Address Insert the physical address of the company			
Sender Insert the full name of the sender at the company			
Description of the works/goods/services	Maintenance, repairs, and verification of fume cupboards and extraction arms.		

1. Background:

Petroleum Sciences, Water, Microbiology and Coal laboratories are installed with the fume cupboards, extraction arms as a type of ventilation system with the primary function to exhaust chemical fumes, vapours, gasses, dust, mist, and aerosol. Fume cupboards also serve as physical barriers between reactions and the laboratory, offering a measure of protection against inhalation exposure, chemical spills, run-away reactions, and fires.

Objectives:

Laboratory fume and extraction arms are a type of ventilation system with the primary function to exhaust chemical fumes, vapours, gasses, dust, mist, and aerosol. Fume cupboards also serve as physical barriers between reactions and the laboratory, offering a measure of protection against inhalation exposure, chemical spills, run-away reactions, and fires. These have to be verified in order to ensure they are in good working order.
