- Durability
- Weathering/Soundness

Both the sampling and testing of material will be conducted by TFR personnel, not the bidder however, bidders will be responsible for the non-refundable cost of acquiring the required 60kg of Ballast samples.

The test report shall be required whenever there is a change in material however, for repetitive supply, the supplier shall not need to resubmit similar report (if there's no material change).

Transnet shall reserve the rights to request the supplier to provide the report at any point during the supply, should Transnet deem it fit. Bidders failing the Technical evaluations shall not be considered for the supply of formation material only. Please refer to clause 5 (Technical Requirements) of the attached S406 Ballast Specification for the breakdown of minimum acceptable parameters

Formation Material

Quarries approved for the supply of ballast will be deemed to 100% meet the formation material specification; thus, approved ballast quarries will not be evaluated for formation material. If business is awarded to such a quarry, the quarry will be expected to submit Product tests Report from any independent Laboratory ('Lab') which is accredited by the South African National Accreditation System [SANAS] when making deliveries to Transnet projects.

Unapproved quarries or material sources (such as mine dumps) will be considered for the supply of formation material however, the Bid must contain a Product tests Report from any independent Laboratory ('Lab') which is accredited by the South African National Accreditation System [SANAS] for the following list of G-Material commonly used on the formation layers; G2, G4, G5, G6 and G7. The test certificate/report must cover the following properties;

- Description e.g. Dark grey, poorly graded gravel with sand
- Sieve Analysis Cumulative percentage passing
- Grading analysis
- Atterberg Limits
- Classification
- Soil Mortar Analysis: SANS 3001-PR5
- CBR and Maximum Dry density test report

Material compliance to specification will be evaluated using the abovementioned test certificate/report. Please refer to clause 9 of the S410 Specification for Railway Earthworks (Annexure B) for the Properties and classification of materials for placing purposes.

Phase 2: Minimum threshold of 60% for Functionality(Please see Annexure G1 and 2 for detailed evaluation criteria) Bidders will be scored zero (0) if they do not submit proof for any of the listed requirements on G1 and G2

Ballast Material

At this stage, the Evaluation team shall evaluate if the bids comply with the technical requirements of the tender. Bidders will be required to indicate the depot which they intend to supply and provide names and locations of their quarries.

For all approved quarries, bidders must provide Technical Approval Certificates issued by Transnet. If the certificate is outdated (expired prior the Bid closing date) or the quarry is not approved, such quarries will be subjected to a product testing and approval process, as part of the Technical evaluation. Product testing will be divided into two phases, as per the table below:

Phase 1: Strength of Material Phase 2: Secondary tests

- Product sampling: Quarries are required to provide approximately 60 kg of Ballast samples comprising:
 - 73mm to 19mm stone size.
 - Specifically 5 kg of 13.2mm (-19mm stone size).
 - Specifically 5 kg of 9.5mm (-13.2mm stone size).
- Grading Analysis
- Flakiness Index
- Relative Density Average
- Void content
- Mill Abrasion
- Los Angeles Abrasion test
- Absorption of formation
- Durability
- Weathering/Soundness

Both the sampling and testing of material will be conducted by TFR personnel, not the bidder however, bidders will be responsible for the non-refundable cost of acquiring the required 60kg of Ballast samples.

The test report shall be required whenever there is a change in material however, for repetitive supply, the supplier shall not need to resubmit similar report (if there's no material change).

Transnet shall reserve the rights to request the supplier to provide the report at any point during the supply, should Transnet deem it fit. Failure of unapproved quarries (or sources) to pass all the tests shall mean failure to achieve the 100 points threshold and will lead to disqualification.

Final technical scores will be rounded off to the nearest 2 (two) decimal places for the purposes of determining whether the technical threshold has been met.

*Respondents must complete and submit **Annexure G1** and **G2** which include a Technical Questionnaire. A Respondent's compliance with the minimum functionality/technical threshold will be measured by their responses to Annexure **G1** and **G2**.*

Respondents are to note that Transnet will round off final technical scores to the nearest 2 (two) decimal places for the purposes of determining whether the technical threshold has been met.

Failure of unapproved quarries (or sources) to pass all the tests shall mean failure to achieve the 100 points threshold and will lead to disqualification.

The minimum threshold for technical/functionality [Step Three] must be met or exceeded for a Respondent's Proposal to progress to Step Four for final evaluation

5.6 **STEP FOUR: Evaluation and Final Weighted Scoring**

a) **Price Criteria** [Weighted score 90 points]:

Where:

Ps = Score for the Bid under consideration
 Pt = Price of Bid under consideration
 $Pmin$ = Price of lowest acceptable Bid

Specific goals claim form

Preference points will be awarded to a bidder for attaining the specific goals requirements in accordance with the table indicated in Section 9 Table 3.2 of the specific goals Claim Form.
