No	Document	Notes from Proposal	Clarification	Response
1	**Clarification Meeting Presentation Slide 27**	**Document Handling** - Capability of a BPA tool to intelligently handle documents by reading, classifying and routing them to the stakeholders	How currently ESKOM is meeting AI Capability related requirements ?	This is a new requirement we are requesting from the market, and it's not currently deployed.
2	**Clarification Meeting Presentation Slide 26**	**Collaboration and Task Management** - Capability of the BPA tool to enable process stakeholders to collaborate with other stakeholders in support of achieving the desired business outcomes. Collaboration between process stakeholders may be facilitated through a variety of methods, including content-specific events related to annotations, redactions, or creation; real-time chat; case or process instance documents; co-browse sessions; or integration with telephony and video chat services.	How currently ESKOM is meeting these requirements ?	This is a new requirement we are requesting from the market, and it's not currently deployed.
3	**Clarification Meeting Presentation Slide 26**	**Continuous Intelligence -** real-time analytics, prescribe actions in response to business moments and other events. It provides decision automation or decision support.	Please share the detailed requirements on this as LCNC platform is a development platform with minimal analytics capability	This tender is asking for a BPA platform with LCNC as a feature, we aren't requesting for a specialist LCNC platform. BPA platform has analytics capability and that's a requirement for this tender.
