PART C1 PRICING DATA

C1.1 PRICING INSTRUCTIONS

C1.2 BILL OF QUANTITIES

C1.3 PRICING STRUCTURE

C1.1 PRICING INSTRUCTIONS

- 1 The General Conditions of Contract, the Contract Data, the Specifications (including the Project Specifications) and the Drawings shall be read in conjunction with the Bill of Quantities.
- 2 The Bill comprises items covering the Contractor's profit and costs of general liabilities and of the construction of Temporary and Permanent Works.

Although the Bidder is at liberty to insert a rate of his own choosing for each item in the Bill, he should note the fact that the Contractor is entitled, under various circumstances, to payment for additional work carried out.

Clause 8 of each Standardized Specification, and the measurement and payment clause of each Particular Specification, read together with the relevant clauses of the Project Specifications, all set out which ancillary or associated activities are included in the rates for the specified operations.

- 3 Descriptions in the Bill of Quantities are abbreviated and may differ from those in the Standardized and Project Specifications. No consideration will be given to any claim by the Company submitted on such a basis. Should any requirement of the measurement and payment clause of the appropriate Standardized or Project Specification(s) be contrary to the terms of the Bill the requirement of the appropriate Standardized, Project, or Particular Specification as the case may be, shall prevail.
- 4 Unless stated to the contrary, items are measured net in accordance with the sites without any allowance having been made for waste.
- 5 The amounts and rates to be inserted in the Bill of Quantities shall be the full inclusive amounts to the Employer for the work described under the several items. Such amounts shall cover all the costs and expenses that may be required in and for the provision of Security services in identified sites, and shall cover the costs of all general risks, profits, taxes (but excluding value-added tax), liabilities and obligations set forth or implied in the documents on which the Bid is based.

The quantities set out in the schedule of quantities are only approximate quantities. The quantities of work finally accepted and certified for payment, and not the quantities given in the schedule of quantities, will be used to determine payments to the contractor.

- 6 An amount or rate shall be entered against each item in the Bill of Quantities, whether or not quantities are stated. An item against which no amount or rate is entered will be considered to be covered by the other amounts or rates in the Bill.

The Bidder shall also fill in a rate against the items where the words "rate only" appear in the amount column. Although no work is foreseen under these items and no quantities are consequently given in the quantity column, the stated rates shall apply should work under these items actually be required.

Should the Bidder group a number of items together and bid one sum for such group of items, the single stated sum shall apply to that group of items and not to each individual item, or should he indicate against any item that full compensation for such item has been included in another item, the rate for the item included in another item shall be deemed to be nil.

The stated rates, prices and sums shall, subject only to the provisions of the Conditions of Contract, remain valid irrespective of any change in the quantities during the execution of the Contract.

Rates quoted are fixed and quoted in ZAR currency; and shall not in any way be affected by rand/dollar exchange rate or any currency.

- 8 The quantities of work as measured and accepted and certified for payment in accordance with the Conditions of Contract, and not the quantities stated in the Bill of Quantities, will be used to determine payments to the Contractor. The validity of the Contract shall in no way be affected by differences between the quantities in the Bill of Quantities and the quantities certified for payment.

- 9 For the purposes of this Bill of Quantities, the following words shall have the meanings hereby assigned to them:

Unit	:	The unit of measurement for each item of work as defined in the Standardized, Project or Particular Specifications
Quantity	:	The number of units of work for each item
Rate	:	The payment per unit of work at which the Bidder bids to do the work. Should be quoted in ZAR currency only
Amount	:	The quantity of an item multiplied by the bidder's rate of the (same) item. Should be quoted in ZAR currency only
Sum	:	An amount bidden for an item, the extent of which is described in the Bill of Quantities, the Specifications or elsewhere, but of which the quantity of work is not measured in units. Should be quoted in ZAR currency only

- 10 The units of measurement indicated in the Bill of Quantities are metric units. The following abbreviations may appear in the Bill of Quantities:

No = No

1. PROJECT BACKGROUND – DMRE PERSPECTIVE

The overall objective of the proposed project is to track, and monitor progress against the national target for energy in the public sector through the implementation of energy saving interventions and the establishment of a comprehensive monitoring system.

Energy efficiency is widely recognized as the most fundamental short-run imperative for rapid, ambitious and cost-effective, least-polluting and readily available energy source. More than half of the electricity-sector related carbon emissions reduction target and the coming twenty years could be achieved through energy efficiency.

Efficiency can enhance the competitiveness of economies while helping to alleviate energy poverty as energy becomes more available. Energy productivity gains will lower the cost for the economy as a whole, enhance the supply security and reduces the need to develop new sources of energy supply to serve those without access to modern energy services for health and education enhancement. Accelerated energy efficiency can also create attractive green jobs and businesses.

As a commitment to this process, government published in 2005 the National Energy Efficiency Strategy that set a target of 12% Energy Demand Reduction to be achieved by 2015. In addition, the Department of Energy's approved 2012 Plan for the next three years, which requires national energy savings from implemented Energy Efficiency and Demand Side Management (EEDSM) measures across all sector including the public sector. The Municipal Energy Efficiency Project, making part of the EEDSM program, is to assist the Department of Energy in implementing energy efficiency projects in municipalities that will contribute towards the achievement of these targets, and also to provide an energy efficiency base line for the next financial year.

In the light of the above, the South African Government through the Department of Energy has embarked on a process of developing and implementing the National energy efficiency strategy, Energy Efficiency Tax Incentive Scheme, Energy Management Systems and Standards, and Energy Efficiency Monitoring System. This overall target is based on sectorial targets from the residential section (10%), industrial and mining sector (15%), commercial and public buildings (15%), power generation (15%), and transport (9%). Although a variety of energy efficiency

measures have been introduced since 2005, monitoring and quantification of energy savings has been a challenge.

In addition, various sector energy efficiency improvement programs have been implemented, namely the Municipal Energy Efficiency Program, the Public Building Energy Efficiency Program, Industrial Energy Efficiency Program, and the other initiatives led by the private sector.
