### KOMATI BASELINE RISK ASSESSMENT

DATE:

PROJECT NAME: HYGINE SERVICE

Hazard (potential)	Risk Type	Risk	Existing control measures
Electricity	Safety	Electrocution, shocks, burns.	Earth leakage conducted regularly. COCs in place. Inspect electrical tools before use.
Uneven surfaces	Safety	Trip and fall leading to injuries.	Be aware of your surroundings/where you are going. Follow cell phone usage procedure – do not walk and text.
Wet floor	Safety	Slip and fall leading to injuries.	Warning signs are placed on areas where the floor is wet or slippery or where cleaning is in progress.
Moving vehicles	Safety	Injury, fatality	Use designated pedestrian crossings and walkways.
Snakes	Safety	Exposure to Poisonous Snake bites could lead to severe injuries and fatality.	Report snakes to Eskom contract manager with immediate effect and should not lose sight of the snake until is retrieved/caught by emergency team.
Insufficient lighting	Safety	Slips, trips and knocking against structures because of poor visibility that will result in injuries.	Report areas with poor lighting to Eskom contract manager with immediate effect and do not enter the areas
Using of staircases	Safety	Trip, slip and fall leading to injuries	Maintain 3-point contact when climbing or descending stairs
Unfavourable road conditions e.g., potholes	Safety	Vehicle accidents which will result in injuries and/or property damage.	Potholes are barricaded. Maintain site speed limit
