1. Introduction

Eskom’s responsibility and commitment is to ensure a safe working environment is in line with its Safety, Health, Environmental and Quality Policy, along with legislative obligations.

This SHE specification is Eskom the minimum requirements which are required to be met for the specific contract and for the duration of the contract period by contractors and where required, the delivery organisation.

The contractor is expected to develop a SHE plan which meets these requirements as well as all the relevant applicable legislation they conform to.

Eskom in no way assumes the contractor’s legal responsibilities. The contractor is and remains accountable for the quality and the execution of his/her health and safety programme for his/her employees and appointed contractor employees.

This SHE specification reflects minimum requirements and should not be construed as all encompassing.

Note 1: All the requirements listed hereunder are in relation to the contract and do not supersede or replace any organizational SHE requirements.

Where requirements listed are already in place, then the organisational requirements must be taken cognisance of and listed in the respective SHE plans. If there are any additional Eskom and or legislative requirements listed in the SHE specification, then these must be addressed.

2. Supporting Clauses

2.1 Scope

This SHE specification lists the legislative and Eskom requirements and where applicable, any requirements pertaining to Local Authorities / Municipal by-laws / Environmental legislation that must be met by the contractor.

Public

		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

2.1.1 Purpose

This document will provide a standardised approach to the compilation of SHE specifications throughout Eskom for contracts, standards and NEC 3 contracts.

2.1.2 Applicability

This SHE specification is applicable to any contracting organisation who intends tendering for the contract.

		Review Date	October 2024		

Definition	Explanation
Health and safety specification	(OHS Act) means a document specification of all health and safety requirements pertaining to associated to a contract, so as to ensure the health and safety of persons.
Health and safety requirements	means comprehensive health and safety requirements for a contract, project, site, and scope of work. This specification is intended to ensure the health and safety of persons, both workers and the public, and the duty of care to the environment. The health and safety requirements must be specific to each contract, project, site, and scope of work
Lifesaving Rules	(240-62196227) a rule that, if not adhered to, has the potential to cause serious harm to people
Medical Certificate of fitness	(OHS Act) means a certificate valid for one year, issued by an occupational health practitioner, issued in terms of the regulations, whom shall be registered with the Health Professions Council of South Africa
Medical surveillance	(OHS Act) means a planned programme or periodic examination (which may include clinical examinations, biological monitoring, or medical tests) of employees by an occupational health practitioner or, in prescribed cases, by an occupational medicine practitioner
Method statement	(OHS Act) means a written document detailing the key activities to be performed in order to reduce, as reasonably as practicable, the hazards identified in any risk assessment
Organisation	may be defined as a group of individuals (large of small) that is cooperating under the direction of executive leadership in accomplishment of certain common objects
Pre-job meetings	(34-227) means a meeting that is held prior to the commencement of the day's work and that is attended by all the relevant employees associated with the work task
Principal contractor	(In the text of this document) Means an employer, as defined in section 1 of the OHS Act, who intends to tender for or has signed a contract with Eskom for services rendered.
Provincial director	(OHS Act) means the provincial director as defined in Regulation 1 of the General Administrative Regulations under the Act
Responsible Manager	Is a Manager of a department, section or operating/business unit who has been appointed as part of the Eskom delegation of authority process with the aim to assist the applicable 16(2) assigned person in executing his/her duties in terms of the Occupational Health and Safety Act

Definition	Explanation
Risk assessment	(OHS Act) means a programme to determine any risk associated with any hazard at a construction site in order to identify the steps needed to be taken to remove, reduce, or control such hazard.
Site	(34-228) means an Eskom department, unit, complex, building, specific project, work site, or the site where agents, clients, principal contractors, contractors, suppliers, vendors, and service providers provide a service to Eskom, directly or indirectly
Service provider	any private person or legal entity that provides any service(s) to Eskom for compensation
Subsidiary	(32-94) an enterprise controlled by another (called the parent) through the ownership of greater than 50% of its voting stock
Supplier	(32-1034) means a natural or legal person who renders a service and may include the following current or potential supplier vendor, contractor, consultant
Task	(34-227) a segment of work that requires a set of specific and distinct actions for its completion
Toolbox talks	(34-227) where the team leader, after conducting pre-task planning, shares all the tasks at hand and discusses task allocation, the identified risks, and the control measures with all his/her team members on site before commencing a specific task and documenting the agreed strategy. (This shall be done to ensure common understanding of the tasks, risks, and control measures required.)
The Act	(OHS Act) means the Occupational Health and Safety Act No. 85 of 1993, as amended, and the Regulations thereto
Visitor	any person visiting a workplace with the knowledge of, or under the supervision of, an employer.

2.5 Roles and Responsibilities

2.5.1 Commitment

Visible commitment is essential to providing a safe work environment. Managers, supervisors and employees at all levels must demonstrate their commitment by being proactively involved in the day to day operations, in particular the Occupational Health and Safety aspects of any project / contract. Legislation requires that each employee must take reasonable care of themselves and their fellow workers, from management level down to the lowest employee level.

2.5.2 Principal contractors and appointed contractors

Note 1: Most of the roles and responsibilities listed apply to both principal contractors and any appointed contractors. Where some of the listed do not apply to both, then the specific responsibilities will be listed and titled. The contractors shall:

1. Carry out all duties as listed in section 8, 9 and 10, the various other regulations that form part of the OHS Act and Regulation 7 of the Construction Regulations.
2. The principal contractor must notify the provincial director of the Department of Labour in writing of all construction work if it falls within the scope of Regulation 4of the Construction Regulations (if this has not been arranged and or done by the client/agent);
3. Carry accountability and responsibility for the safety and health of their employees and their appointed contractors within their working area, as contemplated by section 37(2) of the OHS Act;
4. Shall keep a record of all employees including the appointed contractor employees, including date of induction, relevant skills and licenses and be able to produce this list at the request of the Eskom Project Manager.
5. Ensure that all their appointees are made aware of their accountabilities and responsibilities in terms of their appointment and that they advise and assist these appointees in the execution of their duties.

		Review Date	October 2024		

6. Ensure that the minimum legislative, regulatory and Eskom SHE requirements are complied with on all work sites.
7. Give the Eskom project managers and line managers / responsible managers their full participation and cooperation.
8. Compile a SHE (health and safety) file where all relevant health and safety records must be kept for each work site.
9. The principal contractor must hand over a consolidated (to include any appointed contractors files) health and safety file to the Eskom project manager on completion of the project. This is to include all drawings, designs, lists of materials used and other applicable information about the completed project, as well as the list of appointed contractors, the agreement, and the type of work completed.
10. Contractors must hand over a consolidated (to include any appointed contractors files) health and safety file to the principal contractor on completion of the project. This is to include all drawings, designs, lists of materials used and other applicable information about the completed project, as well as the list of appointed contractors, the agreement, and the type of work completed.
11. The principal contractor must provide the project manager with a certified copy of his/her Compensation Commissioner's valid letter of good standing before the commencement of work and any future renewal letters obtained during the project for record-keeping purposes. The letter of good standing shall reflect the name of the contractor's company. Similarly, the principal contractor must provide the Eskom project manager with all the valid letters of good standing from their appointed contractors.
12. Contractors must provide the principal contractor with a certified copy of his/her Compensation Commissioner's valid letter of good standing before the commencement of work and any future renewal letters obtained during the project for record-keeping purposes. The letter of good standing shall reflect the name of the contractor's company.
13. Appoint competent staff to perform the project work and ensure that all employees are trained in the health and safety aspects relating to such work and that the

employees understand the hazards associated with all other work being carried out on the project.

14. Ensure that all employees are conversant with all relevant work procedures and that they adhere to such procedures. Similarly (without removing the appointed contractors' responsibilities), ensure that their appointed contractors and their employees are conversant with all relevant work procedures and that they adhere to such procedures.
15. Co-ordinate the activities of all the appointed contractors in the interests of safety and health;
16. Ensure that potential contractors (whom they intend appointing) submitting tenders have made detailed provision for the cost of safety and health measures throughout the project.
17. Stop his /her employees and any appointed contractors if project work is not in accordance with the health and safety plan or if such work poses a threat to the health and safety of persons or a risk of degradation to the environment.
18. Take reasonable steps to ensure cooperation between all their appointed contractors.
19. Only appoint contractors to do work, if satisfied that the contractor has the necessary competencies and resources to perform the work safely.
20. Appoint full-time competent employees in writing to supervise the performance of all specified work throughout the contract period.

Note 2: No work may commence and or continue without the presence of the appointed project manager or project supervisor during performance of the contracted work.

21. Ensure that the supervisor or manager do not supervise work on any site other than the site for which such supervisor has been appointed for.

Note 3: In determining the number of appointed competent supervisors, the nature and scope of work being performed, shall be taken into consideration.

months, if resulted in Eskom’s late payment.....

Requirements for Reaction Officers:

All Reaction Officers (RO’s) will be PSIRA registered (not lower than C grade) and have successfully passed the required PSIRA grading courses of armed response/CIT training. All ROs are required to read, write, and speak English. All security officers will have an up to date PSIRA registration cards on their person at all times or a certified copy of the PSIRA certificate.

Up to date criminal background checks results shall be provided to the Employer for all reaction officers working on the contract within 30 days of starting the contract.

The Employer shall require criminal checks to be done on Reaction Officers annually or when required by site Security Manager.

All supervisors and security officers provided by the armed response service providers must have received appropriate PSIRA and SASSETA training including weapons handling, radio communications, access control, armed response capability training.

The armed response Contractors will provide refresher training during the year .e.g. Reg. 21 training 2 x times per year.

All personnel of the armed response contractors must have received training, prior to deployment, on the site instructions and work procedures. The armed response contractors shall be required to provide attendance registers prior to deployment for each individual employee.

The armed response Contractors will maintain training records for each security officer and supervisor including failures and subsequent remedial training and requalification. These records will be made available to the Employer designated representative upon request.

The Employer representative has the authority to monitor, evaluate and audit all training delivered to the armed response Contractors.

The supervisors will arrange for weekly training on actions to be taken by the personnel of the armed response contractor in the event of incident, designed around **scenario-based** situations. ROs must be professional, friendly and helpful in the performance of their duties at all times.

The RO must provide proof that he/she is authorized by PSIRA to practice as a RO. The RO must display proof of identity on his person whilst on duty or while in uniform. The ID should be in form of a tag or laminated plastic card and should display the following: -

- I. Name
- II. Photograph
- III. Company name and telephone number
- IV. PSIRA registration number (personal)
- V. Cards expiry date
- VI. I.D Number
- VII. Blood Group
- VIII. Allergies

The RO must wear the company uniform while on duty together with clear indication by means of a badge or suitable insignia.

The RO must be issued with a SA MIX level 3 bullet proof vest to be **always worn** while on duty.

All response officers responding to the alarm activations must respond with vehicles that clearly display the company logos.

The officers must always be in possession valid firearm permit and a valid firearm competency certificate. The officers must always present a neat and presentable image.

The response officers deployed to the contract must Sign a declaration of secrecy prior to deployment on site.

The RO/s must have functional radio communication to the control Centre (fixed unit in the vehicle or mobile device), torches, pepper spray and handcuffs. There must be uninterrupted communication channels between the response officers and the control room/center for regular reporting and to obtain assistance when required.

The armed response Contractors will conduct radio checks at the start of each shift and periodically during each shift to ensure that equipment is functioning correctly, and guards are alert and monitoring their radios. The armed response Contractors must ensure back up communication aids is readily available.

All officers must be declared fit for duty, and the fitness and medical certificates must be

handed to the Employer prior to deployment.

All officers must be equipped with first aid kits for any emergencies, as well as cell phones, communication devices to use when required (call other members or law enforcement agencies or emergency units for back up)

Two armed officers (not lower than a grade C and trained in armed response duties) **must always respond to all alarm activations together.**

Conduct a thorough shift handover at each shift change ensuring that information and instructions are passed on to the next ROs and a detailed inventory is conducted of all weapons, ammunition, radios, keys and other equipment provided.

Armed Escorting - Ad hoc Service Only:

Ad hoc Services (consisting of an armed driver, armed crew member and a suitable vehicle) shall be required for escorting services on an “as and when” required basis.

Guards doing the armed escorting duties must have up dated competency certificates with strict adherence to the Firearms Control Act. The security officers performing these armed escorting and protection duties shall be armed and comply with the current Firearm Control Act, 2000 (Act No. 60 of 2000). All armed escorting officers must have a Valid PSIRA certificates in compliance to the PSIRA Act 2001 (Act No. 56 of 2001). All armed escorting officers must not be lower than Grade C.

Valid firearm permits issued by the authorized firearm control officer for TSP, Firearm Control Act, 2000 (Act No. 60 of 2000).

Accredited valid training certificates with results (Regulation 21), Firearm Control Act, 2000 (Act No. 60 of 2000).

Valid South African driver’s license (EB)

Level 3 bullet-proof vests handcuffs, batons, spotlight, torches with spare batteries, pocket books and pens, head protection.

A road worthy all-terrain vehicle, preferably a 4x2 suited for the terrain where Eskom employees will be travelling to. The vehicle must be equipped with a first aid kit and fire extinguisher.

The armed escort team/s must be in constant contact with a control room for regular reporting and to obtain assistance when needed. A proper register must be kept at the control room containing situation reports, incident reports and any communication with the armed escort team.

The armed escort team must do the escorting in a tactically sound manner:

- i. Possible ambush positions must be secured before the Eskom members being escorted are allowed to proceed through the position.
- ii. When the site where the Eskom members are to perform their duties is

3.2.2 Hazardous work by children (Child Labour)

The constitution of the Republic of South Africa, in the “Bill of Rights” is clear on the rights of children, especially when it comes to:

1. being protected from exploitative labour practices;
2. not to be required or permitted to perform work or provide services that
 - i. are inappropriate for a person of that child’s age; or
 - ii. place at risk the child’s well-being, education, physical or mental health or spiritual, moral or social development;

and the Basic Conditions of Employment Act, Chapter six Section 43 “Prohibition of employment of children”.

Before resorting to the use of child labour, due consideration must be given to the rights of the child in terms of the constitution. Where work is being performed which is not prohibited in terms of the constitution, then such work must be conducted in terms of the OHS Act “Regulations on Hazardous Work by Children in South Africa” with emphasis on paragraph 2 Purpose and Interpretation. Eskom does not condone the use of child labour and therefore all effort must be exercised and child labour should not be used.

3.2.3 OHS Act

The principal contractor and appointed contractors shall have an up to date copy of the OHS Act and regulations on site which will be available to all employees.

3.2.4 Legislative compliance

All contractors will comply with all the legislation pertaining to this contract being:

The principal contractor and all appointed contractors will comply with all the legislation pertaining to this project being:

- The Constitution of the Republic of South Africa (particularly Section 24 of the Bill of Rights).

3.3 Eskom Requirements

All contractors shall, before commencement of the project ensure that all their employees are familiar with the relevant Eskom SHE documentation that is applicable to contract services.

3.4 SHE Policy

SHE policy is a statement of intent and a commitment by the organisation’s CE and senior management in relation to the relevant SHE roles and responsibilities, the achievement of their strategic objectives, values of integrity, customer satisfaction, excellence, and innovation.

The principal contractor and all appointed contractors, if already not in place, will be required to compile an organisational SHE policy in line with their SHE responsibilities. The policy must be signed by the organisation’s CE or the appointed assistant to the CE OHS Act Section 16(2). The policy must be displayed in a prominent place within the workplace. A copy of the policy must be filed in the contractor SHE files and attached as an annexure in the SHE Plan.

3.5 COID

The principal contractor and all his/her appointed contractors shall be registered with an appropriate employment compensation commissioner and have available a valid letter of good standing (LoG) from such commissioner. The obligation lies with the contractors to ensure that the LoG remain valid throughout the contract period. A copy of the LoG must be filed in the contractor SHE files.

3.6 Costing for SHE within the Project

The costing for SHE must be itemised based on the overall scope of the project (i.e.) Training, provision of PPE, safety equipment purchases etc.

3.7 Statutory Appointments

For the duration of the contract, the principal contractor and all appointed contractors shall appoint competent employees who will meet the requirements of the OHS Act. Where appointments are made, contractors shall ensure that the appointees have been suitably trained and or informed of their responsibilities before getting them to accept such appointment. The relevant statutory appointments shall be made in accordance with the requirements of the OHS Act which includes the requirement of a competent person being appointed in the relevant roles. The statutory appointments should include but not limited to the following:

- OHS Act Construction Regulation 8(5) – Health and Safety Officer
- OHS Act General Administrative Regulation 9(2) – Incident Investigator
- OHS Act Section 19 (3) - Health and Safety Committee Member
- OHS Act Section 19(6)(a) – Co-opted Health and Safety Committee member
- OHS Act, Section 17 – Health and Safety Representative.
- OHS Act Construction Regulation 7(1)(V) Appointment of a Contractor (if appointing subcontractors)
- OHS Act Construction Regulation 9(1) - Person to Compile Risk Assessments
- OHS Act: Construction Regulations 24(e) Portable Electrical Equipment Inspector

		Review Date	October 2024		

- OHS Act: Construction Regulations 29(h) Firefighting Equipment Inspector
- OHS Act General Safety Regulations 3(4) – First Aider/s

3.7.1 Non-statutory appointments

- Eskom requirement – Emergency Planning Co-coordinator
- Eskom requirement - Chairperson of Health and Safety Committee

3.8 Eskom Life-saving Rules

1. Eskom reserves the right to permanently suspend any Security Officer from Eskom sites, who contravenes any of Eskom’s Life Saving Rules, or is to be found to be involved in criminal activities, or behaves or acts in a way that undermines the good discipline at any site, or is found to be grossly negligent in the performances of his/her duty.
2. Eskom views health and safety in high esteem and encourages that any organisation who performs work for Eskom in Eskom adopt the same view.
3. Five Life-saving rules have been developed that will apply to all Eskom Employees, agents, consultants, and **contractors**. Failure to adhere to these rules by any Eskom employee or employee of a Principal Contractor or appointed contractor will be considered a serious transgression. These rules are being implemented to prevent serious injury or death of any employee, labour broker or contractor working in any area within Eskom.
4. If any contractual work will be performed on any Eskom premises (including delivery of any product), then the rules **shall be obeyed** by any contractor and their employees.

The rules are:

RULE	DESCRIPTION OF RULE
Rule 1	OPEN, ISOLATE, TEST, EARTH, BOND, AND/OR INSULATE BEFORE TOUCH (That is plant, any plant operating above 1000 V)

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

		Document Identifier	NCOUSEC1	Rev	1	
		Effective Date	19 October 2023			
		Review Date	October 2024			

Rule 2	HOOK UP AT HEIGHTS Working at height is defined as any work performed above a stable work surface or where a person puts himself/herself in a position where he/she exposes himself/herself to a fall from or into.
Rule 3	BUCKLE UP No person may drive any vehicle on Eskom business and/or on Eskom premises: Unless the driver and all passengers are wearing seat belts.
Rule 4	BE SOBER No person is allowed to be under the influence of intoxicating liquor or drugs while on duty
Rule 5	PERMIT TO WORK Where an authorisation limitation exists, no person shall work without the required permit to work.

Eskom will take a stance of zero tolerance on these rules.

Non-compliance to a Life Saving rule will be considered serious misconduct and will lead to serious disciplinary action, which may include dismissal.

This is to ensure that **every person** who works on or visits an Eskom **returns home safely to his or her family.**

3.9 Substance Abuse

1. Alcohol and substance abuse poses a significant threat to any business, more so in industrial incidents and the driving of vehicles. Eskom is therefore, entitled to take reasonable steps to ensure that intoxicated persons are identified and prevented from entering Eskom.
2. General Safety Regulation 2A is clear on the legal stance regarding intoxication.
3. The alcohol and drug permissible level is 0%.

		Review Date	October 2024		

4. All contractors shall comply with Eskom’s procedure 32-37 (“Substance Abuse Procedure”), taking in to account that this is an Eskom Life-saving Rule number 4: BE SOBER”, this means anyone entering the Eskom will be subjected to ad hoc alcohol testing.
5. Contractors are encouraged to compile their own manual and to carry out regular alcohol testing of their own employees. The legislative alcohol level is deemed to be zero.
6. Test records must be treated as “Confidential” and filed in the employees’ personal file.

3.10 Contractor organisational Structure

3.10.1 Principal Contractor Organogram

The principal contractor must provide an organisational organogram related to this contract, depicting all the levels of responsibility from the CE down to the supervisors responsible for the contract. List the relevant positions held, names of appointees and legal appointments.

The principal contractor must ensure that all appointed contractors comply with this requirement. The principal contractor is responsible for keeping copies of all the organograms’ as well as submitting them with the SHE plan. All organograms shall be updated timeously when appointments are changed.

This diagram must be kept up to date and filed in the project SHE files.

3.10.2 Appointed Contractor/s Organogram

1. Appointed contractors are required to compile their company organogram for the project, listing the reporting structure from their CE down to their project supervisors. The diagram must list the names, positions held and any appointments made.
2. This diagram must be kept up to date, a copy of which must be given to the principal contractor and a copy filed in the relevant project SHE files.
3. This diagram must be kept up to date and filed in the project SHE files.

Public

		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

3.11 Risk assessment (refer to 32-520)

It is a legal requirement in terms of Section 8 (2)(d) of the OHS Act for an employer to carry out risk assessments, to establish which risks and hazards are attached to the health and safety of persons due to any work which is performed, any article or substance which is, handled, stored, transported. A risk assessment is defined as an identification of the hazards present in an organisation and an estimate of the extent of the risks involved, taking into account whatever precautions are already being taken.

It is essentially a three stage process:

- identification of all hazards;
- evaluation of the risks;
- Measures to control the risks.

Risk assessments are required to be maintained. This means that significant changes to a process or activity, or any new process or activity should be subjected to a risk assessment and that if new hazards come to light during the work process, then these should also be subjected to risk assessments. Risk assessments for long term processes should be periodically reviewed and updated. Method statements or written safe work procedures are an effective method as information and record of the way jobs / tasks must be performed. Daily or issue based or task specific or on the job risk assessments must be conducted at the place where work is to be performed/ conducted to allow managers and employees to assess any inherent risks that could have been overlooked during the initial risk assessment or any changes that might have occurred in a period of absence. For example if a job / task is extended over a day or halted due to inclement weather.

A site specific baseline risk assessment for the project need to be developed and approved by Eskom's safety practitioner prior to the start of any work. No contractor shall be allowed on site or allowed to start work without an acceptable baseline risk assessment and accompanying method statements.

The contractor needs to have an appointed competent risk assessor who can conduct these risk assessments.

Public

		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

3.12 Safe work procedures / method statements/ Standard operating procedures (SOP's)

There must be written safe work procedures for all activities, the safe work procedures must be aligned with the risk assessments.

The safe working procedure should identify:

- a. The supervisor for the task or job and the employees who will undertake the task;
- b. The tasks that are to be undertaken that pose risks;
- c. The equipment and substances that are used in these tasks;
- d. The control measures that have been built into these tasks;
- e. Any training or qualification needed to undertake the task;
- f. The personal protective equipment to be worn;
- g. Actions to be undertaken to address safety issues that may arise while undertaking the task.

Service Provider/ Principal contractor to provide and ensure Standard operating procedures that addresses (Emergency preparedness, Escalation process, Operational procedures, Control room procedures/ protocol, Patrolling/Guarding procedure, and driver risk procedure, provide standard operating procedure on shortage of staff, provide substance abuse policies in the workplace).

3.13 Fire Equipment and maintenance

1. All firefighting equipment's that have been provided shall:
 - a. Be clearly labelled
 - b. Conspicuously numbered
 - c. Entered in a register
 - d. Inspected monthly by a competent person
2. Tested and serviced at recommended intervals by an accredited supplier
3. Results entered in the register and signed by competent person.

3.14 First Aid and Equipment

1. The requirements of the OHS Act GSR 3 must be observed.
2. First aid appointments must be made to meet the requirements, this includes construction sites. Appointees must be trained to level 2. It is good practice for all employees to be trained to at least level 1.
3. When appointing employees for work sites, cognisance must be taken into account the type of work performed, the distance teams are working apart and the terrain to be covered if an emergency should arise.
4. A list of emergency numbers must be displayed on the notice boards and made accessible for all employees.
5. Principal Contractor must ensure that his /her employees and appointed contractor employees are familiar with the emergency numbers.
6. Contractors shall have one first aid box for the first 5 persons and thereafter one for every 50 or team of workers on site or part thereof, taking into account the type of work performed and the distance between teams.
7. More first aid boxes shall be provided in accordance with the risk assessment. Boxes must be available and accessible for the immediate treatment of injured persons at the workplace.
8. For offices, signs indicating where the first aid box or boxes are kept as well as the name and contact details of the First Aider of such first aid box or boxes shall be erected.
9. The Principal Contractor and appointed contractor shall ensure that alternative arrangements be made for incidents occurring after working hours.

3.14.1 Boxes and equipment

The following is a list of minimum contents of a first aid box:

- Item 1: Wound cleaner/antiseptic (100ml).
- Item 2: Swabs for cleaning wounds.
- Item 3: Cotton wool for padding (100 g).
- Item 4: Sterile gauze (minimum quantity 10).
- Item 5: 1 Pair of forceps (for splinters).

		Review Date	October 2024		

- Item 6: 1 Pair of scissors (minimum size 100 mm).
- Item 7: 1 Set of safety pins.
- Item 8: 4 Triangular bandages.
- Item 9: 4 Roller bandages (75 mm X 5 m).
- Item 10: 4 Roller bandages (100 mm X 5 m).
- Item 11: 1 Roll of elastic adhesive (25 mm X 3 m).
- Item 12: 1 Non-allergenic adhesive strip (25 mm X 3 m).
- Item 13: 1 Packet of adhesive dressing strips (minimum quantity, 10 assorted sizes).
- Item 14: 4 First aid dressings (75 mm X 100 mm).
- Item 15: 4 First aid dressings (150 mm x 200 mm).
- Item 16: 2 Straight splints.
- Item 17: 2 Pairs large and 2 pairs medium disposable latex gloves.
- Item 18: 2 CPR mouth pieces or similar devices.

A content check list must be available with all boxes and boxes shall be checked on a regular basis, kept clean and dust free.

3.15 SHE Communication Systems

Principal Contractor/s and their appointed contractors must develop a communication strategy outlining how they intend to communicate SHE issues to their staff, the mediums they will employ and how they will measure the effectiveness of their SHE communication. Below is a brief on how communication should take place. Where project meetings are conducted on site, SHE shall be included as a standing agenda point and minutes of these meetings shall be available on site at all times. Minutes of meeting must be compiled and filed in the relevant SHE files. All employees shall have access to these minutes. Attendance register shall be kept for all the health and safety meetings.

Additional communication requirements:

- Service providers personnel must be able to communicate fluently in English (Writing and verbally)
- Patrolling guards must be in constant contact at all times to ensure safe and effective service delivery

- A reliable panic button must be issued to guards on site. The panic button must be linked with the Service providers Control room.
- Service provider to supply cell phones (Adequate airtime must be available on company cell phones), or radio communication to each site for communication between the Service providers Control room and guards
- Communication between Control room and guards must be adequate, reliable and sustainable
- Whatever means of communication is used; it must have a reliable panic button function. Eskom
- Reserves the right to test the communication at any random time

3.15.1 Statutory Health and Safety Committees

1. The principal contractor shall establish statutory health and safety committee in terms of Section 19 of the OHS Act, Act. Similarly, appointed contractors shall establish their own statutory health and safety committee.
2. All appointed contractors shall be members of the principal contractor's safety committee.
3. The Committee shall meet to discuss SHE issues concerning the current work being performed, training, upcoming work and SHE requirements, incidents and lessons learned specific SHE problems, safety performance, action plans and other relevant SHE issues. Listed below is a preferred agenda.
4. SHE representatives for a workplace shall be members of the relevant workplace safety committees (Refer to Section 19 (2) (a) of the OHS Act).
5. The number of persons nominated by employer must not be more than the Health and Safety Representatives on that specific statutory health and safety committee. (Refer to Section 19(2)(c) of the OHS Act)
6. A statutory health and safety committee meeting shall be held at least 3 monthly (where medium to high risk work is involved, more frequent if required), and all appointed members of the committee shall attend the meeting.
7. Statutory health and safety committees may make recommendations to the principal contractor and the project manager and the Inspector at DoL.
8. All health and safety committees shall discuss all projects related OHS Act Section 24 and 25 incidents and other notified serious incidents.

Public

		Review Date	October 2024		

9. Health and safety committees shall follow up on incident investigation recommendations and shall keep record of all recommendations made by the committee.
10. Statutory health and safety committees may make recommendations for the revision of current standards, procedures and practices.
11. The principal contractor and appointed contractors shall ensure that statutory and non-statutory health and safety committees carry out their duties.
12. The chairperson of the health and safety committees shall be selected and appointed by the contractor. The appointed chairperson must be competent to chair meetings and be able to make informed decisions.

3.15.2 Non-statutory health and safety committees

1. Where there are large worksites, then non-statutory sub-committee must be established within that worksite to assist with the communication of health and safety related matters between the statutory health and safety committee and the workplace.
2. The duties and responsibilities of the non- statutory health and safety committees will be the same as the statutory safety committee

3.15.3 Agenda

1. The following serves as the guideline for the SHE Committee meeting agenda.
 - List of agenda items:
 - Matters arising from previous minutes
 - Matters arising from Contractor’s SHE meetings.
 - Audit results and feedback
 - Review Health and Safety Representative Inspection Reports
 - Review
 - Incident investigation reports
 - Non-Conformances
 - Announcements (near miss/injury/damage)

		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

1. Minutes and record of action items shall be kept of all health and safety committee meetings.
2. Action column with target dates and responsible person shall be clearly visible on the minutes and shall be completed during the meeting.
3. Statutory health and safety committee meeting minutes and record of action items shall be kept for the duration of the project or a minimum period of three years.
4. Non-statutory health and safety committee meeting minutes shall be kept for the duration of the project or a minimum period of 12 months.
5. All other meeting minutes where SHE is on the agenda, shall be kept for a minimum period of 12 months.
6. The original copy of the minutes and record of the action items must be signed by the chairperson.
7. The relevant project manager and principal contractor shall endorse the relevant minutes with his/her recommendations and return the minutes to the relevant contractors chairperson within 14 calendar days of the meeting.

3.15.5 Daily team talks / pre job meetings

1. A meeting must be held prior to the commencement of the day's work with all relevant personnel associated with the work task in attendance. The job, relevant procedures, associated hazards, safety measures, i.e. the task risk assessments shall be discussed. Each employee who attends the briefing shall sign an attendance list of that pre-job brief form undertaking that they have an understanding of the tasks, risks and control measures required.
2. Where possible, tool box talks can be included in the pre-job brief meetings. If this does not occur, then weekly tool box talks must be conducted. The toolbox talk topics will be based on SHE issues pertaining to the construction site and or the project. The topic contents shall be in writing. Attendance registers with the topic listed shall be kept.

3.16 SHE Training

1. The principal contractor, when making a bid for this project shall provide a breakdown list of the SHE training requirements and the costing of such

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Holdings SOC Ltd, Reg No 2002/015527/30.

		Effective Date	19 October 2023		
		Review Date	October 2024		

requirements. Similarly, appointed contractor must provide the same requirements when bidding with the principal contractor.

2. The scope of training includes but is not limited to the type of work being performed and the relevant procedures. Additional to the requirements, will be that the principal contractor and appointed contractors must have the appropriate qualifications, certificates and employees should always be under competent supervision.
3. Where legislative and Eskom recommended appointments are made, the relevant training shall be given to those appointees prior to the acceptance of those appointments.
4. When there is an amendment to the Acts and/or to the regulations, SHE specification and SHE plan, all affected staff shall undergo the applicable refresher training.
5. Appropriate time must be set aside for training (induction and other) of all employees.
6. Records of all training and qualifications of all contractor employees must be kept on the SHE file.
7. Service providers Security Officers deployed at Eskom sites, as part of this Contract, must already be trained In First aid and Firefighting before they are deployed at any Eskom site in the NCOU.
8. Minimum training can include but are not limited to:
 - a. First aid level 2 –First aider
 - b. Firefighting – Fire equipment inspector and Fire fighters
 - c. Hazard identification and risk assessment techniques (HIRA) – Risk assessor
 - d. Incident investigations and RCAT – Incident investigator
 - e. Safety representative training – Safety representatives
 - f. Certificate in Safety Management (E.g. SAMTRAC) – Safety officer registered with SACPCMP

3.16.1 Induction training

1. The principal contractor shall ensure that all his / her employees, appointed contractors and their employees have undergone the Eskom Safety Contractor Management induction training prior to commencing work on site.
2. Attendance registers must be completed of any induction training given, which must indicate that they have received and understood the induction training.

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

		Document Identifier	NCOUSEC1	Rev	1	
		Effective Date	19 October 2023			
		Review Date	October 2024			

3. Prior to attending the induction training, all employees must undergo a pre-employment medical examination and found fit for duty. A copy of the certificate of fitness must be kept in the SHE file on site for the duration of the project.
4. All employees and visitors on site shall carry the proof of induction training.

3.16.2 Site specific induction training

The principal contractor shall ensure that all his / her employees and appointed contractor employees undergo site specific work induction with regard to the approved project SHE plan, general hazards prevalent on the construction site, construction risk assessment, rules and regulations, and other related aspects. The induction training should also include identification of sensitive features such as wetlands/vlei areas, red data species, graves, etc.

3.16.3 General training

The principal contractor will be required to ensure that before an employee commences work on the project, the respective supervisor informs the employee of his scope of authority, the hazards associated with work as well as the control measures to be taken. This will include man-job specifications, the discussion of any task procedures or hazardous operational procedures to be performed by the employee. The Principal Contractor is to ensure that the supervisor has satisfied himself that the employee understands the hazards associated with any work to be performed by conducting task/job observations.

3.17 Vehicle safety

1. It is the responsibility of the driver to ensure:
 - a. Their passengers wear seat belts whilst the vehicle is in motion.
 - b. Comply with all traffic road rules, safety, direction and speed signs.
 - c. Ensure that vehicle loads are properly secured prior to moving off.
 - d. Ensure that vehicles are not overloaded.
2. No drivers or operators may text, talk on cell phones or two-way radios whilst driving, unless a hands free kit is used.

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

		Review Date	October 2024		

3. All drivers of vehicles are to have valid medical fitness certificates from an OHP.
4. Contractor must maintain their vehicles in a roadworthy condition and a vehicle license must be valid at all times.
5. Drivers of light vehicles must avoid stopping or parking in the vicinity of machines. At least 30 (thirty) meters must be left clear between such a vehicle and such a machine
6. Contractor vehicles can be subject to inspections by the Client/Agent's representative. Vehicles which are not roadworthy will not be permitted to be used on the project.
7. Drivers/operators shall be responsible for the travel-worthiness of all loads conveyed by them. Precautions shall be taken to secure all loads properly. Loads projecting from vehicles shall be securely loaded and in daytime a red flag and during darkness a red light or red reflective material shall be attached to the extreme end of such projecting material.
8. No persons shall be permitted to ride on the back of an LDV.
9. All vehicles provided for use on the project need to comply with Eskom Standards, Procedures and Specifications.
10. A LDV vehicle with a vehicle monitoring device shall be utilised by the Contractor Security Supervisor, when doing the required site visits at the various sites, listed in the NEC.
11. The monitoring device data needs to be downloaded and analysed on a weekly basis and where abuse or misuse of the vehicles are evident from the data, action should be taken against those individuals. Proof of downloaded and analysed data as well as action taken against transgressing individuals should be made available on a monthly basis to Eskom contracts manager as well as for audit and inspection purposes. Hard copies of Suppliers Senior Supervisors monthly trip sheets must be submitted to Eskom's Security Operations Officer at the end of each month before signing off of invoices, for audit purposes.

3.18 Housekeeping and Order

1. All contractors shall maintain a high standard of housekeeping within their sites and vehicles for the duration of the project.

		Effective Date	19 October 2023		
		Review Date	October 2024		

2. Prompt disposal of waste materials, scrap and rubbish is essential. Sites to be kept neat and tidy. Service provider to provide WEEKLY rubbish bags at ALL substations for rubbish and must remove bags on weekly basis.
3. Materials/objects shall not be left unsecured in elevated areas –falling objects may cause serious injuries/fatalities.
4. Nails protruding through timber shall be bent over or removed so as not to cause injury.
5. All packaging material including boxes, pallets, crates, etc. to be removed from the work area immediately.
6. On completion of his / her work, the contractor is responsible for clearing his / her work area of all materials, scrap, temporary buildings and building bases to the satisfaction of the client/agent.
7. In cases where an inadequate standard of housekeeping has developed, compromising safety and cleanliness, anyone has the responsibility to bring it to the attention of the principal contractor in the first instance and the Eskom project/site manager in the second instance.
8. The Eskom Project/Site Manager has the right to instruct the principal contractor and appointed contractors to cease work until the area has been tidied up and made safe. Neither additional costs nor extension of time to the contract shall be allowed as a result of such a stoppage. Failure to comply with this requirement will result into site cleaning by another cleaning contractor company at the cost of the principal contractor.
9. The principal contractor shall carry out regular safety/housekeeping inspections (at least weekly) to ensure maintenance of satisfactory standards. The principal contractor shall document the results of each inspection and shall maintain records for viewing.

3.18.1 Stacking

1. Before stacking any material, the contractors or their employees must consult the contract manager for authorisation to use such an area for stacking purposes. This is to prevent haphazard arrangements.
2. Adequate care must be taken by the contractor to ensure that storage and stacking is carried out correctly and safely.
3. Correct shelf stacking must be carried out, heavy and bulky on the bottom, light and small on top.

		Review Date	October 2024		

3.19 Workplace Signage and Colour Coding

1. Symbolic safety signage shall be displayed where it is required by legislation.
2. All symbolic safety signage shall conform to the requirements of SANS standard 1186.
3. Signs shall be positioned to be seen from most positions within the work sites / areas.
4. All signage must be clear at all times and be replaced timeously when worn out.
5. The location of every first aid box; fire extinguisher and emergency exit is to be clearly indicated by means of a sign.
6. Contractors shall provide signage where work is conducted and where unauthorised entry is prohibited and/or where alerting and cautioning passers-by to be aware of potential dangers.
7. The meanings of the appropriate symbolic signage must be discussed during induction training and toolbox talks.
8. Where possible, within workshops, work areas and established premises, the appropriate sign indicating the meaning of symbolic safety signs must be displayed.

3.20 Tools and Equipment

1. Contractors shall ensure that all tools and equipment are identified, safe to be used and is maintained in a good condition.
2. Contractors shall ensure that all tools and equipment are listed on an inventory list, be regularly inspected at least monthly or as required by legislation and risk assessments. The equipment should be numbered or tagged so that it can be properly monitored and inspected.
3. Where applicable, tools and equipment must have the necessary approved test or calibration documentation prior to being brought onto the project and the records shall form part of the SHE plan. Maintenance calibration shall be undertaken in terms of the manufacturer's requirements.
4. All fuel driven equipment must be properly maintained in accordance with the manufacturer's recommendations and legal requirements.

		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

5. Eskom reserves the right to inspect tools or items of equipment brought to site by contractors for use on this project.
6. Should Eskom personnel find any item that is inadequate, faulty, unsafe or in any other way unsuitable for the safe and satisfactory execution of the work for which it is intended, the Eskom personnel shall advise the contractor in writing and the contractor shall forthwith remove the item from site and replace it with a safe and adequate substitute.

Note: In such cases, the contractor shall not be entitled to extra payments or extensions of time in respect of delay caused by Eskom’s instructions.

7. Where defective tools and equipment’s are identified, such tools and equipment shall be removed out of site immediately, locked away to prevent further use until such time as the tool or piece of equipment has been repaired.
8. Contractors shall ensure that the appropriate records are kept for all tools and equipment used on the project. Such tools and equipment’s shall be subjected to regular inspections.

3.21 Auditing

3.21.1 Approval and compliance of principal contractor SHE plan

The Contractor’s SHE Plan will be audited against compliance checklist so as to verify compliance to the requirements of the Eskom SHE specifications. Once there is compliance only then will the principal contractors SHE plan be approved by the project manager or an appointed Eskom contract custodian. The implementation of the SHE Plan shall be assessed / audited by Eskom personnel on a regular basis. This will include physical conditions evaluation.

3.21.2 Eskom SHE audits

Eskom shall evaluate all contractors’ SHE performance on an ongoing basis against the legal, Eskom requirements, SHE specification and the contractors SHE plans.

Note: Eskom reserves the right to conduct unannounced audits on contractors

There will be monthly audits conducted by Eskom on the principal contractor/s and/or appointed contractors. These audits shall be attended by the contractor’s site manager or his representative.

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

		Effective Date	19 October 2023		
		Review Date	October 2024		

If there are any findings / non-compliance identified as serious in these audits, an activity will be stopped for that specific Principal Contractor and appointed contractor. Refer to section on “Work Stoppage” in this SHE Specification.

3.21.3 Contractor audits

Principal Contractors are required to conduct internal audits on both their employees and their appointed contractors on the implementation of their SHE Plan on a monthly basis or when the scope of work changes. A summary of the findings and the proposed corrective actions shall be submitted to Eskom project manager within one week after completion of the audit. Where appointed contractors are audited by the principal contractor a copy of the audit report shall be submitted to the appointed contractor within 7 days of the audit.

3.22 Smoking/ Open Fires

The Tobacco products control act 83 of 1993 must be observed and smoking is permitted in designated areas only (Eskom Smoking Procedure 32-36).

No open fires will be allowed on site.

3.23 Cellular Phones

The national requirements regarding the use of cellular phones must be observed, in particular when driving and or operating mobile equipment and or machinery.

3.24 Occupational Health, Hygiene and Rehabilitation

All contractors are required to develop an Occupational Health, Hygiene and Rehabilitation program. The program is intended to ensure that the risks to health are identified and controlled.

3.24.1 Medicals

Note: Eskom will only accept medical surveillances conducted by an Occupational Health Practitioner who holds a qualification in occupational health.

1. Principal contractors must ensure that all their employees and their appointed contractor employees have a medical surveillance program whereby their employees under go entry, periodic and exit medical fitness examinations.

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

		Review Date	October 2024		

2. In order for the appropriate medical examinations to be conducted, each employee must have a man job specification, which must indicate the description of work, list of hazards and potential occupational exposure limits, physical hazards and required physical attributes.
3. Medical fitness certificates shall be renewed annually for employees who are working on site. This shall be maintained until completion of the contract.
4. The Principal Contractor must ensure that his / her employees and appointed contractor employees have undergone pre-entry medical examination before starting work on the contract.
5. The principal contractor shall provide a documented process for managing those employees who are issued with a conditional certificate of fitness.
6. Service provider/ Principal contractor to submit annual updated medical certificates of all guards posted at Eskom sites in the Northern Cape Operating Unit

3.25 Risk Assessments

It is a legal requirement in terms of Section 8 (2)(d) of the OHS Act for an employer to carry out risk assessments, to establish which risks and hazards are attached to the health and safety of persons due to any work which is performed, any article or substance which is, handled, stored, transported. A risk assessment is defined as an identification of the hazards present in an organisation and an estimate of the extent of the risks involved, taking into account whatever precautions are already being taken. It is essentially a three stage process:

- identification of all hazards;
- evaluation of the risks;
- Measures to control the risks.

Risk assessments are required to be maintained. This means that significant changes to a process or activity, or any new process or activity should be subjected to a risk assessment and that if new hazards come to light during the work process, then these should also be subjected to risk assessments. Risk assessments for long term processes should be periodically reviewed and updated. Method statements or written safe work procedures are an effective method as information and record of the way jobs / tasks must be performed. Daily or issue based or task specific or on the job risk assessments must be conducted at the place where work is to be performed/ conducted to allow managers and employees to

Public

		Effective Date	19 October 2023		
		Review Date	October 2024		

assess any inherent risks that could have been overlooked during the initial risk assessment or any changes that might have occurred in a period of absence. For example if a job / task is extended over a day or halted due to inclement weather.

A site specific baseline risk assessment for the project need to be developed and approved by Eskom’s safety practitioner prior to the start of any work. No contractor shall be allowed on site or allowed to start work without an acceptable baseline risk assessment and accompanying method statements.

The contractor needs to have an appointed competent risk assessor who can conduct these risk assessments.

3.26 Safe Work Procedures and Practices / Safe Operating

There must be written safe work procedures for all activities, the safe work procedures must be aligned with the risk assessments.

3.27 Personal Protective Equipment Requirements

1. The Principal contractor must provide a detailed programme that includes the issuing, maintenance and replacement of PPE for all his employees and appointed contractors on site.
2. All contractors shall comply with the requirements of GSR 2 of the OHS Act.
3. The risk based PPE matrix must be compiled detailing the types of PPE that is required to be issued to employees performing the respective tasks.
4. Where there are unusual instances where particular activities require additional type of PPE, then a risk assessment must be conducted where such PPE requirements will be identified and the issuing be carried out. Take note that COVID-19 and Asbestos sections of this SHE specifications does have additional PPE requirements due to the hazards involved.
5. All contractors shall ensure that their visitors wear and use the correct PPE whilst on worksites.
6. Where PPE is required and visitors are not in possession of, then it is the individual contractor’s responsibility to provide the PPE.

Public

		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

7. All PPE purchased and used by all contractor employees including visitors must comply with the relevant SANS standards and No R. 1250: Basic Conditions of Employment Act: Sectoral Determination 6: Private Security Sector, Section 19. Weapons, uniforms, overalls and protective clothing.
8. Where deemed as a requirement, then high visibility vests shall be worn.
9. PPE could include but are not limited to:
 - Reflective vests, handcuffs, bulletproof vests, uniform, boots, baton, pepper spray, torch.

3.28 Incident Investigation

All incidents shall be investigated in terms of OHS Act General Administrative Regulations 8 and 9, using Eskom Procedure 32-95 as a reference, and where injuries as contemplated in sections 24 and 25 have been sustained, be reported to the Department of Labour.

Contractors shall use the standard General Administrative Regulation Annexure 1 “Recording of an Incident” form for all incident investigation reports. The objective of incident investigation, should not only be a legal requirement, but should establish why and how the incident occurred and find out the real root cause of the incident and to decide on precautionary measures that are required to address the root cause to prevent any further recurrences of the same or similar incidents.

The contractor incident management procedure need to be aligned to Eskom’s 32-95 incident management procedure and timeline must be strictly adhered to.

The high level steps of the incident management procedure are as follows:

1. Incident identification
2. Initiation and Execution of Emergency Response
3. Notification and Reporting
4. Incident prioritisation
5. Classification and Recording of Incidents
6. Incident investigation
7. Management of Corrective Actions (Safety Measures)
8. Incident close-out
9. Incident Communication

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Holdings SOC Ltd, Reg No 2002/015527/30.

	THE PROVISION FOR SECURITY GUARD SERVICES for NCOU (Upington Zone – Kalahari Sector) HIGH RISK PROJECT	Template Identifier	240-73416879	Rev	2
		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

Timelines with regards to incident management need to be strictly adhered to as per 32-95 Occupational Health and Safety Incident Management Procedure and 240-131838225 Occupational Health and Safety Incident Management Definitions and Classification Parameters.

Failure to comply with these requirements will be seen as the contractor not fulfilling their contractual obligations and the relevant consequence management actions will be taken against contractors who do not comply.

Timelines include:

1. Notification of incident to relevant Eskom SHEQS department should be done before the end of shift or within 24 hours of the incident occurring.
2. Investigation process to be initiated within 48 hours and concluded within 30 calendar days. The onus is on the contractor manager to provide evidence for the reasons why the Internal OHS Investigation could not be completed within 30 days and should be submitted to the relevant SHEQS department.

In the case of incidents involving contractor employees, the contractor must investigate those incidents as an employer in his/her own right (employer’s investigation) and generate a report. The report and Annexure 1 must be submitted to the applicable OU/BU or on request to the Department of Labour by the contractor. Eskom may participate during these investigations.

3.29 Emergency Management

The art of emergency preparedness and response is to minimise the effects of any emergency and to restore normal activities as soon as practical. The contractor must familiarise themselves with the Eskom emergency response plan and procedure. Periodic emergency drills must be undertaken to test the effectiveness of the plan. This must be recorded and provided to the Eskom SHEQS department for evaluation in the site specific safety file.

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Holdings SOC Ltd, Reg No 2002/015527/30.

	THE PROVISION FOR SECURITY GUARD SERVICES for NCOU (Upington Zone – Kalahari Sector) HIGH RISK PROJECT	Template Identifier	240-73416879	Rev	2
		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

The emergency management procedure to be submitted has to include emergency contact numbers relevant to the area worked in for the site supervisor, hospital, fire brigade, first aider.

The emergency plan must make provision for adequate communication devices to ensure effective notification and response can take place. Communication devices can include but are not limited to PTT's (Push to talk) and panic buttons.

If no cell phone reception is present for example in remote areas, an adequate process must be put in place to have adequate alternative communication.

3.30 Non-Conformance and Compliance

1. Any non-compliance to any health and safety requirement in this SHE specification is subject to discipline in terms of the Eskom Procurement and Supply Management Procedure.
2. Principal contractors are required to implement a non-conformance procedure (if not already in place) for issuing to contractors for transgressions. The procedure can include "quality" related non-conformance issues. Similarly, appointed contractors must implement a non-conformance procedure.
3. The procedure for the issuing and closing off of non-conformance reports shall be strictly adhered to.
4. Contractor project management must monitor the close out non-conformances issued, in not doing so; any recommendations made may not be implemented.
5. Where non-conformances are issued by Eskom then one of the close-out steps of the procedure will be for the offender to be called by the responsible project manager to explain the non-conformance issued and what plan is in place to prevent a recurrence of the non-conformance.
6. Should the contractor fail to provide adequate PPE to their employees for the tasks being performed and/or to visitors; failure to enforce the wearing of such PPE will be viewed as a transgression of the legislative and Eskom requirements.
7. After a contractor has been appointed a site specific safety file needs to be developed and submitted to the Eskom SHEQS department for evaluation. No

Public

		Effective Date	19 October 2023		
		Review Date	October 2024		

contractor may commence with work before the site specific safety file is accepted and the site specific procedures are adhered to.

8. If a safety file reaches 80% compliance the contractor may enter the site under certain conditions. The sections of the file that is not approved may have a knock on effect on operations whereby certain duties may not commence due to the safety file requirements not being met. The sections of the file that is not approved on, work cannot commence.

9. Eskom reserves the right to stop any contractor performing unsafe work/conditions and can apply consequence management if any contractor fails to comply with any Legislative requirements as well as any Eskom Requirements, Standards and Procedures. Refer to 32-726 SHE Requirements for the Eskom Commercial Process Section 3.1.4.4.

10. Should Eskom personnel find that the site specific safety file is unsatisfactory, the process in Section 3.1.4.5 of 32-726 SHE Requirements for the Eskom Commercial Process shall be initiated.

3.31 SHE File

1. A SHE file means a file or other record in permanent form, containing the information about the safety and health management system during project duration so that the client can maintain the works in a healthy and safe way.
2. All contractors are required to keep a SHE file on site. The SHE file shall be maintained by all the contractors on their sites and shall be available on request for audit and inspection purposes.
3. The SHE file shall consist of the requirements in terms of the project's safety specification, the contractor's safety and health plans.
4. The sequence of filing the documentation must be kept in the same sequence as listed in this SHE specification and the SHE plan.
5. Each record shall be separated by partitions to afford easy identification and access. Each partition must be labelled.

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

6. On completion of the project, the principal contractor must hand over a consolidated health and safety file to the project manager. The principal contractor must also hand over applicable information about the list of subcontractors, the agreement, and the type of work completed.
7. In case where the project is extended, should the documentation in the SHE files become cumbersome, the older documentation must be archived in boxes which shall be correctly labelled and be available for auditing purposes. The archived documentation must be handed over at the completion of the project.

3.32 Work Stoppage

1. Any person may stop any activity where an unsafe act or unsafe condition that poses or may pose an imminent threat to the safety and health of an individual or create a risk of degradation of the environment. This includes any unauthorised work or service performed by, or legally or contractually non-compliant acts or omissions by, any contractor contracted to work at that site.
2. Work stoppages that are initiated due to SHE concerns, non-compliance, or poor performance related to the contractor's works or services shall not warrant any financial compensation claim lodged against Eskom where the contractor has not met the requirements defined legally or contractually.
3. Where stoppages are carried out, the required non-conformance report shall be raised.
4. All work stoppages ideally should be investigated and documented by contract custodians.

3.33 Hours of Work

The requirements of the Basic Conditions of Employment Act, Chapter Two "Regulation of Working Time" must be adhered to. All contractors are required to maintain an accurate record of time worked by each employee.

Adherence to No R. 1250: Basic Conditions of Employment Act: Sectoral Determination 6, Section 5 Ordinary Hours of Work, Overtime and Payment for Overtime.

3.33.1 Normal work

All work conducted on site shall fall within the legal requirements in accordance with the Basic Conditions of Employment Act. Contractors will notify their Eskom Supervisor or project manager of any work that needs to be performed after hours according to the agreed

Public

		Review Date	October 2024		

arrangements. (The application needs to be submitted timeously). Where applicable, the notification should include proof of application, for overtime, to the Department of Labour and /or the letter of approval from the Department of Labour.

3.33.2 Night work

When night work is to be performed; contractors shall provide sufficient lighting to enable the entire work site to be illuminated to a degree that employees will not work in dark (un-illuminated) or dimly lit areas. Care must be exercised as not to use few lights with high light intensives as this will cause night blindness.

If work is continuing from day light into night, at dusk, a tool box talk must be held where all employees will be advised of the hazards of night work and the extra precautions which require to be taken, i.e. poor housekeeping, stepping on uneven ground, stepping into holes etc.

The Service provider will NOT deploy female Security Officers on night shifts at any Eskom site, which is part of this Contract. This requirement will be strictly applied by Eskom

All flashlights to be charged and I good working order, if flashlights are not working they should be reported and immediately replaced before night work commences.

3.33.3 Overtime

When overtime is required to be performed, the appointed contractors shall inform the principal contractor of such action. The principal contractor shall inform the Eskom project manager of such function. Contractors shall be aware of the effects of human fatigue and regulate overtime accordingly. The baseline risk assessment must be reviewed to include the management of overtime work.

Guards will not be allowed to work double shifts.

3.34 Omissions from Safety and Health Requirements Specification

By drawing up this SHE specification Eskom has endeavoured to address the most critical aspects relating to SHE issues in order to assist the contractor to adequately provide for the health and safety of employees on site.

Public

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Holdings SOC Ltd, Reg No 2002/015527/30.

		Document Identifier	NCOUSEC1	Rev	1
		Effective Date	19 October 2023		
		Review Date	October 2024		

Should Eskom not have addressed all SHEQ aspects pertaining to the work that is tendered for, the contractor needs to include it in the SHE plan and inform Eskom of such issues when signing the contract.

3.35 Contract Sign-Off

On completion of the project, all appointed contractors shall close out their project documentation; SHE files and forward such to the principal contractor. The principal contractor shall likewise close out his/her project documentation and SHE files and forward such to the Eskom project manager.

3.36 Asbestos Work

The Northern Cape is known for the prevalence of asbestos, contractors/ Eskom employees need to take precaution when working in such areas. The following towns and surrounding areas are known to be Asbestos affected.

- Kuruman
- Daneilskuil
- Lime Acres
- Kathu
- Hotazel
- Prieska
- Marydale

The following requirements need to be met in terms of working in a naturally occurring asbestos area:

1. Conduct asbestos awareness, in consultation with SHE Committee, in matters related to control measures (Reference: OHS Act, AR no.5).
2. Vehicles must be cleaned regularly inside and drivers must be discouraged to drive with open windows on dirt roads in order to minimize exposure.
3. Drivers must be encouraged to keep to a speed limit of 40km/h (or specific according to the road) on sandy dirt roads in order to minimize dust ingress.
4. Where security contractors are exposed to operations where soil is disturbed, these contractors must wear the appropriate PPE (respiratory protection) and keep to a distance while operations is taking place in order to minimize exposure. Ensure the

respirator is an FFP2 type of respirator if required disposable overalls should be made available.

5. Medical surveillance to be provided for all employees who may possibly be exposed to asbestos which includes lung function tests and chest x-rays (Reference: OHS Act, AR no.9).

3.37 PERSONNEL HEALTH/HYGIENE FACILITIES

3.37.1 Guard House and Security Check Points/ Desks

At the workplace, where necessary, all contractors must provide sufficient guardhouse facilities for the employees. Where any night work is to be performed, contractors shall provide sufficient lighting to enable the entire work site to be illuminated, to a degree that any employee must not have to work in any dark (un-illuminated) or dimly lit areas.

Adequate SABS approved seating should be provided and should be in working order. Only Eskom approved portable electrical equipment may be used on site. The use of bar heaters bar prohibited. Only Eskom approved SABS portable electrical equipment that is in safe and good condition will be allowed on site. Approved portable electrical equipment needs to be inspected on a monthly basis by an appointed competent person.

3.37.2 Ablution facilities

At the workplace all contractors must provide sufficient portable ablution facilities for the employees where required. Such facilities must be serviced regularly and comply with Eskom as well as legal requirements.

As per SANS 10400-F:2017, The application of the National Building Regulations:

3.37.2.1 Sanitary facilities shall

- a) be so sited as not to be offensive,
- b) at all times be maintained in a clean and hygienic condition, and
- c) unless they are of a permanent nature, be removed immediately once such building work has been completed.

3.37.2.2 Sanitary facilities shall be provided at the rate of not less than one sanitary facility for every thirty (or part of that number) of the personnel concerned.

3.37.3 Drinking Water

As per Facilities Regulations of 3 August 2004.

Every employer shall:

- Make available an adequate supply of drinking water for his or her employees at their workplace; and
- Clearly and conspicuously mark such, taps and pipes that is not fit for human consumption.

3.38 COVID-19 requirements

**Code of Practice: Managing exposure to SARS-COV-2 in the workplace, 2022
Published in GG46596, on 24 June 2022, GNR 2191.**

As a result of the global COVID-19 pandemic the following requirements have to be put in place to ensure adequate control measures are present in workplaces:

Chapter 2 of GNR 2191:

1. Risk assessment and plan

Every employer must –

- a. Undertake a risk assessment to give effect to its obligations under the OHSA and the HBA Regulations;
- b. On the basis of the risk assessment develop or amend its existing plan to include –
 - i. Any measures to be implemented in respect of the vaccination of its employees and, taking into account the intervals between vaccinations, the dates by which the employees must be fully vaccinated; and
 - ii. Any other protective measures contemplated section 6(1) and (2);
- c. Consult on the risk assessment and plan with –
 - i. Any representative trade union as contemplated by section 14(1) of the LRA; and
 - ii. Any health and safety committee established in terms of section 19 of the OHSA or, in the absence of such committee, a health and safety representative designated in terms of section 17(1) of the OHSA or employee representative; and

		Effective Date	19 October 2023			
		Review Date	October 2024			

- d. Make the risk assessment and plan available for inspection by the trade union and committee contemplated in paragraph (c) and an inspector.

2. Contents of risk assessment and plan

1. The risk assessment and plan referred to in section 5(1)(b) must include –
 - a. The identification of the employees contemplated in paragraph (i) of that section;
 - b. The reporting of symptoms by employees and isolation of employees who are diagnosed with COVID-19 and are symptomatic;
 - c. The workplace protective measures required to be taken in terms of HBA Regulations including personal protective equipment and ventilation;
 - d. A procedure to resolve any issue that may arise from the HRA by an employee of the right to refuse to work in the circumstances contemplated in section 15(1); and
 - e. The process by which the obligations under this Code will be complied with.
2. The risk assessment and plan referred to in section 5(1)(b) may include –
 - a. Social distancing measures including minimising the number of workers in the workplace through rotation, staggered working hours, shift and remote working arrangements;
 - b. PPE measures contemplated in section 11;
 - c. Personal hygiene measures such as the wearing of facecloth masks, barriers hand washing, sanitisers and surface disinfectants;
 - d. Any special measures to mitigate the risk of infection or serious illness or death in respect of individual employees at increased risk such as reducing the numbers in and the duration of occupancy in meeting rooms.

In developing and implementing a plan in terms of subsection (1)(b)(i), an employer must comply with section 12

3.39 Project Statistics

The following information should be submitted by the 1st of each month to the Contract Manager/ Custodian:

- Contractor manpower numbers and hours worked for the purpose of calculating the contractor lost-time injury (LTIR) and total recordable injury (TRIR) rates

Public

Annexure 2 – Transportation of people at the back of open vehicles

DISTRIBUTION TECHNICAL INSTRUCTION

15 December 2011 Enquiries: Moniwa Mahlangu
Tel: (012) 421 6625

TECHNICAL INSTRUCTION: 11TI-027
ART: 21 – RISK MANAGEMENT

TRANSPORTATION OF PEOPLE AT THE BACK OF OPEN VEHICLES (BAKKIES)

Background

In the past years we have experienced fatalities where people were being transported at the back of open vehicles, this has had a major impact since these vehicles are not meant for the conveyance of people but material and tools instead and furthermore it is against existing laws in the country. It was also communicated through a technical instruction (10TI-012) issued on 26 March 2010 that the practice should be stopped, it was however observed that this practice still persists in the organization.

It is further expressed that all Eskom employees and contractors should ensure Zero Harm to employees whilst performing work and even travelling on a daily basis.

Instruction

In order to prevent these incidents and similar consequences, it is decided that no person will be transported in a vehicle that is not intended for the conveyance of people at all times. Therefore no one will be transported at the back of an LDV regardless of whether it is covered with a canopy.

This instruction should be implemented with immediate effect and be communicated to all the relevant parties.

This Technical Instruction is in accordance with Eskom's Policies & Procedure and applicable legislation.

Your commitment to Zero Harm to all is appreciated.

	Annexure B: Acknowledgement Form for Eskom SHE Rules and other Requirements	Template Identifier	240-43921804	Rev	5
		Document Identifier	240-77471499	Rev	2
		Effective Date	November 2016		
		Review Date	December 2021		

The specific requirements that will be mandatory for informing the tenderer and the requirements that the tenderer has to comply with when submitting the tender returnable:

NOTE: the tenderer has to ensure that he/she understands the SHE requirements listed hereunder.

1. The supplier is expected to comply to the following documents when working at/rendering a service to Eskom but not limited to the following:
 - a. Eskom contractor Health and Safety requirements standards 32-136
 - b. SHE specification provided
 - c. Occupational Health and Safety Act 85 of 1993
 - d. Mine Health and Safety Act (where applicable)
 - e. Compensation for Occupational Diseases and Illnesses Act 130 of 1993
 - f. National Environmental Management Act 107 of 1998

Note: Please note that after contract award, it is your responsibility to fully align the company's processes to Eskom's SHE requirements (policies, procedures, standards etc).
2. Work stoppages that are initiated due to SHE related shall not warrant any financial compensation claim lodged against Eskom.
3. Financial penalties shall be enforced on the main supplier for non-conformance/s (identified for the main supplier and/or its sub-contractor and/or supplier) pertaining to Eskom and/or Statutory SHE requirement/s.
4. Ensure that all employees (contractors/suppliers) undergo the relevant Eskom induction and company's induction
5. Management of Contractors and Suppliers
 - a) The main supplier has to demonstrate to Eskom the process and selection criteria applied when appointing contractors and suppliers.
 - b) The main supplier has to provide notification to Eskom, prior to the appointment of contractors or suppliers for the commencement of work.

Public

- c) The main supplier has to ensure that contractors and suppliers possess adequate resources and competencies.
- d) The main supplier is accountable for the management of its contractors or suppliers in order to ensure that the applicable legal and Eskom requirements (that are applicable to the main supplier during contract execution) are complied with by the contractors or suppliers.
- e) The main supplier shall monitor contractors or suppliers through audits and assessments with regard to SHE compliance during the execution of the work.
- f) The grounds for the termination of work done by contractors and suppliers shall be provided by the main supplier.
- g) All non-conformances/non-compliance by the contractors/suppliers (all tiers) to the main supplier shall be dealt with directly with the main supplier in terms of performance and penalty processes.
- h) Eskom reserves the right to verify this when deemed necessary. The contractor may be instructed to provide copies of testimonials/references and the contact detail of clients (including Eskom) for whom the Company has done previous work of a similar nature

I, the undersigned, hereby acknowledge that I have obtained copies of the above documents and confirm that I fully understand them and the consequences of non-compliance.

Annexure 9 – Annexure D SHE Post-contract Reviews

	Annexure D: SHE Post-contract Reviews	Template Identifier	240-43921804	Rev	5
		Document Identifier	240-77472561	Rev	2
		Effective Date	November 2016		
		Review Date	December 2021		

The objectives and outcome of the SHE post-contract review shall be reflected in any future contractual relationship with the supplier so that the supplier is aware of this exercise.

An evaluation will be conducted and will be supported by the objective evidence documented during the term of the contract. The evaluation report must be filed in the contract documents.

The following criteria (but not limited to) shall be considered for the review:

- Accident and injury data for the contract.
- SHE non-conformances.
- Duration and effectiveness in addressing and closing out SHE deficiencies/corrective actions.
- Legal compliance with SHE requirements.
- Number behavioural safety observations conducted by contract manager and the contractor supervisors.
- Close-out of Incident Investigations.
- No. of staff members (incl. subcontractors and suppliers) who contravened the Eskom Lifesaving rules.
- Prohibition and contravention notices issued by Department of Labour/Dept. of Mineral Resources notices, Department of Environmental affairs etc.
- Contributions and effort made to improve SHE performance
- Supplier (including sub-contractor) Total number of incidents:
 - Fatalities,
 - Lost-time injuries,
 - reportable incidents (Department of Labour/Department of Mineral Resources/Department Environmental affairs)

- Environmental incidents and legal contraventions

The following matrix shall be used to assess the performance against the identified criteria. The OU/BU may add or remove KPI's to ensure practicality:

1. Contractor OHS KPI (Business units or Operating units must ensure alignment to the business KPI's)

KPA	KPI	Weighting	Floor	Kick	Target	Stretch	Ceiling
1. Fatalities	1.) No of fatalities experienced for the fiscal year or the duration of the project if less than 12 months	40%	2	1	0	-1	-2
2. Lost time incidents / LTIR	1.) Lost time incidents/LTIR for the fiscal year the duration of the project less than 12 months	30%	4	3	2	1	0
3. OHS compliance	1.) Supplier average audit rating for the fiscal year the duration of the project less than 12 months	20%	1	2	3	4	5
	2.) Supplier has closed out audit findings/non-conformances within a specified period.		80%	85%	90%	95%	10%
	3.) Eskom Safety rules violation for the fiscal year the duration of the project less than 12 months		40%	20%	0%	-20%	-40%
4. OHS improvement programme	1.) Supplier has implemented OHS interventions or initiatives to improve on the Health and Safety of employees	10%	60%	70%	80%	90%	100%
	2.) Supplier participate in Eskom's OHS interventions and programmes (Safety stand offs, OHS campaigns/events, cooperation, provide the required feedback or information etc)		60%	70%	80%	90%	100%

Annexure 10 – TASK OBSERVATION FORM

1						
.	Task observer's name:.....			Task observed / Scope of work:		
	Section / department:			Location:		
	Occupation:.....			Is there a procedure for this task? <input type="checkbox"/>		
	Date:			Procedure ref. no.		
	Time with task:			Work order no.		
2	REASON FOR OBSERVATION					
.	Planned <input type="checkbox"/> Accident repeater <input type="checkbox"/> Experience worker <input type="checkbox"/> Risk taker <input type="checkbox"/> Follow-up <input type="checkbox"/> <input type="checkbox"/>					
	Name of employee/s being observed: _____					

3	TASK OBSERVATION					
.	Did employee adhere to the procedure/practice requirements?			Could observed practices / conditions lead to:		
		Yes	No		Yes	No
	1. Failure to use PPE			1. Injury:		
	2. Ignore safety specifications			a) Risk of getting caught by		
	3. Tools equipment:			b) Risk of striking against/get struck by		
	a) used correctly			c) Risk of fall from same level		
	b) In good and safe condition			d) Risk of fall from different level		
	c) Test certificates valid and available			e) Risk of slip, trips and falls		
	4. Toolbox Talk:			2. Illness (fumes, gas, etc.)		
	a) Work instructions/task manuals used			3. Costs (delays)		
	5. Complete Worker's register			4. Poor quality (non-conformance)		
	6. Risk Assessment been done					
	7. Valid work permits available
