## **SCOPE OF WORK**

Foskor is importing ammonia and discharging it to Bidvest Tank Terminals storage facilities. Before vessel discharge, product inspection, sampling, and lab testing must be conducted and reported to Foskor. The services of a SANAS-accredited provider are required with testing, inspection, and certification in handling ammonia.

### **Services**

#### **Inspection and Testing Services**

**The company is a business enterprise engaged in the trade of inspection. As such it-**

- Carry out inspections, examinations, tests, samplings, measurements, and similar operations.
- Issue reports and certificates relating to the aforesaid operations.
