contractor shall obtain, and cede any supplier's or factory guarantee of repaired or replaced components to the Employer. All workmanship, new equipment, materials, components, systems, etc. used for servicing and repairs shall be guaranteed for 12 months unless otherwise agreed to in writing with the Service Manager. The guarantee cards for repaired or replaced components or equipment shall also be attached to service sheets and the maintenance/repair log-book. New equipment and system installations will in addition to the above requirements also have a twelve (12) month defects liability period, valid from the date of successful commissioning and hand over to the Employer as acceptance by the Service Manager.

All scrapped and/or removed parts and equipment that might be installed elsewhere, or that will not be returned to service again, must remain on site after removal or disassembly of the equipment as they remain the property of the Employer. The Maintenance/Technical Manager of the facility will indicate to the Contractor where to place these items after removal. Removal of any parts and/or equipment for whatever reason from site, may only occur with the written approval to do so by the Maintenance/Technical Manager subject to the rules and regulations Statutory Inspection List

#### GM 2.12 SITE MAINTENANCE RECORD KEEPING

The Contractor shall provide and maintain hard-cover A4 size maintenance files for each installation for the duration of the Service Period. Copies of all schedules, checklists, breakdown reports, preventative maintenance records, component replacement records, service sheets, etc. shall be filed in these.

An A4 size register book shall be kept for all work performed on the equipment, to state the service technician's name, surname, date of work performed, and a short description of the work performed. This book must be installed on a short chain next to the relevant Operating and Maintenance Manual as per GM 2.7.

Copies of the site maintenance records and all service sheets, shall be submitted to the Service Manager at each monthly meeting, while copies of the service sheets must also accompany all claims and invoices.

Statutory Logbooks must be supplied and maintained on site for all statutory equipment such as pressure vessels, boilers and lifts.

#### **GM 2.13 SERVICE SHEETS**

Every service, repair, test, inspection, etc. related to the maintenance portion of the Contract, shall be fully described on a service sheet which must be completed and signed by the Contractor and attached to the Task Order when it is returned to the Service Manager. The following minimum information shall appear on service sheets:

- i The company name and address;
- ii A unique work sheet serial number:
- iii The corresponding Task Order unique number;
- iv The district and health facility names;
- v The building/area name or alternatively the building/area code;
- vi The plant identity code and description;
- vii The nature of the call, i.e. P1, P2, P3 or P4 (see GM 7);
- viii A general description of the problem or purpose of the work to be done, alternatively the complaint as received by the Call Centre;
- ix A statement as to whether the individual system is operational or not in terms of the specification;
- x Should the system not be operational (in case of a breakdown) the response time and repair time shall be recorded individually and details of a preliminary service sheet shall be forwarded to the Call Centre Manager;

- xi The description of the repairs/replacements carried out on each machine/equipment item on that specific system;
- xii A list of materials used for each machine/component. Where scheduled items are used, only the description can be listed. For non-scheduled items, a copy of the quotation must be attached to the service sheet;
- xiii A detailed report on the extent of the work done together with the total cost involved;
- xiv Suggestions to avoid similar future problems;
- xv A list of the Contractor's personnel responsible for the work with the date, starting time, completion time, distance travelled, and any accommodation and S&T costs;
- xvi Signature and name of the responsible Employer site technician/artisan/engineer and the Site Representative, confirming the work was completed to the required quality and performance standards, and that the equipment is operational again;
- xvii Signature and telephone number of the User of the equipment or the person who initiated a call or Task Order (if it was a defect, or breakdown).

Service sheets shall also be used for normal routine maintenance services and other non-maintenance activities such as training of the health facility's operating and maintenance personnel and administration duties of heads of firms when managing the Contract.

The Service sheets shall be completed in three categories as follows:

- 1. **For repairs on machines:** The same data as above must be captured with one service sheet to be completed for each repair (See below for grouping of like type equipment for servicing).
- 2. **For normal maintenance on an installation:** The same data as above must be captured with one service sheet to be completed for each service (See below for grouping of like type equipment for servicing).
- 3. **For Administration and Training:** In this case only the name of the Head of the Company is required on the service sheet with no other reference to Building- or Plant codes or machine ID numbers. A full description of the service provided must be included.

Copies of the completed Service Sheet and Task Orders must be attached to all invoices and shall be submitted to the Service Manager for discussions and acceptance.

An example of the Service Sheet is attached to the Contract Documentation as C7.

The standard requirement for normal services carried out on a specific plant is to complete one service sheet for all the equipment within any one building. This standard requirement applies to installations where all such machines can be serviced within a period of approximately five working days, but all equipment serviced must be listed on the service sheet.

For larger installations where the time required for a maintenance service is more than five working days, the machines may be grouped together to form several groups within the building with the provision that each group can be serviced within a period of approximately five working Statutory Inspection List

days. One service sheet shall be completed for each group in a building, but all equipment included in the group must be listed on the service sheet.

For smaller installations where the complete installation inside a building can be serviced in less than one working day, the installations in more than one building may be grouped together, but all the equipment covered by the service sheet must be listed.

The definition of the groups must be determined by the Contractor and clearly specified in the Maintenance Control Plan for acceptance by the Service Manager.

#### GM 2.14 VOLTAGE SURGES DUE TO LIGHTING AND OTHER CAUSES

The area in which most of the sites are situated is known for heavy lightning storms. Damage caused by voltage surges due to lightning, phase imbalance, low and high voltages, power failures, etc. will be dealt with in the same manner as any other breakdown. Contractors are advised to investigate available surge protection systems, if any, on each plant during the Functional Condition Assessment stage, and to decide for themselves whether additional protection will be required or not.

The provision of additional surge protection systems shall form part of the repair activities, if accepted by the Service Manager, and the cost thereof must be allowed for in the Functional Condition Assessment Report.

Contractors may as an alternative provide and install one or more Universal Disturbance Analysers to record any voltage surges at their own cost. Breakdowns caused by voltage surges which can be proved beyond any doubt will be dealt with in the same manner as operational damage and other normal breakdowns.

#### GM 2.15 SHEQ: SAFETY, HEALTH, ENVIRONMENTAL AND QUALITY

The Contractor must comply with all the Safety, Health, Environmental and Quality requirements as per C3.2 and GM 3.1, and must provide pricing to cover all the applicable requirements under this specification. The Contractor must take note of any specific Safety, Health and/or Environmental risks that might be highlighted in section SS 13.

#### **GM 2.16 HIV / AIDS AWARENESS**

The Contractor must comply with all the requirements as per C3.3, and must provide pricing to cover all the applicable requirements under this specification.

## **GM 3 MAINTENANCE CONTROL PLAN**

The Contractor is responsible to compile a detailed Preliminary Maintenance Control Plan (Annexure I) as per GM 3.2 which he need to submit with his Tender Bid. This plan must contain the details of what maintenance will be done (itemized), how often, what resources will be involved, what spares and consumables will be used, how long it will take to perform the work, and the cost breakdown per service for a specific Asset Type. The Service Manager gave service interval recommendations in Schedule 3, but the Contractor can recommend alternative intervals for consideration and approval by the Service Manager.

After Contract Award the Contractor will be required to expand the Preliminary Maintenance Control Plan to a Health Facility specific plan for each asset type with the assistance of the Service Manager Inspection List

## **GM 3.1 WORK QUALITY**

Maintenance quality control shall be the responsibility of the Contractor who shall introduce a Maintenance Control Plan to assist him in ensuring that all preventative, corrective and breakdown maintenance is performed as described in the Service Information. The Contractor will be responsible to correct any sub-standard work that is discovered after the Contractor has done his work. The rework will be for the Contractor's own account and must be signed off by the Site Representative after completion.

If the Contractor fails to remedy any sub-standard work within the time frame stipulated by the Service Manager, the Service Manager may at his/her discretion appoint another Contractor to execute the repair work. In this case, the replacement Contractor will be paid with the funds that were earmarked for the first Contractor to do the work, and the first Contractor will not be paid for that specific work.

#### GM 3.2 PRELIMINARY MAINTENANCE CONTROL PLAN

A preliminary version of the Maintenance Control Plan, based on the Asset Inventory Data, must be submitted with the Contractor's Tender bid. This plan is a high-level plan on what maintenance tasks the Contractor will be performing on all the equipment across all Health Facilities covered by the Contract and must be completed on the forms of Annexure I. The information from the Preliminary Maintenance Control Plan will be expanded into that of the final Maintenance Control Plan as specified in Section GM 3.3 below. Details contained in this preliminary Maintenance Control Plan shall include:

- 1. A Maintenance Schedule containing all the different tasks that will be performed on all the equipment covered by this Contract, and captured on the **Preliminary Annual Equipment Maintenance Schedule** Form contained in Annexure I.
- 2. A brief Capacity Statement where the Contractor describes his company's capacity and experience that will be applicable to this Contract. This must include a description and location of his home base (workshop/home/bakkie based, number of staff with qualifications and experience, what staff and/or Sub-Contractors will be used to support on the Contract, available tools and/or specialized equipment, transport capacity and where staff will be based, as well as capacity/ability to repair defective equipment (i.e. overhauling a pump or compressor);
- 3. A detailed **Maintenance Task Planning Sheet** (See Annexure I) for each of the Minor, Major, and other, service activities priced in the Price List. This Maintenance Task Planning Sheet will describe the pricing and details of scheduled maintenance activities to be performed during services conducted as per the recommendations of the **Preliminary Annual Equipment Maintenance Schedule**, and will also be used to populate the respective Task Order. These prices must be all inclusive and must include all labour, service parts, lubricants and consumables, special equipment (if required), accommodation (if applicable) and any travelling and subsistence costs, etc. that might be applicable to do the service. The service price must indicate clearly if more than one piece of

equipment will be combined for servicing during a single trip to avoid double payment for Travel and Subsistence related payments by the Employer.

- 4. The service methodology;
- 5. Preliminary grouping of equipment for maintenance purposes as per GM 2.13 (if applicable);
- 6. A breakdown of which sub-Contractors will be used (as per T2.2c), and for what activities, by the Contractor in rendering the services required by this Contract **Sub-Contractors must also be registered on the Treasury Central Supplier Database**;

#### **GM 3.3 MAINTENANCE CONTROL PLAN**

One Maintenance Control Plan must be compiled for each Health Facility covered by the Contract. The Maintenance Control Plan shall be based on the Contractor's Preliminary Maintenance Control Plan information, and updated with the findings and data from the Functional Condition Assessment process. The Maintenance Control Plan shall be bound in a neat, A4 sized, ring bound document with a cover page and back cover and an original copy

presented to the Service Manager. The contents of the document shall be indexed.

The Maintenance Control Plan will become the main plan for all work to be done under this Contract, as per the Main Contract Clauses, after the Contract has been awarded.

When the documents are compiled, the Contractor may reproduce relevant paragraphs from any of the specifications forming part of the Contract documents, or Operating and Maintenance Manuals, but should there be any discrepancies between such paragraphs and paragraphs in the Maintenance Control Plan and those in the Contract documents, those in the Contract documents shall be regarded as being correct and shall apply.

The Maintenance Control Plan shall also contain the following in addition to the items listed in Section GM 3.2:

- 1. Detailed Maintenance Schedule per equipment type, per Health Facility on the **Annual Equipment Maintenance Schedule Asset Specific** Form;
- 2. Remeasured service quantities for the routine services of Schedule 3 in the Price List, based on actual equipment condition and the ability to perform a service on them or not in their current condition. **The** 
  - Contractual payments will be based on these remeasured quantities, accepted by the Service Manager, and not on the original Tendered quantities which might have been based on incorrect information at the time;
- 3. A risk register containing all the foreseen risks that can have an impact on the cost and/or deliverables of this Contract as per the NEC3 Term Service Contract Standard Contract Clauses numbers 11.2(14), 16.1, and 16.4;
- 4. A summary of the repair and maintenance work to be carried out in terms of the Contract giving details of the conditions of the various installations at the facility affected by the activities under the Contract.

- 5. Details of how the Contractor intends to carry out the various types of maintenance work especially breakdown maintenance should breakdowns occur.
- 6. Details of the procedures agreed upon between the Service Manager and the Contractor on how breakdown calls will be handled (Call Centre process).
- 7. A list of organisations and persons directly involved with the Contract or whose requirements must be considered during the entire Service Period. Each person's position within his organisation as well as the applicable phone numbers shall be given. (See T2.2c)
- 8. Details of monthly meetings (dates, times and venues) to be held between the Contractor, Employer Representative and Site Representative.
- 9. Service Sheets and Reports to be submitted after every routine inspection (a copy of all reports, checklists, breakdown records, etc. for each system of an installation shall be kept on the site in a hardcover file);
- 10. A priced spare parts list for relevant spares that might be required for repairs and/or breakdowns for each equipment type. The Employer retains the right to negotiate the listed prices based on price comparisons with like type spares prices solicited through the Tender process;
- 11. A recommended spares list for items that should be held in stock at the facility;
- 12. Copies of the Repair Schedules from the Functional Condition Assessment process that has been approved to proceed;
- 13. An updated Cost Forecast of the estimated final total of the Prices for the whole of the services in consultation with the Service Manager at intervals as stated in the Contract Data Clause 20.5;
- 14. Procedures to address complaints and logged breakdowns.
- 15. Details of reports in electronic format, summarizing all inspections, together with inspection data such as nature of test, names of persons carrying out tests and inspection results. Detail of repairs and replacements, together with testing of repaired equipment shall also be reflected in this report, and shall be obtained from the service sheets.
- 16. Assistance to be given to the Service Manager and Engineering Representative with decisions regarding material, equipment and other recommendations.
- 17. An updated list of the inventory of equipment complete with the ID number (if available), make and model number, serial number, year of manufacture/age and capacity.
- 18. The Maintenance Control Plan shall be upgraded when its contents are no longer representative of actual conditions.

- 19. The Contractor shall check the contents of existing Operating and Maintenance Manuals (if available) and shall update or modify them and then incorporate applicable data into his own manuals. Where no manuals exist, the Contractor shall draw up his own Operating and Maintenance Manuals based on the OEM Operating and Maintenance manuals as per the requirements of GM 2.7.
- 20. The way maintenance data as recorded on service sheets will be captured and processed for submission to the Services Manager, for invoicing, and as part of the maintenance report. Pertinent data contained in the Operating and Maintenance Manuals may be transferred to the Maintenance Control Plan to make it a document which can be used as an independent handbook for maintenance work in future.

#### **GM4 COMMUNICATION**

The Maintenance Control Plan (Paragraph GM 3.3) will provide, after agreement between the Contractor and the Service Manager, with the assistance of the Site Representative, for the following communication procedure to be implemented:

- 1. The Contractor shall establish a telephone and fax line and a cellular telephone connection to ensure that he can be reached at any time.
- 2. Should the Service Manager determine or suspect that preventative, corrective or breakdown maintenance is required, a call shall be logged through any communication channel available to reach the Contractor as soon as possible. This will be followed up with a Task Order.
- 3. Maximum down times will be as described in Paragraph GM 7.
- 4. All breakdown calls from the Health Facility will be reported to the Call Centre who will follow the procedure as detailed in Section GM 2.1.

#### GM 5 PERFORMANCE MEASUREMENT

The Contractor's performance shall be measured against the criteria specified in Section X20 of the Secondary Options Clauses of the Contract and C1.2b Annexure CD.

Poor performance by the Contractor will lead to penalties being imposed by the Service Manager as per X17 and C1.2b Annexure CD, and can lead to early termination of the Contract.

## GM 6 SPECIAL TESTING OF AN INSTALLATION

An amount has been allowed in the Price List to cover the cost of additional tests that the Service Manager may request at his own discretion from time to time on the equipment and installations covered by this Contract. The Service Manager will have the sole authority to spend the amount or part thereof under sub-paragraph.

The Service Manager reserves the right to select, at random, component equipment and trade practices to be tested by the Contractor or independent authorities for compliance with specifications as specified in this Contract document.

The Contractor shall provide all equipment, tools and instruments required for such testing.

The Service Manager shall upon completion of the tests or inspections issue an inspection report including any corrective actions (if any) to be taken by the Contractor.

The Contracted markup percentage will be paid to the Contractor on the value of each payment made to the approved testing authority if any special testing is ordered by the Service Manager.

#### GM 7 MAXIMUM MAINTENANCE DOWN-TIME

After a breakdown, defect or complaint has been logged the Contractor will be expected to remedy the defect in the system/component with as little delay as possible, notwithstanding the maximum down-time allowed and listed in the following paragraphs or as stipulated in the Task Order. Should the Contractor not respond within the maximum down-time, the Service Manager may arrange, at the cost of the Contractor, for the necessary repair work to be done by others.

The Contractor shall respond to a breakdown registration by traveling to the site to evaluate the breakdown (scope of repair work), estimate the realistic cost as well as downtime and provide feedback to the Service Manager and Site Representative to form the basis of a Task Order.

Should the Contractor not be able to complete the required repair work within the maximum down-time period allowed, it shall be his responsibility to obtain extension of down-time from the Service Manager. The written report shall clearly state the reasons for the extension, as well as the actual extension required.

Extension of down-time will only be granted by the Service Manager if:

- 1. The maximum down-time is unreasonable in relation to the scope of the repair work required.
- 2. The delivery time of a new component/subassembly/machine or spares required for the repair of the defective component/subassembly does not enable the Contractor to successfully complete the repair work within the maximum breakdown down-time allowed.

Should the actual down-time exceed the maximum down-time, the Contractor shall be penalized as per X17 and C1.2b Annexure CD.

PRIORITY	DESCRIPTION	RESPONSE
P1	Emergency (Life Threatening)	Immediate response from the time of logging a call and the emergency to be resolved (at least temporarily) within 8 hours
P2	Urgent	Immediate response from the time of logging a call and to be resolved within 12 hours
Р3	Planned Maintenance Repairs	Scheduled Maintenance is to be scheduled and performed within 3 business days of the scheduled date
P4	Emergency Facility Repairs	7 Days planning and Pg.

<u>.</u>
execution
subject to supply chain
regulations

**Table 1:** Maximum allowable response times

"Maximum down-time" shall mean the period of time allowed to repair a breakdown, and "actual down-time" shall mean the measured period from the instant when the breakdown was reported or located until the installation has been repaired to its functional specification.

A guideline classification for typical P1, P2, P3 and P4 breakdowns for each installation are specified in the Supplementary Specification for each asset type.

The job card (Task Order) issued for the repair will state whether the repair is regarded as P1, P2, P3 or P4 and it will be required of the Contractor to react accordingly.

#### **GM 8 MEASUREMENT AND PAYMENT**

Measurement and payment will be done as per the Secondary Options Clauses of the Contract. See X1, X13, X17, X18, X19 and X20, supplemented by C1.2b Annexure CD

## **C3.6: HEALTH AND SAFETY SPECIFICATION**

PROJECT NAME	SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED EQUIPMENT AT CLUSTER ONE (1) - OR TAMBO AND ALFRED NZO DISTRICT - HEALTH FACILITIES
TENDER NO.	SCMU3-23/24-0785-HO

ANNEXURE A - Close Out Report

ANNEXURE B - Non-Conformance Report

ANNEXURE C - Monthly OHS Report

ANNEXURE D - Risk Assessment

ANNEXURE E - Guidelines to Health and Safety Bill of Quantities

ANNEXURE F - Safety Specification and Baseline Risk Assessment Issue Register

- 1.1 The Construction Regulations No. 37305 of 7th February 2014 requires the Client to prepare a Health and Safety Specification, with all existing risks identified.
- 1.2 The Eastern Cape Department of Health (ECDoH) is tasked to provide Healthcare operational facilities across the Eastern Cape.
- 1.3 The ECDoH has a responsibility to limit its risk by ensuring a zero tolerance and best practice approach to Contractors and those affiliated to a construction project. Thus, a high premium is placed on the health and safety (H&S) of ECDoH stakeholders, which include its employees, professional service providers, public and its physical assets.
- 1.4 The responsibilities that the Department and relevant stakeholders have toward its employees are captured in, but not limited to this document. The responsibilities stem from both moral, civil and a variety of legal obligations.
- 1.5 The Principal Contractor is to take due cognizance of the above statement.
- 1.6 The ECDoH, as the Client shall provide a project specific Health & Safety Specification (PSHSS) for the project and provide the Principal Contractor/s making a bid or appointed to perform maintenance work for the project, or parts thereof such documentation.
- 1.7 This Health and Safety Specification complies with the Occupational Health and Safety Act No. 85 of 1993 and the Construction Regulations of February 2014.
- 1.8 This Health and Safety Specification is to be used as a management tool to comply with the Occupational Health and Safety Act and its Regulations.

#### 4. DEFINITIONS

The definitions used will be those set out in the Regulation Gazette N0 37305 of 7<sup>th</sup> February 2014 with the following additions:

## 4.1 Client:

The Superintendent General, Department of Health of the Province of the Eastern Cape.

## 4.2 **Hazard:**

Source of exposure to danger.

## 4.3 <u>Hazard Identification and Risk Assessment (HIRA) and Risk Control:</u>

Means a documented plan, which identifies hazards, assesses the risks and details the control measures and safe working procedures which are to be used to mitigate and control the occurrence of hazards and risks during construction or operation phases.

## 4.4 Health and Safety Agent:

Means any person who acts as a representative for the Client in managing the overall health and safety work as their responsible person.

## 4.5 Health and Safety Plan:

Means a documented plan which answers to the Project Specific Health and Safety Specification; including all the supporting documentation that indicate how the Principal Contractor or Contractor plans to manage H&S for the duration of the Contract.

## 4.6 **Induction Training:**

Means once off introductory training on general health and safety issues given to all employees and visitors to the site before commencement of work on site.

#### 4.7 Risk:

Means the probability or likelihood that a hazard can result in injury or damage.

## 4.8 Regulation/s:

Shall mean the relevant regulation/s promulgated in terms of the Occupational Health and Safety Act, No. 85 of 1993 and the Construction Regulations No. 3705 of 7<sup>th</sup> February 2014.

## 4.9 **Site:**

Means the area in the possession of the Principal Contractor for the construction of the works. Where there is no demarcated boundary it will include all adjacent areas, which are reasonably required for the activities for the Principal Contractor and approved for such use by the Designer.

4.10 The Act: 203

Means, unless the context indicates otherwise, the Occupational Health and Safety Act, No. 85 of 1993 and Regulations promulgated thereunder, as amended.

## 5. KEY REFERENCES

- 5.1 Occupational Health and Safety Act No. 85 of 1993 and Regulations (as amended).
- 5.2 Compensation for Injury and Occupational Diseases Act No. 100 of 1993 (as amended)
- 5.3 The Preferential Procurement Policy Framework Act 2000 and the Preferential Procurement Regulations 2017, the General Conditions of Contract (GCC)
- 5.4 Construction Regulations No. 37305 of 7<sup>th</sup> February 2014
- 5.5 SANS Code 10400 and others that are applicable.

## 6. PURPOSE OF THE PROJECT SPECIFIC HEALTH AND SAFETY SPECIFICATION (PSHSS)

- 6.1 The PSHSS is a performance specification to ensure that the Client and any bodies that enter into formal agreements with the Client Viz. Professional Service Provider and the Principal Contractors achieve an acceptable level of OHS performance.
- 6.2 To assist in achieving compliances with the Occupational Health and Safety Act No. 85 of 1993 and its applicable legislation to, as far as is practical, reduce or eliminate incidents or injuries.
- 6.3 No advice, approval of any document required by the PSHSS, such as hazard identification and risk assessments, or any other form of communication from the Client shall be construed as acceptance by the Client of any obligation that absolves the Principal Contractor from achieving the required level of performance and compliance with legal requirements.
- 6.4 Furthermore, there is no acceptance of liability by the Client, which may result from the Principal Contractor failing to comply with the PSHSS, i.e. the Principal Contractor remains responsible for achieving the required performance levels.
- 6.5 A Mandatary Agreement in terms of Section 37.2 of the OHSA will be signed between parties prior to any works commencing.
- 6.6 The PSHSS highlights the aspects to be implemented over and above the minimum requirements of current legislation.
- 6.7 Requirements may be changed should new risks or issues are identified that could not have been foreseen during the design phase of the project, or during the construction phase. Any new legislation or standards (legislated or determined by the (ECDoH) that are promulgated or accepted during the contract will automatically be applied.
- 6.8 Environmental management shall receive due attention as per the requirements of the Environmental Management Act.
- 6.9 The Contractor shall use this Specification as a basis for the drafting of his and any Subcontractors'

204

Health and Safety Plans.

- 6.10 The Specification sets out the requirements to be followed by all Contractors so that the Health and Safety of all persons who may be affected by the Project will receive proper priority.
- 6.11 The Project Specific Risks that have been identified have been tabulated in Section 18 of this Specification.

# 7. IMPLEMENTATION OF THE PROJECT SPECIFIC OCCUPATIONAL HEALTH AND SAFETY SPECIFICATIONS (PSHSS)

- 7.1. The project specific H&S specification (PSHSS) forms an integral part of the Contract, and PC is required to make it an integral part of their Contracts with Contractors and Suppliers.
- 7.2. A PSHSS will be available for each level of Contract and Contractor and must be complied with.
- 7.3. This specification must be read in conjunction with the OHSA, Regulations thereto (as amended) and any other standards relating to work being done and ensure compliance thereto.
- 7.4. The information relative to the scope of the project, the works etc. are detailed in the tender, are to be considered when developing the H&S plan and associated documentation.
- 7.5. The summary of risks is included in Section 18 of the PSHSS.
- 7.6. The OHSA S.37.2 Mandatory Agreement must be fully completed by the PC, supplied by the Client.
- 7.7. No work may commence without written approval of the H&S plan by the client of client's Agent.
- 7.8. Should there be any changes in the contract, or change in the scope of works, an amended PSHSS may be issued.
  - a) Where amended PSHSSs are issued, the PC will be required to ensure a resubmission of an amended H&S plan for approval.
  - b) Further to this, the PC must ensure that similar information must be provided as it applies to the works to all their Contractors, within 5 working days following notification thereof of such changes.
- 7.9. The Client will visit the project as deemed necessary to ensure compliance and limit risk.
  - a) All activities on the site and all appropriate documentation will be monitored.
- 7.10. Non-conformances will be issued and penalties or work stoppage will be issued where appropriate.
- 7.11. The Contractor must forward a copy of the Health and Safety plan to all Subcontractors to enable them to prepare their own Health and Safety plans.

#### 8. APPLICATION

- 8.1. This Specification is a compliance document drawn up in terms of the Occupational Health and Safety Act No. 85 of 1993, and the Construction Regulations of February 2014, and is therefore binding on the Contractor as well as the Client.
- 8.2. All Contractors are to comply with the conditions of this Health and safety Specification.

- 8.3. All Direct Contractors carrying out work on behalf of the Eastern Cape Department of Health, are also required to comply with the conditions of this Health and Safety Specification.
- 8.4. All staff and representatives of, Eastern Cape Department of Health, who visit the site are required to comply with the conditions of this Health and Safety Specification.
- 8.5. Facility is also required to comply with the conditions of this Health and Safety Specification.
- 8.6. Facilities staff and everyone who visit the site is required to comply with the conditions of this Health and Safety Specification.

#### 9. REQUIREMENTS AT TENDER STAGE

## 9.1. Adequate pricing for H&S is required, and the appropriate section in the BoQ is to be completed.

a) Failure to do so could result in the Tender being regarded as non-responsive.

## 10. GENERAL REQUIREMENTS

## 10.1. Summary of Risks identified during Design.

- a) At the onset the Professional Service Provider will identify any Project Specific hazards or risks that may affect the work.
- b) These hazards or risks are listed under section 18 of this Specification.
- c) Tenderers are also advised to notify the client of any other risks or hazards that have not previously been identified.
- d) These risks are to be recorded and a recommended procedure for addressing each item agreed on and recorded.
- e) The Contractor is to conduct inspections of all tools and equipment before the commencement of the works and at least once a week during the works.
- f) The Contractor shall ensure that all Contractors and workers are informed, instructed and trained by a competent person regarding any hazards, risks and related safe work procedures as part of the Induction process before any work commences and thereafter at regular intervals as the risks change and as new risks develop.
- g) Proof of this training must be kept for inspection by the Client or Client's Representative.
- h) The Contractor shall be responsible for ensuring that all persons who could be negatively affected by the operations are informed and trained according to the hazards and risks and are conversant with the safe working procedures, control measures and other related rules (toolbox talk strategy to be implemented).
- The format used for the risk assessment must make provision for the following information;
  - Reference Number
  - Project Name
  - Identification of task assessed.
  - Date
  - Risk assessment team & designation.
  - Approval of risk assessment team.
  - Risk rating with matrix
  - Review date
  - Task steps
  - What can go wrong (Hazard)
  - The result (Risk)

- Risk rating
- Preventative Action (Control Measures)
- The format The Principal Contractor is to ensure that all Hospital Staff and Management personnel that will be affected by the works are fully informed of the risks and hazards associated with the works

#### 10.2 Specified Hazardous Chemical Substances

- a) Where the PC is likely to supply the product as the product has not been specified, safety data sheets (SDSs) need to be considered prior to all selections.
- b) Hazardous and potential situations

The Principal Contractor shall immediately notify other Subcontractors as well as the Client of any hazardous or potentially hazardous situations that may arise during performance of construction activities.

#### 11. OCCUPATIONAL HEALTH & SAFETY MANAGEMENT

#### 11.1.**Scope**

The Specification covers the requirements for eliminating and mitigating incidents and injuries for the SCHEDULE MAINTENANCE OF LAUNDRY AND ASSOCIATED AT CLUSTER ONE (1) - OR TAMBO AND ALFRED NZO DISTRICT - HEALTH FACILITIES

- a) The scope addresses legal compliance, hazard identification, risk assessment, risk control, and promoting a Health and Safety culture on the project.
- b) The Specification also provides for the protection of those persons other than employees.

## 11.2. Scope of Works (verify with BOQ)

This specification is for schedule maintenance of Laundry at cluster one (1) – OR Tambo and Alfred Nzo district - health facilities (Please see the tender document for a detailed scope of works).

Details of the work required shall be as listed in the Price Lists which have been sub-divided into the following categories:

SCHEDULE 1: FIXED CHARGE AND VALUE RELATED ITEMS APPLICABLE TO ALL WORK

**SCHEDULE 2:** FUNCTIONAL REPAIR SCHEDULE

**SCHEDULE 3: MAINTENANCE SERVICE SCHEDULE** 

SCHEDULE 4: TERM REPAIRS SUBJECT TO APPROVAL OF QUOTATION FOR THE WORKS

**SCHEDULE 5:** EQUIPMENT REPLACEMENT COST SCHEDULE

## 11.3. Structure and Organization of H&S Responsibilities

Principal Contractor to provide a proper OHS organogram.

#### 11.4. Notification of Construction Work

a. There is no need for notification of construction since this is a maintenance project.

## 11.5. Health and Safety Plan Framework

a) The H&S aspects related to the project outlined in the previous sections are to be considered when drawing up the H&S Plan.

b) The PC is required to demonstrate competence by providing an H&S system that will address the requirements of the project.

## 11.6.Appointment of Competent Personnel

- a) The CEO (OHSA S16.1) of the PC will take overall responsibility for the appointment of competent staff for the duration of the project. Should the CEO not be personally involved in the project, the H&S responsibilities are to be delegated to the Site Agent (OHSA 16.2). Knowledge and training in H&S is required, and certificates indicating H&S training as well as experience to be included in CVs.
- b) All other legal appointments are to be made with relevance to the type of work required and kept current with the project programme.

## 11.7. Contracts Supervision

- a) Competent Contracts manager will be appointed to manage part or all the works and have training and/or experience in the area of responsibility. All site supervisors must show evidence of appropriate training in H&S, and an understanding or training in areas of responsibility (i.e., risk assessments, method statements etc.).
- b) Curriculum Vitae (CVs) are to be submitted for approval by the Client or client's Agent.
- c) The Manager will be held responsible for the safety of working teams and subordinates, housekeeping and any other health and safety risks on site.

## 11.8. Health and Safety Management

- a) The PC will employ at least one competent, H&S Officer the duration of the contract.
- b) The H&S Officer CVs and competency certificates must be submitted for approval to the H&S Agent or the Client.
- c) The officer will be required to compile a monthly report, see Annexure A.
- d) In the case the contract becomes subcontracted, the H&S Officer must have a competence to evaluate the Contractors Health and Safety plans.
- e) The maintenance supervisor may not act as the H&S Officer.
- f) The H&S Officer will be held.
  - 11.8.f.1. Senior site staff and supervision, Contractors are to follow systems, instructions etc, given by the H&S Officer at all times;
  - 11.8.f.2. No new workers or Contractors may commence work without approval or following the H&S plan as submitted, and
  - 11.8.f.3. No inductions of Contractor staff until the H&S documentation is approved by the H&S Officer.
- g) A monthly report of all H&S activities and incidents is required by the end of the first week of each month, or at a date agreed to by the client and the contractor.

- 11.8.g.1. A list of the typical aspects that should be provided is available as Annexure B to this document.
- 11.8.g.2. The PC is to ensure that all Contractors documentation follows the same requirements and closed out H&S documentation must be completed and be available with the close out of the main contract.
- 11.8.g.3. Failure to do so will be considered a serious offence and penalties applied.

## 11.9. Health and Safety Representatives and H&S meetings

- a) H&S Representatives representing workers and Contractors are to be appointed following the start-up of the project, irrespective of the number of workers on site.
- b) The appointed H&S Representatives are to be actively involved with H&S and will assist the H&S Officer and site management in meeting legislative duties.
- c) The H&S Officer shall further ensure that H&S is discussed at all internal production or progress meetings.
- d) Issues arising from the clients audits are to be discussed, as well as all H&S related issues.
- e) Minutes are to be kept for all H&S interventions and meetings. Failure to do so will be deemed to be a moderate offence.
- f) Every team that is allocated to a site should have someone competent to manage safety (Incident investigation/ daily risk assessment/ and feedback on other risk associated found)

## 11.10. Appointment of Competent Contractors

- a) The Principal Contractor is to ensure compliance with the Client's minimum standards and all legislative requirements.
  - 11.10.a.1. All competent persons shall have the knowledge, experience, training, and qualifications specific to the work they have been appointed to supervise, control, and carry out.
- b) The Principal Contractor is responsible to ensure that competent Contractors are appointed to carry out maintenance work.
- c) The same H&S standards required of the PC are to be applied to all Contractors.
- d) An index of all Contractors and Suppliers is to be on file and kept updated at all times.
- e) Where the ECDoH appoints Direct Contractors or uses the Maintenance staff to carry out works in the site area, the ECDoH is to ensure that the appropriate competent persons are responsible for supervising & controlling the work being undertaken.
- f) The PC is to ensure there is sufficient funding for H&S compliance by each Contractor.
- g) The following minimum aspects are applicable to any Contractor appointed:

## 11.10.g.1. Mandatary agreements in place

- 11.10.g.2. Letter of Good Standing
- 11.10.g.3. Method statements and risk assessments
- 11.10.g.4. Available information relative to:
  - 11.10.g.4.1. Load testing and registers for cranes or lifting devices where there's new installation.
  - 11.10.g.4.2. Medical certificates of fitness
  - 11.10.g.4.3. Safety data sheets (SDSs)
- h) Failure to provide written approval of H&S documentation will be considered a serious offense, and could result in aspects of, or all the activities being stopped, and penalties implemented.

#### 12. GENERAL RISK MANAGEMENT

## 12.5. <u>Health Risks and Medical Surveillance</u>

- 12.1 All permanent workers (including those of Contractors) are required to be in possession of a medical certificate of fitness issued by a registered Occupational Medical Practitioner prior to commencing work. Medical surveillance will commence at pre-employment.
- 12.2 All workers (including Contractors) are required to be in possession of a medical certificate of fitness prior to commencing work.
  - a) Employees required to perform work at heights or from fall risk position must be medically fit to perform such work, such employee's medicals must specify "Fall Risk" or "Working at heights" in the exposure section of the annexure 3 template. Where applicable,
  - b) Annual medical surveillance is required (unless identified as being required more frequently), as well as an exit medical.
  - c) Arrangements for keeping medical records for the required time are to be noted.
  - d) It is preferable that the PC has a medical surveillance plan.
    - 1. Where work is performed at a TB Hospital we need:
      - a. Proper ventilation when working in confined areas.
      - b. FFP2 Mask to be worn when working near patients' areas.
      - c. Medicals must be done for all with Lung function test as a must.
    - 2. Where working in Forensic facilities:
      - a. All employees working in areas where they might be exposed to body fluids must be vaccinated against Hepatitis B.
    - ii. Failure to do so will be considered a serious offence.

#### 12.5. General Environmental Conditions

- a) Compliance with the Environmental Regulations (as amended) as well as the Environmental Management Act, among others is required.
- **b)** Environmental monitoring of ventilation, lighting and dusts may be deemed to be required by the Approved Inspection Authority used to measure the environment.
- c) Copies of the relevant reports and actions taken in respect of these are to be placed in the H&S file.

d) Any spillages of substances which could be toxic to persons and the environment must be dealt with adequately. The Contractor must include his spillage removal system in the OHS Plan. (spill kit to be carried with every bakkie)

## 12.6. Noise Risks

- a) All plant and vehicle from plant hire companies (suppliers) or that of the PC is to be compliant with the Noise Induced Hearing Loss Regulations.
- b) Plant identified that has not been tested and marked for noise emissions will result in having to be tested at the Contractors or PCs expense.
  - 12.6.b.1. Failure to do so within a reasonable time will result in such plant/vehicle being removed from site.
- c) Audiometric testing of all workers is noted as required in the medical surveillance programme for all permanent workers prior to work commencing.
  - 12.6.c.1. Temporary labour working in identified noise areas will require testing if the noise levels are indicated on plant or through processes as greater than 85dB.
  - 12.6.c.2. Audiometry records are to be available in the H&S file.
- d) Suitable SANS approved hearing protective equipment shall be issued and worn where noise levels are identified as equal to or greater than 85 db.
  - 12.6.d.1. Failure to do so will be considered a serious offence.

## 12.7. Emergency Procedures

- a) The Principal Contractor must prepare a detailed emergency procedure manual for approval by the Client prior to commencement of work on the site.
- b) It is advised that the system should be simple and easy for any worker to follow.
- c) The plan may be adapted should new information or risks are identified.
- d) The procedures for dealing with the emergency evacuation of staff must be agreed upon with the Facility Management.
- e) All teams should have knowledge and skills for emergency (Per Bakkie Designation)

## 12.8. First Aiders and First Aid Equipment

- a. Competent, trained First Aider is to be formally appointed for the project.
  - b. At least one worker is to be trained to level 3.
  - c. First aider is to be available at all times and be able to cover each working team.
  - d. Appropriately stocked first aid kits are to be available at all times and to assure continual availability and access on site.

## 12.9 Fires and Emergency Management

- a. Attention to emergency planning and procedures is very important.
- b. The full emergency plan must form part of the supporting documentation with the H&S Plan.
- c. It is advised that the system should be simple and easy for any worker to follow.
- d. The plan may be adapted should new information or risks are identified.

- e. First aiders shall be available in each working team and be able to work as a team when responding to any emergency on the project.
- f. The procedure shall detail the response plan in relation to the works, and include at least (but are not limited to) the following key elements:
- g. Appointment of a competent emergency response co-ordinator.
- h. Fire Fighting equipment to be supplied per vehicle and a competent person per bakkie to be able to have fire training.

## 12.11 Incident Management and Compensation Claims

- a. The PC will ensure there is a management system to investigate all incidents.
- b. All serious incidents involving any form of disabling injury or fatality are to be reported to the Client immediately.
- c. This shall be confirmed in writing following the incident.
- d. Full details are to be included in each site meeting or when the Client visits site.
- e. A summary of incidents is to be included in the monthly report.
- f. Failure to comply with emergency provisions will be considered a serious offence, and the operation or project may be stopped if deemed inadequate for the work at the time of assessment or site inspection.
- g. Per team all employees to have knowledge of above

## 12.12. Personal Protective Equipment (PPE) and Clothing

- a) The PC is to provide a procedure as an addendum to indicate how PPE is managed within the Company.
- b) The wearing of the identified SANS approved PPE at all times is non-negotiable.
- c) The PC shall ensure that all workers (Including Contractors) are issued with and shall wear as required; the first 3 items are mandatory for all workers:
- 12.12.c.1. Protective footwear.
- 12.12.c.2. Reflective jackets (no bibs).
- 12.12.c.3. Overalls that ensure worker visibility
- 12.12.c.4. Eye protection;
- 12.12.c.5. Hearing protection;
- 12.12.c.6. Respiratory protection (minimum of FFP2), and
- 12.12.c.7. Any other necessary PPE identified from SDSs and/or risk assessments.
- d) Adequate quantities of PPE shall be available. This shall include necessary PPE for visitors. The procedures for managing PPE are to be in a formal procedure submitted with the H&S plan for approval.
- e) Failure to comply will result in penalties being applied.

## 12.13. Occupational Health and Safety Signage

- a) On-site H&S signage is required.
  - 12.13.a.1. Signage shall be posted up at temporary working areas, or other potential risk areas/operations.
  - 12.13.a.2. These signs shall be in accordance with the requirements of the General Safety Regulations or SANS requirements as amended.
  - 12.13.a.3. Signage is to be noted on the site drawings indicating where fixed/temporary signage is required.
- b) Temporary signage is to include (but not be limited to) the following:
  - 12.13.b.1. "Warning: Construction Site Keep out' or similar.
  - 12.13.b.2. 'First aid box positions (including vehicles); and where one is working.
  - 12.13.b.3. Fire extinguishers.
- c) Signs shall be posted at areas of work on site indicating that a construction site is being entered and that persons should take note of H&S requirements.
- d) The Contractor shall establish a system for controlling and recording entrance to the Site office and camp area.
- e) Failure to comply will result in penalties being applied.

## 12.14. <u>Induction of Employees and Visitors, General H&S Training (to be done at contractor's</u> office/ workshop)

- a) A formal induction programme is to be submitted as an addendum for approval with the H&S plan.
- b) Pre-task training is required to ensure workers are familiar with the risks and H&S measures of the work or tasks to be done.
  - 12.14.b.1. Such training is to be done at least weekly.
  - 12.14.b.2. Records of inductions and pre-task training are to be kept in the H&S file.
- c) Any person found on site without proof of induction will be removed from site until the proof is supplied and, and a penalty issued per non-compliance.

#### 12.15. Public and Health and Safety

- 12.15.a.1. The Contractor shall ensure that each person working on or visiting a site, and the surrounding community, shall be made aware of the dangers likely to arise from onsite activities and the precautions to be observed to avoid or minimize those dangers. Appropriate health and safety signage shall be posted at all times.
- 12.15.a.2. Warning notices are to be provided at the main entrance to area of works to each hospital facility, notifying that construction work is taking place within the existing buildings.
- 12.15.a.3. Hoardings are to be inspected daily and monitored during working hours.

## 12.16. Awareness and training

- a) The Principal Contractor shall ensure that periodic toolbox talks take place at least once per week at workshop or office area.
  - 12.16.a.1. These talks should deal with risks relevant to the construction work at hand.
  - 12.16.a.2. A record of attendance shall be kept in the Health & Safety File.
  - 12.16.a.3. All Contractors must comply with this minimum requirement.
  - 12.16.a.4. At least one of the Toolbox talks shall include an environmental related issue.
- b) The Principal Contractor is to ensure that the facility Management & Staff are kept informed of any change in the situation regarding the risks and hazards relating to the construction work on the site.

#### 13. MANAGEMENT OF PLANT AND EQUIPMENT

## 13.12. Construction Plant (where necessary)

- a) Construction Plant includes all types of plant including but not limited to, cranes, piling rigs, excavators, road vehicles, and all lifting equipment.
- b) The Principal Contractor shall ensure that all such plant complies with the requirements of the OHS Act 85/1993 and Construction Regulations 2014
- c) The Principal Contractor and all relevant Subcontractors shall inspect and keep records of inspections of the construction plant used on site.
- d) Only authorised/competent (certified) persons are to use machinery under proper supervision.
- e) Appropriate PPE and clothing must be provided and maintained in good condition at all times.
- f) Proof of medical evaluations as required by the Construction regulations is available for inspection by the Client.

#### 13.13. Plant & Equipment

- a) Close control of plant and equipment is required, including that of Contractors.
- b) Regular monitoring of all plant and equipment is required prior to commencing work.
- c) Full lists of hired and own plant are to be available at the H&S Agent's/Client audit.
- d) All daily inspection records are to be kept in the H&S file where plant and equipment is brought on to site.
- e) Registers are not to be more than 1 week behind.

## 13.14. **Operators**

- a) Only competent, fit plant operators are to be used.
- b) Medical certificates of fitness are required for all operators.

- Operators are to be adequately trained and certified to operate mobile cranes or crane trucks.
- d) Certificates and registers are to be placed in the H&S file.
- e) Failure to do so will be considered a serious offence.

## 13.15. Machinery and Power Tools

- a) Only authorized competent persons are to operate machinery and power tools.
- b) Appropriate PPE and clothing must be provided, used and maintained.
- c) No unsafe / dangerous equipment or tools may be brought onto, or used, on the site.
- d) The Client / PSP reserve the right to inspect all tools and equipment at any time and to prevent / prohibit their use, if found to be unsafe, without any penalty to the Client and without affecting the terms of the contract in any way.
- e) The Contractor may not use any machinery or power tools belonging to the Hospital.

## 13.16. Portable Electrical Tools/Equipment and Explosive Powered Tools

- a) The Principal Contractor shall ensure that use and storage of all explosive powered tools and portable electrical tools are in compliance with relevant legislation.
- b) The Principal Contractor shall ensure that all-electrical tools, electrical distribution boards, extension leads, and plugs are kept in safe working order.
- c) The Principal Contractor is to ensure that extension cables and temporary power supplies do not impede access ways or escape routes.
- d) Regular inspections and toolbox talks must be conducted to make workers aware of the dangers and control measures to be implemented e.g. personal protection equipment, guards, etc.
- e) The Principal Contractor shall ensure the following:
  - 13.16.e.1. A competent person undertakes routine inspections and records are kept.
  - 13.16.e.2. Only authorised trained persons use the tools.
  - 13.16.e.3. The safe working procedures apply.
  - 13.16.e.4. Awareness training is carried out and compliance is enforced at all times.
  - 13.16.e.5. PPE and clothing is provided and maintained.
  - 13.16.e.6. Electrical cables must be free from any damage.
  - 13.16.e.7. Electrical tools & equipment may not be exposed to water.
  - 13.16.e.8. Signs to be posted up in the areas where explosive powered tools are being used.

    (WARNING EXPLOSIVE POWERED TOOL IN USE KEEP CLEAR).

13.16.e.9. That prior arrangement is made with the facility Maintenance Supervisor before any explosive powered tools are used.

## 13.17. Hired Plant and Machinery (where applicable)

- a) The Principal Contractor shall ensure that any hired plant and machinery used on site is safe for use.
- b) The necessary requirements as stipulated by the OHS Act 85/1993 and Construction Regulations (February 2014) shall apply.
- c) The Principal Contractor shall ensure that operators hired with machinery are competent and that certificates are kept on site in the health & safety file.
- 13.17.c.1. This includes medical certificates of fitness to operate construction vehicles and appointment of the operator.
- 13.17.c.2. All relevant Subcontractors must ensure the same.
- d) Inspections must be recorded by each operator.
- 13.17.d.1. A copy of the machines service logbook & planned maintenance schedule must be supplied with the machine.
- e) Operators must be trained on the relevant risk assessments and safe working procedures.
- f) The hired plant company must provide proof of registration with Workman's Compensation or FEM before delivery of plant to site.
- g) The Hire Company must be required to sign a 37(2) Mandatory Agreement with the hire company before commencing with work. (Applicable if an operator is supplied with the machine.

## 13.18. **Vessels under Pressure and Gas Bottles**

- a) The Principal Contractor and all relevant Subcontractors shall comply with the Vessels under Pressure Regulations, including:
- 13.18.a.1. No smoking or naked flame signs posted as well as sufficient firefighting equipment.
- 13.18.a.2. Cylinders must be stored in rows with aisles in between for easy removal in event of a fire.
- 13.18.a.3. Different types of gasses will be stored separately in an upright position, separately secured and the type of gas displayed identified with appropriate signage.
- 13.18.a.4. Before a cylinder is moved without suitable truck or trolley, the cylinder valve will be closed, and the regulator removed.
- 13.18.a.5. Only approved cylinder crates/cradles will be used.
- 13.18.a.6. Cylinders may not be transported with magnet cranes.

- 13.18.a.7. Cylinders may never be used as rollers, even if they are marked empty.
- 13.18.a.8. Cylinders may never be exposed to electrical circuits, e.g. welding leads. Never strike an arc on a cylinder.
- 13.18.a.9. Cylinders must be protected from direct sunlight or areas that could cause the cylinder to overheat.
- 13.18.a.10. Oxygen cylinders must be stored at least 5m away from other flammable gas cylinders.
- 13.18.a.11. Flashback arrestors must be fitted to the torch and the cylinder.
- 13.18.a.12. Empty cylinders must be marked as such and removed from site after use.
- 13.18.a.13. Cylinders may only be allowed on site in an approved trolley, properly secured and with a 1.5kg dry powder fire extinguisher within 2m of the cylinder.
- 13.18.a.14. Visual inspections will be done by the appointed HCS Controller to ensure that substandard vessels are not delivered and stored on site.
- 13.18.a.15. Hot works permit to be used in conjunction with welding.
- 13.18.a.16. Pressure vessels must have a certificate of manufacture as well as a service inspection test certificate issued at intervals not exceeding 36 months. These certificates will need to be submitted to the Safety Department on site.

## 13.19. **Hand tools**

- a) No handmade or damaged tools may be used on site.
- b) The Principal Contractor needs to exercise control over all contractors on site.
- c) Hand tools may only be used for its intended purpose.
- d) A competent person must be appointed to inspect hand tools monthly.
- e) Inspections need to be recorded on a register and each tool identified with a unique number.

## 13.20. <u>Inspection of equipment and tools.</u>

- a) The following items of equipment must be inspected weekly and maintained, and appropriate records kept. Where applicable.
- 13.20.a.1. Vehicle to inspected Daily (before leaving office)
- 13.20.a.2. First Aid dressing registers
- 13.20.a.3. Fire equipment
- 13.20.a.4. Lifting equipment
- 13.20.a.5. Lifting Gear
- 13.20.a.6. Portable electrical equipment
- 13.20.a.7. Stacking and storage inspections

13.20.a.9. Hazard	dous Chemical Substances (HCS)
13.20.a.10.	Materials hoists (where applicable)
13.20.a.11.	Pressure Vessels
13.20.a.12.	Ladders
13.20.a.13.	Excavations
13.20.a.14.	Safety harnesses
13.20.a.15.	Scaffolds - static and mobile.
13.20.a.16.	Pneumatic tools
13.20.a.17.	Construction vehicles and mobile plant.

#### 13.21. Ladders and ladder work where applicable

13.20.a.18.

13.20.a.8. Explosive power tools

a) The Principal Contractor shall appoint a competent person in writing to inspect all ladders monthly and record such findings in a register.

Health and Safety Representatives checklists.

- b) Ladders are to extend one meter above a landing and must be secured at the top and have a secure, non-slip base.
- c) All ladders that do not comply with Health and Safety standards are to be removed from the site immediately.

#### 13.22. Cranes and lifting equipment. (Where Applicable)

- a) Should any form of lifting device or crane (fixed or mobile) be used during the project for deliveries, moving of supplies or equipment, the appropriate documentation must be made available.
- b) The Principal Contractor and all Contractors shall ensure that lifting machinery and tackle is inspected before use and thereafter in accordance with the Driven Machinery Regulations and the Construction Regulations (section 20).
- c) Method statements, risk assessments, safe work procedures and training are to be available prior to work commencing.
- d) A procedure for managing loads and lifting must be made available as an addendum to the H&S Plan.
- e) There must be competent lifting machinery and tackle inspector who must inspect the equipment daily or before use, considering that:
- f) All lifting machinery has a safe working load clearly indicated.
- g) All lifting equipment is clearly marked with a unique number and safe working load.
- h) Regular inspection and servicing is carried out:
- 13.22.h.1. Lifting Machinery load test every 12 months

- 13.22.h.3. Lifting Tackle Load test every 12 months
- 13.22.h.4. Lifting Tackle Inspections every 3 months
- i) Records are kept of inspections and of service certificates.
- j) Any plant or slings used to lift plant or material requires annual load testing by an AIA, and all certificates must have the testers LMI/E number.
- k) There is proper supervision in terms of rigging & guiding the loads that includes a trained banks man to direct lifting operations and check lifting tackle.
- I) The operators are competent as well as physically and psychologically fit to work and in possession of a medical certificate of fitness to be available on site.

#### 14. WORKING PROCEDURES

#### 14.12. Site Works and Excavations not applicable in this contract.

- a) A competent person is to be appointed in writing to supervise the Site Works and Excavations.
- b) A method statement on the procedures relating to the diversion of existing services and the maintenance of services to the existing facilities is to be agreed between the Contractor and the Principal Agent prior to the commencement of the work.
- c) The Contractor is to ensure Risk Assessments & Safe Working procedures have been communicated to the workers before any work is commenced.

#### 14.13. Working at Heights

- a) A fall protection plan is to be available and supplied as an addendum to the H&S plan.
  - 14.13.a.1. The fall protection plan must be appropriate for the project.
  - 14.13.a.2. Method statements, appropriate risk assessments, safe work procedures and training are to be available prior to work commencing.

#### 14.14. Mechanical installations

- a) All mechanical installations are to be carried out in conformity with the manufacturer's instructions.
- b) Method statements and risk analyses must be compiled for each type of installation.
- c) A competent person must be designated to supervise the work.

#### 14.15. Electrical work

a) In addition to the requirements of the Electrical Machinery Regulations and the General Machinery Regulations any electrical distribution board used for construction work shall be fitted with suitable earth leakage protection.

- b) Leads must be properly and firmly connected.
- c) Plugs and sockets shall be in good and safe condition.
- d) All electrical apparatus, other than electrical hand tools, shall have a physical "lock out" system which will prevent any operation other than that authorized by a supervisor.
  - 14.15.d.1. A "lock out" sign shall be displayed when the apparatus is not in use.
- e) Method statements and safe work procedures will be required for all work involving electrical apparatus.

#### 15. AUDITING

- a) Frequency of external auditing by the Client or client's agent will be as agreed with the contractor but will at least conform to the requirements of the Construction Regulations.
  - 15.12.a.1. The site will be inspected, and the documentation audited relative to the activities and H&S plan.
  - 15.12.a.2. The H&S Officer of the PC must assist the Client, on all audits and inspections.
  - 15.12.a.3. Not all audits will be, or need be announced.
  - 15.12.a.4. Full compliance is required. Time limits for corrective actions will be set and must be adhered to.
- b) Failure to address findings or non-conformances will be considered a serious offence.

#### 16. OCCUPATIONAL HEALTH

#### 16.12. Communication

- a) All H&S communication during the project between the Client and the PC will be done in writing, including the issue and responses to non-conformances and H&S audit results.
- b) Failure to address issues timeously will be considered a serious offence.
- c) To be done at DEPOT/ OFFICE before getting to premises.

#### 16.13. Care of Workers on Site (Welfare)

- a) Clean, safe drinking water.
- b) Provision for hand washing facilities to be arrange with facilities.
- Arrangements made where existing facilities are shared with existing users must be made in writing and placed in the H&S file.
- d) Failure to manage specific conditions or address issues timeously will be considered a serious offence

#### 16.14. Discipline, Alcohol and Substance Abuse

a) All employees (management included) are to follow instructions given in the interest of H&S.

16.14.a.1. Disciplinary action is to be imposed on those who do not follow such instructions or company rules or policies.

- b) No person can work or access site if under the influence of alcohol or other substances that could impact on their own or others safety.
  - 16.14.b.1. The PC is to have a drug and alcohol policy available to manage such instances.
- c) These requirements are applicable to any employee of any organization providing services on site.
  - 16.14.c.1. Penalties may also be applied by the Client, OHS Agent, Engineer or Principal Agent.

#### 16.15. Compliance with the Rules of Conduct.

- a) The Principal Contractor, Subcontractors and all employees under their control, including any visitor brought onto site must adhere to the Rules of conduct on site, as listed under Section 12.28.
- b) These Rules of Conduct must also be adhered to by any of the following who visit the Site:
  - 16.15.b.1. Electrical & Mechanical Engineering
  - 16.15.b.2. Hospital Management and Staff
  - 16.15.b.3. ECDoH Employees
  - 16.15.b.4. Direct Contractors
  - 16.15.b.5. Trade Representatives
  - 16.15.b.6. Any other visitors to the Site.

#### 16.16. Electrical Equipment

- a) In addition to the requirements of the Electrical Machinery Regulations and the General Machinery Regulations any electrical distribution board used for construction work shall be fitted with suitable earth leakage protection.
- b) Leads must be properly and firmly connected.
- c) Plugs and sockets shell be in good and safe condition.
- d) All electrical apparatus, other than electrical hand tools, shall have a physical "lock out" system which will prevent any operation other than that authorized by a supervisor.
  - 16.16.d.1. A "lock out" sign shall be displayed when the apparatus is not in use.
- e) Method statements and safe work procedures will be required for all work involving electrical apparatus.

#### 17. SAFETY RULES WITH RESPECT TO WORK TO HEALTH CARE FACILITIES

a. All persons on the premises shall obey the ECDoH & facility's Health and Safety rules, procedures and practices.

- b. No smoking will be permitted within the buildings or within the buildings under construction.
- c. All work shall be carried out within normal working hours except certain essential works which may need to be carried out after hours or over weekends arrangements for such work to be agreed in advance between the Contractor and Principal Agent.
  - i. Note: That on this contract it is assumed that work will take place 7 days a week including after hours and at night as required.
  - ii. The Contractor is to agree the weekly work schedule in advance with the Client's Agent.
- d. All workers are to be instructed in and familiarise themselves with the existing emergency and safety procedures and to co-operate in any drills or exercises which might be held by the Hospital.
- e. Emergency / Firefighting equipment belonging to the premises is not to be interfered with.
- f. Emergency Exits and Escape Routes, including Temporary Escapes Routes are not to be obstructed.
- g. No persons shall carry out or initiate an unsafe / unhygienic act or operation whilst on the premises.
- h. Workers are not to interfere with the duties of the hospital, its staff, patients or visitors.
- i. The Contractor shall maintain good housekeeping standards in the areas being worked on throughout the duration of the contract.
- j. All waste / scrap materials are to be removed from the work areas on an on-going basis and should not be allowed to accumulate.
- k. The Client and facility Management reserves the right to act in any way necessary to ensure the safety and / or security of any persons or equipment on its premises and will not be liable for any costs incurred or loss evoked by such actions.
- The Client and health facility Management reserves the right to search all vehicles entering, leaving or parked on the premises and to inspect any parcel, package, handbag, tog-bag or suitcase.
- m. The health facility reserves the right to search any person entering or leaving the health facility premises.
- n. All workers must wear proper identification labels at all times The Contractor will be asked to remove persons without identification from the premises.
- o. The Contractor will not be permitted to use any tools or equipment belonging to the health facility.

- p. The Contractor is to ensure that noise is kept to a minimum so as not to unduly interfere with the functioning of the adjacent facilities.
- q. The Contractor is to ensure that dust from the works is properly contained so as not to cause problems with the normal functioning of the adjacent facilities.

#### 18. PROJECT SPECIFIC RISKS

#### 18. Risk Associated

- a) Working on the existing facility that will remain in operation throughout the contract period.
- b) Noise & vibration from maintenance activities and machines.
- c) Obstruction of escape routes.
- d) Working in confined spaces.
- e) Restricted access for materials and work areas.
- f) Environmental pollution due to oil spillages.
- g) Poor road conditions.
- h) Stray animals.
- i) Live electrical connections.
- j) Working with hot surfaces.
- k) Biological hazards.
- I) Cuts by sharp objects.
- m) Slips and falls from wet floors.
- n) Ergonomic risks from lifting heavy equipment.
- o) Vessels under pressure.

#### 18. **HEALTH AND SAFETY FILE**

- 18.12. The documentation submitted and approved following the awarding of the contract will be used to form the H&S file.
- 18.13. The H&S file is required to be laid out in a logical manner, and documentation filed within the file is to be easily accessible.
- 18.14. The following completed information shall be included (but not be limited to) as part of the index:
  - a) The PSHSS;
  - **b)** The H&S Plan and the approval by Client;
  - **c)** Appointment by Client;
  - d) Mandatory agreement with Client;
  - e) Notification of construction work (Not applicable)
  - f) A record of all working drawings, calculations and design where applicable;
  - **g)** Detailed list of Contractors with contact details, appointments, Mandatories etc., H&S specifications issued;
  - h) Record of Competencies (CVs) and appointments;
  - i) Training Records;

- j) Permits;
- **k)** Method statements;
- Risk assessments;
- m) Safe work procedures;
- **n)** Emergency and injury management;
- o) Safety data sheets
- p) Medical surveillance records;
- **q)** Registers;
- r) Records of audits, minutes etc.
- s) Plant lists
- t) Temporary electrical installations
- u) Employee records (who is on site)

#### 19. NON-CONFORMANCES

- 19.12. Should, at any time, the works, or part of the works, be stopped due to unsafe acts or non-compliance with the Clients or PCs H&S Plan; neither the PC nor any other Contractor shall have a claim for extension of time or any other compensation.
- 19.13. The following constitute examples of the types of non-conformances that will attract penalties:

Minor: Penalty: R50/count	Medium: Penalty: R500/count and a non-conformance	Severe Penalty: R5000/count, a non- conformance and/or activity stoppage
Non-use of PPE supplied	Toilets not supplied or regularly serviced; lack of drinking water	Contractors working without Health and Safety Plan approval
Non-completion of registers for plant and equipment on site	Contractors not audited	Workers transported in contravention of the OHS plan or legal requirements
Lack of H&S signage at work areas	Working without training or the appropriate, approved H&S method statements	Invalid Letters of Good Standing
Tools and equipment identified in poor condition during inspections	Legal non-conformances identified during the previous audit and not addressed within the agreed time frame	Non-compliance with traffic accommodation requirements: layout or physical conditions
	No monthly OHS report at site meeting to report on	Any serious breach of legal requirements
	No certificates of fitness for workers as required	
	Working without approved method statements	

### 19.14. **Failure to Comply with Provisions**

a) Failure or refusal on the part of the PC or their Contractors to take the necessary steps to ensure the safety of workers and the general public in accordance with these specifications

- or as required by statutory authorities or ordered by the engineer, shall be sufficient cause for the engineer to apply penalties as follows:
- 19.14.a.1. A penalty as shown in the Table above shall be deducted for each occurrence of non-compliance with any of the requirements of the PSHSS.
- 19.14.a.2. In addition, a time-related penalty of R500,00 per hour over and above the fixed penalty may be deducted for non-compliance to rectify any non-conformance within the allowable time after a site instruction to this effect has been given by the Designer.
- 19.14.a.3. The site instruction shall state the agreed time, which shall be the time in hours for reinstatement of the defects.
- 19.14.a.4. Should the Contractor fail to adhere to this instruction, the time-related penalty shall be applied from the time the instruction was given.

# ANNEXURE A CLOSE OUT REQUIREMENTS

The H&S files for the Principal Contractors and all Contractors require closure and handover to the Client at the completion of the project. The following list is an example of what should be included, but is not exhaustive. The OHS Agent or the Client may require further information at the time of completion and the Principal Contractor is to ensure that all instructions are met. Documentation would include all records from the start of the project. Daily or monthly plant inspection records are not required unless they are related to an accident. All records to be in electronic format and submitted to the OHS agent for approval in adequately formatted lists and folders. Layout should be logical and in the same order as in the site files.

### Health and Safety close out file requirements include:

- a) Client H&S Specification
- b) Principal Contractor's OHS Plan(s)
- c) Organograms
- d) Legal Appointments
- e) List of all employees employed on a permanent or contractual basis over the duration of the contract
- f) Notification to Department of Labour of commencement of work
- g) Letters of Good Standing for the Project
- h) Full files for all Contractors as well as their close out reports
  - List of Contractors
  - All employees employed on a permanent or contractual basis over the duration of the contract
  - Letters of Approval of Contractors
  - Mandatary Agreements
  - Letters of Good Standing
  - Appointments
- i) Incident Records
- j) Non- Conformance records
- k) Client's Audits
- I) Method Statements
- m) Risk assessments
- n) Safe work procedures
- Medical surveillance certificates of fitness. Medical records are to be kept according to the OH&S Act as amended
- p) All drawings for temporary structures (suspended beams/scaffolds etc.)
- q) All operating manuals for any systems that require on-going maintenance
- r) Copies of test results, policies and procedures for environmental monitoring (silica, noise, dusts etc.)

The H&S files are to be kept 'live' for the defect and liability period by the Principal Contractor, including those of their Contractors. Any work required during the defect and liability period will require an assessment of the H&S file by the OH&S Agent prior to any work commencing.

A copy of drawing records for the as-built drawings are to be placed on file by the Designers once complete.

SUPPLEMENTARY SPECIFICATION

#### **GENERAL MAINTENANCE AND REPAIRS**

#### **OF**

#### LAUNDRY EQUIPMENT

#### SS 1. GENERAL

This specification is for the repair and fixed term maintenance of Laundry and associated equipment installations at various hospitals and health facilities listed in paragraph SS 3. of the CLUSTER ONE (1) – OR TAMBO AND ALFRED NZO DISTRICT

This specification shall be read in conjunction with the Service Information which will include the Standard Specifications for the General Maintenance and Repairs to Electrical and Mechanical Installations, Standard Technical Specifications that may be applicable, the Supplementary Specification, the Operating and Maintenance Manuals (where applicable) and the Maintenance Control Plan, as well as the General Conditions of Tender and all Schedules and Drawings forming part of the Tender.

Where specifications and/or drawings are at variance this Supplementary Specification will have preference over both the Standard Specifications and the Drawings.

Maintenance and servicing shall be carried out strictly as stated in the service schedules and after each service a copy of the service schedule duly completed and signed shall be submitted to the responsible Service Manager.

#### SS 2. EQUIPMENT INSTALLATIONS

The laundry and associated equipment installations, listed in the Bills of Quantities, shall be maintained and repaired as part of this contract.

#### SS 3. SCOPE OF WORK

This specification is for the repair, maintenance and proper functioning of LAUNDRY AND ASSOCIATED EQUIPMENT, for the duration of the Contract period, in the following Health facilities:

Item No.	Facility			
	KING SABATO DALINDYEBO			
1	Zitulele District Hospital			
2	Nelson Mandela Academic Hospital			
3	Ngangelizwe CHC			
4	General Regional Hospital			
	NYANDENI LOCAL MUNICIPALITY			
5	Canzibe Hospital			
6	St Barnabas Hospital			
	MHLONTLO LOCAL MUNICIPALITY			
7	Nessie Knight Hospital			
8	St Lucy's Hospital			
9	Dr Malizo Mpehle Memorial Hospital			
	PORT ST JOHN'S LOCAL MUNICIPALITY			
10	Isilimela Hospital			
11	Port St John's CHC			
12	Bambisana Hospital			
	NGQUZA HILL LOCAL MUNICIPALITY			
13	Holy Cross Hospital			
14	Flagstaff CHC			
15	Lusikisiki EMS Station			
16	St Elizabeth's Hospital			

#### **ALFRED NZO**

Item No.	Facility			
	MATATIELE LOCAL MUNICIPALITY			
1	Khotsong TB Hospital			
2	Tayler Bequest Hospital			
	UMZIMVUBU LOCAL MUNICIPALITY			
3	Mount Ayliff Hospital			
4	Madzikane kaZulu Memorial Hospital			
	MBIZANA LOCAL MUNICIPALITY			
5	St Patrick's Hospital			
6	Grenville Hospital			
	NTABANKULU LOCAL MUNICIPALITY			
7	Sipetu Hospital			

Details of the work required shall be as listed in the Price Lists which have been sub-divided into the following categories:

**SCHEDULE 1:** FIXED CHARGE AND VALUE RELATED ITEMS APPLICABLE TO ALL WORK

**SCHEDULE 2:** FUNCTIONAL REPAIR SCHEDULE

**SCHEDULE 3:** MAINTENANCE SERVICE SCHEDULE

**SCHEDULE 4:** TERM REPAIRS SUBJECT TO APPROVAL OF QUOTATION FOR THE

WORKS

Note: The repair work included in Schedules 1 to 4 has been subdivided for each health

The repair and maintenance phases shall run in parallel as specified in GM 2.4. The equipment to be repaired and maintained is listed under the Inventories of Equipment in Annexure A.

The maintenance work (Minor and Major Services) required on the equipment listed in the Inventory of the attached Annexure A, will be as per the pricing of the Schedule 2 Price List, but subject to the scheduling of the final Maintenance Control Plan as per paragraph GM 3.3. All work must comply to the minimum requirements set by the Standard Specifications for the General Maintenance and Repairs to Electrical and Mechanical Installations, and this Supplementary Technical Specification for the laundry equipment installations

The repair work will be as per the Schedule 3 Price List, but subject to work being approved from the Repair Schedule as per GM 2.6. Due to limited funds and as specified in paragraph GM 2.8, some of the repair work may be stretched over two or more financial years. The repair work for the first financial year will commence only after the Repair Schedule has been accepted and the relevant repairs approved by the Service Manager. The Contractor will be issued with a written instruction (Task Order as per GM 2.4) to proceed with the specified work.

#### SS 4. INSPECTION OF THE SITE

Due to the large number of and area over which the Health Facilities covered by this Contract is spread, it is the Contractor's own choice if he/she wants to inspect the sites prior to tendering to ascertain the condition of the equipment or rely solely on the information provided as part of the Tender Documentation and single site tender briefing meeting. No further claims due to non-compliance with this requirement shall be entertained.

#### SS 5. STATUTORY AND REGULATORY REQUIREMENTS

The latest edition, including all amendments up to the date of tender, of the specifications, publications and codes of practice listed in the Standard Specification for LAUNDRY EQUIPMENT Installations shall be read in conjunction with this specification and shall be deemed to form part thereof.

All equipment that is subject to regular statutory inspections shall be prepared for statutory inspections and tests only when the validity of the existing certificates has expired. This work will form part of the maintenance phase of the contract.

#### SS 6. GENERAL REQUIREMENTS FOR REPAIR AND MAINTENANCE CONTRACTS

Whenever reference is made in the specifications to repairs and/or repair phase it shall mean the repairs required to the installation to bring the installation up to a standard, as described in the Standard Specifications for the General Maintenance and Repairs to Electrical and Mechanical Installations. In general, the repair work shall commence only after the Functional Condition Assessment Report has been approved and the quantities verified.

Maintenance work must be completed according to the approved Maintenance Control Plan. (See GM 3.3). Repair work can only commence once the Service Manager has approved it (See GM 2.8), or a breakdown Task Order has been issued by the Call Centre. Critical repairs may be carried out immediately with the approval

#### SS 7. ROUTINE SERVICING AND MAINTENANCE WORK

Maintenance of the LAUNDRY & ASSOCIATED EQUIPMENT is articulated in section 5 of the tender document

#### SS 8. TRAINING OF THE DEPARTMENT'S MAINTENANCE STAFF

It is required of this contract that the Contractor arrange for the theoretical and practical training of at least three maintenance personnel employed by the Department at each Health Facility specified in the Supplementary Specification. The Contractor shall ensure that the training is carried out by persons well qualified for the various tasks and shall call upon the services of experts from the various component manufacturers for assistance if need be.

The Contractor shall ensure that his own maintenance personnel are sufficiently qualified for the duties required.

Maintenance staff must receive enough instructions to ensure that they are fully conversant with the equipment concerned, and so that they can understand what the impact of their actions (or lack thereof) will be on the equipment. This training of the Health Facility's Employees shall be for a minimum duration of 40 hours, which shall include, but not necessarily be limited to, instruction on the operation and maintenance of the items mentioned in One/three/six monthly inspections

The training should be aligned to the general tasks contained in the Inspection and Servicing Guideline for the LAUNDRY EQUIPMENT Installations and Operation and Maintenance Manuals.

#### SS 9. TRAINING OF DEPARTMENTS OPERATING STAFF

The Contractor shall be responsible for the training of the Department's operating staff after the maintenance and/or repairs has been completed. Operating staff must receive enough instructions to ensure that they are fully conversant with the equipment concerned, and so that they can understand what the impact of their actions (or lack thereof) will be on the equipment. Operating staff shall be instructed on:

- 1. The general operating method of the LAUNDRY & ASSOCIATED EQUIPMENT.
- 2. Starting and stopping instructions.
- 3. Stopping the LAUNDRY & ASSOCIATED EQUIPMENT in emergency and warning against restarting after an emergency unless a competent person is present.
- 4. Positions and normal settings of control equipment.
- 5. Normal operating temperatures, etc.
- 6. Normal fuel, oil and water levels, etc.
- 7. Operational checks on running amperages, etc.
- 8. Name, address and telephone number of the competent person responsible for the maintenance of the unit/s.
- 9. Statutory Logbook (Update maintenance and service records into Log Book)

The operating and maintenance manual must be available during the training of operating staff. Operating staff must also be made conversant with the contents of the manual.

#### SS 10. COMPETENT PERSON ON SITE

It is not a condition of contract that a Competent Person must be full time on site. Payment reductions will however be imposed if repairs are not carried out within the time limitations specified in Paragraph GM 7. Tenderers are therefore advised to evaluate the additional expense required for a competent person on site to ensure quick response against the possibilities of payment reductions, before submitting a tender.

#### SS 11. CLASSIFICATION OF BREAKDOWNS

The classification of breakdowns specific to LAUNDRY & ASSOCIATED EQUIPMENT shall be as follows in line with the requirements of GM 7:

PRIORITY	DESCRIPTION	RESPONSE
P1	Emergency (Life Threatening)	Immediate response from the time of logging a call and the emergency to be resolved (at least temporarily) within 8 hours
P2	Urgent	Immediate response from the time of logging a call and to be resolved within 12 hours
Р3	Planned Maintenance Repairs	Scheduled Maintenance is to be scheduled and performed within 3 business days of the scheduled date
P4	Emergency Facility Repairs	7 Days planning and execution subject to supply chain regulations

#### SS 12. PENALTIES

Penalties applicable to this specification will be as per the criteria specified in Section X17 of the Secondary Options Clauses of the Contract.

#### SS 13. SPECIAL SAFETY, HEALTH, ENVIRONMENTAL AND QUALITY REQUIREMENTS

In addition to the general SHEQ requirements as per GM 2.15, the following additional requirements will apply to this Laundry and Associated Equipment:

Due to the type of equipment and risk of injury to personnel working on them, it is of the utmost importance that the relevant staff are supplied with and trained in the use of the relevant PPE while working on the Laundry and Associated Equipment.

This as a minimum must include:

- Safety Boots
- Safety Suit (As per applicable)
- High Temperature gloves
- Clear Safety glasses
- Clear face shield
- Hearing protection
- Dust Mask for when working with coal, soot and ash
- Neoprene/Rubber gloves for working with liquid fuels and chemicals
- Safety gear as required by the equipment manufacturer/supplier

To comply with environmental requirements, the Contractor must always have a basic spill control kit in his vehicle to assist with the cleanup of any spilled oils, etc. during the course of their work on site.

#### SS 14. SPECIAL TOOLING REQUIREMENTS

In addition to the general tooling that the Contractor should have, the following additional requirements will apply to the Laundry and Associated Equipment:

- Vibration Measurement Pen
- Infrared Temperature Gun
- Flow measurement devices to measure fuel, water and steam flows
- Tooling equipment as required by the equipment manufacturer/supplier

#### SS 15. IN-SERVICE TRAINING OF SELECTED TRAINEES

The Contractor can be required to provide In-Service Training for selected Interns and/or Graduates from the areas where the Services are to be provided as per the conditions contained in C3.3. A provisional sum to cover the salaries for these trainees will be included into the Price list.

# LAUNDRY EQUIPMENT QUARTERLY INSPECTIONS – INDUSTRIAL & COMMERCIAL WASHING MACHINES & WASHER EXTRACTOR

#### Note:

Three Monthly inspections must be conducted by the service provider.

Three Monthly inspections will include weekly and monthly inspection tasks.

Results and findings must be entered in a logbook and signed by the relevant operator/maintainer.

CHECKED BY	DATE	

Item	Description	Check	Value / Reading	Comments/Findings
1	Check water inlet valve hose connections on the back of the washer-extractor for leaks			
2	Check steam hose connections for leaks (if applicable).			
3	Verify that insulation is intact on all. external wires and that all connections are secure.			
4	Check door lock and interlock			
5	Clean the AC drive box filters			
6	Clean the door gasket of all foreign matter.			
7	Clean automatic supply dispenser and lid.			
8	Clean the washer-extractor's top, front, and side panels			
9	Check all motor directions are correct			
10	Verify that door and door gasket do not leak			
11	Verify that the drain valve is operating			
12	Clean the AC drive fins			
13	Determine if belts require replacement or adjustment			
14	Check belts for uneven wear and frayed edges			

Item	Description	Check	Value / Reading	Comments/Findings		
15	Verify that belts are properly tensioned.					
16	Clean and replace all machine covers and secure					
17	Verify that belts are properly aligned.					
18	Remove back panel and check hoses for leaks					
19	Check supply dispenser hoses and connections					
20	Clean inlet hose filter screens. Replace if worn or damaged					
21	Tighten motor mounting bolt locknuts and bearing bolt locknuts, if necessary					
22	Use compressed air to clean lint from motor					
23	Clean interior of washer-extractor, both basket and shell, by wiping with a water-soaked sponge or cloth					
24	Use compressed air to clean moisture and dust from all electrical components					
25	Check all protection devices are installed and operation					
26	Tighten door hinges and fasteners, if necessary					
27	Tighten anchor belts if necessary.					
28	Verify that the drain motor shield is in place and secure					
29	Check all painted surfaces for bare metal. Repair, if necessary					
30	Clean steam filter, if applicable					
31	Check vibration safety switch gap setting to switch function					
32						
33						
34						

# LAUNDRY EQUIPMENT QUARTERLY INSPECTIONS - DRYER

#### Note:

Three Monthly inspections must be conducted by the service provider.

Three Monthly inspections will include weekly and monthly inspection tasks.

Results and findings must be entered in the generator logbook and signed by the relevant operator/maintainer.

# LAUNDRY EQUIPMENT QUARTERLY INSPECTIONS - SCALE

#### Note:

Three Monthly inspections must be conducted by the service provider.

Three Monthly inspections will include weekly and monthly inspection tasks.

Results and findings must be entered in the generator logbook and signed by the relevant operator/maintainer.

UNIT LOCATION	MAKE OF UNIT	
MODEL NO.	SERIAL NO.	
ASSET NUMBER	ELECTRIC/STEAM	
CHECKED BY	DATE	

Item	Description	Check	Value / Reading	Comments/Findings
1	"Clean the weight indicator. Clean the outside with a soft, lint-free cloth or compressed air.			
2	Measure and record each load cell's input and output resistance after detaching it from the circuit. Resistance levels must be within the load cell datasheet's tolerance range.			
3	Check the weight indicator calibration regularly for accurate readings. Check the platform weighing scale's calibration using the manufacturer's instructions.			
4	Check power, load cell, and communications cables and connectors for wear and damage.			
5	Check cable routing and loose connections.			
6	Check the weight indicator calibrations regularly for accurate readings. Check the platform weighing scale's calibration using the manufacturer's instructions.			
7	Check the weight indicator power supply. Check for fluctuations that may impair performance.			

		Check the weighing control unit		
8	3	grounding connection for electrical		
		safety. Check the grounding wire.		

Item	Description	Check	Value / Reading	Comments/Findings
9	Check the weighing control unit cable glands.			
10	Check that the excitation voltage, sensing voltage, and load cell output mV signal are stable and not dropping.			
11	Test the weight indication system's input, output, communication interfaces, and peripheral devices.			
12	Protect the weight indicator against high temperatures, moisture, and vibrations.  Maintain appropriate operating conditions and ventilation.			
13	Look for broken display or faded parts on the display. Test the keypad buttons to make sure they work.			
14	Check the junction box for cracks, corrosion, or loose connections.			
15	"Check junction box cables for wear, fraying and damage. To avoid strain and interference, route cables properly.			
16	Check the junction box's electrical connections (load cell cables, shield wire and main cable). Check for loose or exposed wires.			
17	Check the junction box gasket to verify it seals properly. This shields interior components from moisture and dust.			
18	To prevent dust, dirt, and other contaminants from affecting electrical connections or components, clean the junction box frequently.			
19	Check that the average card junction box terminals have consistent excitation voltage, sensing voltage, and load cell output mV signals without drops or variations.			
20	By measuring each mV load cell output and comparing it to the average circuit board's output, you can verify the board's average operation			
21	Check the junction box labelling and drawing for clarity and accuracy. This helps with maintenance and repair troubleshooting.			
22	Check the load cell junction box cable gland for tightness.			
23	Check the junction box for cracks, corrosion, or loose connections.			

	Check junction box cables for wear,		
24	fraying and damage. To avoid strain and		
	interference, route cables properly.		

Item	Description	Check	Value / Reading	Comments/Findings
25	Check the junction box's electrical connections (load cell cables, shield wire and main cable). Check for loose or exposed wires.			
26	Check the junction box gasket to verify it seals properly. This shields interior components from moisture and dust.			
27	"To prevent dust, dirt, and other contaminants from affecting electrical connections or components, clean the junction box frequently.			
28	Check that the average card junction box terminals have consistent excitation voltage, sensing voltage, and load cell output mV signals without drops or variations.			
29	By measuring each mV load cell output and comparing it to the average circuit board's output, you can verify the board's average operation			
30	Check the junction box labelling and drawing for clarity and accuracy. This helps with maintenance and repair troubleshooting.			
31	Check the load cell junction box cable gland for tightness.			
32	Check the junction box for cracks, corrosion, or loose connections.			
33	Check the weighing platform for cracks, dents and twisted portions. Check the welding and structure.			
34	Keep the weighing platform clean. Remove buildup that could hinder accuracy or harm the platform regularly.			
35	Check the platform's level. Check for unevenness and adjust levelling feet with a spirit level.			
36	Check load cells for damage, corrosion, and loose connections. Check the load cells' mounting and alignment.			
37	Check the weighing platform's calibration with validated weights. To get correct readings, follow manufacturer's instructions or calibrate.			
38	Lubricate the scale's moving parts according to the manufacturer's directions. Apply specified lubricants carefully and avoid load cells and weighing surfaces.			

20	Check the weighing scale platform		
39	mounting for stability.		

Item	Description	Check	Value / Reading	Comments/Findings		
	Check the weighing platform-to-indicator					
40	cables. Check for wear, fraying, and loose					
	connections. Organize cables.					
41	Make sure the weighing surface is					
	scratch- free, stable, and flat.					
42	Make sure there is no debris between the					
	pit frame and the weighing platform.					
42	Check the weighing platform for cracks,					
43	dents and twisted portions. Check the					
	welding and structure.					
44	Keep the weighing platform clean. Remove buildup that could hinder					
44	accuracy or harm the platform regularly.					
	Check the platform's level. Check for					
45	unevenness and adjust levelling feet with					
13	a spirit level.					
	Check load cells for damage, corrosion,					
46	and loose connections. Check the load					
	cells' mounting and alignment.					
	Check the weighing platform's calibration					
47	with validated weights. To get correct					
47	readings, follow manufacturer's					
	instructions or calibrate.					
	Lubricate the scale's moving parts					
	according to the manufacturer's					
48	directions. Apply specified lubricants					
	carefully and avoid load cells and					
	weighing surfaces.					
49	Check the weighing scale platform					
	mounting for stability.					
50	Check the weighing platform-to-indicator					
50	cables. Check for wear, fraying, and loose connections. Organize cables.					
	Make sure the weighing surface is					
51	scratch- free, stable, and flat.					
	Clean load cells. Remove any debris that					
52	may impede performance with a soft					
52	cloth or brush.					
	Check load cells for fractures, corrosion,					
53	or deformation. Resolve concerns					
	quickly.					
	Check load cell cables for wear, fraying,					
54	or damage. Avoid strain and interference					
	by routing and managing cables.					
55	Check all load cell electrical connections					
33	for tightness and exposed wires.					

Item	Description	Check	Value / Reading	Comments/Findings
56	Make that the load cells are securely mounted and mechanically aligned. Check mounting hardware for damage or loosening.			
57	Check and adjust the buffer stop to minimize weighing platform movement.			
58	Check the load cell seals and gaskets for moisture and debris.			
59	Check the load cell environment. Protect them from severe temperatures, moisture, corrosives, and vibrations.			
60	Check the load cells' mounting bolts, lock nuts, stoppers, and other mechanical protective measures.			

### LAUNDRY EQUIPMENT QUARTERLY INSPECTIONS - PRESS MACHINE

#### Note:

Three Monthly inspections must be conducted by the service provider.

Three Monthly inspections will include weekly inspection tasks.

Results and findings must be entered in the generator logbook and signed by the relevant operator/maintainer.

ASSET NUMBER	ELECTRIC/STEAM	
CHECKED BY	DATE	

Item	Description	Check	Value / Reading	Comments/Findings
1	Clean the weight indicator. Clean the outside with a soft, lint-free cloth or compressed air.			
2	Measure and record each load cell's input and output resistance after detaching it from the circuit. Resistance levels must be within the load cell datasheet's tolerance range.			
3	Check the weight indicator calibration regularly for accurate readings. Check the platform weighing scale's calibration using the manufacturer's instructions.			
4	Check power, load cell, and communications cables and connectors for wear and damage.			
5	Check cable routing and loose connections.			
6	Check the weight indicator calibration regularly for accurate readings. Check the platform weighing scale's calibration using the manufacturer's instructions			
7	Check the weight indicator power supply. Check for fluctuations that may impair performance.			
8	Check the weighing control unit grounding connection for electrical safety. Check the grounding wire.			
9	Check the weighing control unit cable glands.			

	<b>*</b>					
Item	Description	Check	Value / Reading	Comments/Findings		
10	Check that the excitation voltage, sensing voltage, and load cell output mV signal are stable and not dropping.					
11	Test the weight indication system's input, output, communication interfaces, and peripheral devices.					
12	Protect the weight indicator against high temperatures, moisture, and vibrations.  Maintain appropriate operating conditions and ventilation.					
13	Look for broken display or faded parts on the display. Test the keypad buttons to make sure they work.					
14	Check the junction box for cracks, corrosion, or loose connections.					
15	"Check junction box cables for wear, fraying and damage. To avoid strain and interference, route cables properly.					
16	Check the junction box's electrical connections (load cell cables, shield wire and main cable). Check for loose or exposed wires.					
17	Check the junction box gasket to verify it seals properly. This shields interior components from moisture and dust.					
18	To prevent dust, dirt, and other contaminants from affecting electrical connections or components, clean the junction box frequently.					
19	Check that the average card junction box terminals have consistent excitation voltage, sensing voltage, and load cell output mV signals without drops or variations.					
20	By measuring each mV load cell output and comparing it to the average circuit board's output, you can verify the board's average operation					
21	Check the junction box labelling and drawing for clarity and accuracy. This helps with maintenance and repair troubleshooting.					
22	Check the load cell junction box cable gland for tightness.					
23	Check the junction box for cracks, corrosion, or loose connections.					

Item	Description	Check	Value / Reading	Comments/Findings
24	Check junction box cables for wear, fraying and damage. To avoid strain and			
	interference, route cables properly.  Check the junction box's electrical			
25	connections (load cell cables, shield wire and main cable). Check for loose or exposed wires.			
26	Check the junction box gasket to verify it seals properly. This shields interior components from moisture and dust.			
27	To prevent dust, dirt, and other contaminants from affecting electrical connections or components, clean the junction box frequently.			
28	Check that the average card junction box terminals have consistent excitation voltage, sensing voltage, and load cell output mV signals without drops or variations.			
29	By measuring each mV load cell output and comparing it to the average circuit board's output, you can verify the board's average operation			
30	Check the junction box labelling and drawing for clarity and accuracy. This helps with maintenance and repair troubleshooting.			
31	Check the load cell junction box cable gland for tightness.			
32	Check the junction box for cracks, corrosion, or loose connections.			
33	Check the weighing platform for cracks, dents and twisted portions. Check the welding and structure.			
34	Keep the weighing platform clean. Remove buildup that could hinder accuracy or harm the platform regularly.			
35	Check the platform's level. Check for unevenness and adjust levelling feet with a spirit level.			
36	Check load cells for damage, corrosion, and loose connections. Check the load cells' mounting and alignment.			
37	Check the weighing platform's calibration with validated weights. To get correct readings, follow manufacturer's instructions or calibrate.			

Item	Description	Check	Value / Reading	Comments/Findings	
38	Lubricate the scale's moving parts according to the manufacturer's directions. Apply specified lubricants carefully and avoid load cells and weighing surfaces.				
39	Check the weighing scale platform mounting for stability.				
40	Check the weighing platform-to-indicator cables. Check for wear, fraying, and loose connections. Organize cables.				
41	Make sure the weighing surface is scratch-free, stable, and flat.				
42	Make sure there is no debris between the pit frame and the weighing platform.				
43	Check the weighing platform for cracks, dents and twisted portions. Check the welding and structure.				
44	Keep the weighing platform clean. Remove buildup that could hinder accuracy or harm the platform regularly.				
45	Check the platform's level. Check for unevenness and adjust levelling feet with a spirit level.				
46	Check load cells for damage, corrosion, and loose connections. Check the load cells' mounting and alignment.				
47	Check the weighing platform's calibration with validated weights. To get correct readings, follow manufacturer's instructions or calibrate.				
48	Lubricate the scale's moving parts according to the manufacturer's directions. Apply specified lubricants carefully and avoid load cells and weighing surfaces.				
49	Check the weighing scale platform mounting for stability.				
50	Check the weighing platform-to-indicator cables. Check for wear, fraying, and loose connections. Organize cables.				
51	Make sure the weighing surface is scratch-free, stable, and flat.				
52	Clean load cells. Remove any debris that may impede performance with a soft cloth or brush.				
53	Check load cells for fractures, corrosion, or deformation. Resolve concerns quickly.				

Item	Description	Check	Value / Reading	Comments/Findings
54	Check load cell cables for wear, fraying, or damage. Avoid strain and interference by routing and managing cables.			
55	Check all load cell electrical connections for tightness and exposed wires.			
56	Make that the load cells are securely mounted and mechanically aligned. Check mounting hardware for damage or loosening.			
57	Check and adjust the buffer stop to minimize weighing platform movement.			
58	Check the load cell seals and gaskets for moisture and debris.			
59	Check the load cell environment. Protect them from severe temperatures, moisture, corrosives, and vibrations.			
60	Check the load cells' mounting bolts, lock nuts, stoppers, and other mechanical protective measures.			

# LAUNDRY EQUIPMENT BI-ANNUAL INSPECTIONS – PRESS MACHINE

#### Note:

Six Monthly inspections must be conducted by the service provider.

Three Monthly inspections will include weekly, monthly, and quarterly inspection tasks.

Results and findings must be entered in a logbook and signed by the relevant operator/maintainer.

Item	Description	Check	Value / Reading	Comments/Findings
1	Check compressed air filters. Repair or replace if not draining properly.			
2	Check compressed air filters. Repair or replace if not draining properly.			
3	Clean the buck pad.			
4	Check the condition of the buck padding. Replace if worn, shrinks or lacks resilience.			
5	Clean lint, dust, and debris from around the machine			
6	Inspect press steam trap for proper functioning. A second trap is used with the optional electric iron attachment.			
7	Check to ensure that the sight-glass on the snubber is filled with oil. It is visible by removing any of the frame panels.			
8	Check to ensure that all warning and instructional labels are intact and readable. Replace as necessary for personnel safety			
9	Grease all grease fittings with high- temperature grease			
10	Apply a light coat of grease to the head closing piston rod to prevent rust.			
11	Check the machine's compressed air pressure gauge to ensure the regulator is set to the recommended pressure as specified by manufacturer			

Item	Description	Check	Value / Reading	Comments/Findings
12	Check the control system to ensure the press is operating correctly including all safety features. If any deficiencies are found, remove the machine from service			
13	Check for steam or compressed air leaks. Repair any leaks found			
14	Check for steam and compressed air leaks. If any leaks are found, make repairs immediately.			
15	Check the mechanical operation of the press to ensure it is working smoothly with no erratic actions or sounds. If any deficiencies are found, remove the machine from service and make repairs or adjustments immediately.			
16	Check and clean the head exhaust muffler
