1.4 STEP FOUR: Evaluation and Final Weighted Scoring

a) **Price Criteria** [Weighted score 80 points]:

Evaluation Criteria	RFP Reference
• Commercial offer	Section 4

Transnet will utilise the following formula in its evaluation of Price:

$$PS = 80 \left(1 - \frac{Pt - Pmin}{Pmin} \right)$$

- $Pmin$ = Price of lowest acceptable Bid

b) **Specific Goals** [Weighted score 20 point]

1.5 STEP FIVE: Post Tender Negotiations (if applicable)

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
 - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
 - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

1.6 STEP SIX: Objective Criteria (if applicable)

1.7 STEP SEVEN: Award of business and conclusion of contract

I/We accept that unless Transnet should otherwise decide and so inform me/us, this Quotation [and, if any, its covering letter and any subsequent exchange of correspondence], together with Transnet's acceptance thereof shall constitute a binding contract between Transnet and me/us. I/We further agree that if, after I/we have been notified of the acceptance of my/our Quotation, I/we fail to deliver the said goods/service/s within the delivery lead-time quoted, Transnet may, without prejudice to any other legal remedy which it may have, cancel the order and recover from me/us any expenses incurred by Transnet in calling for Quotations afresh and/or having to accept any less favourable offer.

2 Overview of the work

2.1 Executive Overview

Transnet Port Terminals is a division of Transnet SOC Limited whose core business is to provide cargo handling to a wide spectrum of customers, including shipping lines, freight forwarders and cargo owners. Operations are divided into five major business segments, namely containers, bulk, break bulk, automotive and national port authority. All divisions operating under one umbrella, Richards Bay is one of Transnet Bulk and Break-Bulk handling terminal divided into two namely, DBT and MPT. MPT further facilitates its operations inland; Pendoring (in Brits Northwest) and Kendal respectively (Mpumalanga). These two terminals are capacitated with rail siding, office infrastructure and operational stockpile areas for storage and retrieval of bulk material.

TPT RCB inherited these inland terminals from previous private operations where Transnet Freight Rail had a fair share. In the absence of as-built information and historical maintenance carried out to the infrastructure, or evidence of as-built information, TPT RCB intends to conduct such services, proactively and responsibility to understand condition and compliance of the existing infrastructure, and to also put a maintenance plan in place for future structured asset care management.

As a statutory Transnet policy requirement, structural condition assessment must be performed for all infrastructure which may be due to unforeseen and known load dynamics fail and result in compromising Health, Safety and Environment of those using the structure, working under, or in the surrounding. Condition assessment enables quick, planned, and pro-active response to any failure defect picked up before a failure occurs. It is for this purpose that a professional entity is required to conduct surveying services, condition assessment of existing infrastructure and generate as-built information for Transnet Port Terminals at the port of Richards Bay.

4 General Information

4.1 Kendal site information

Kendal is located at (-26.05708, 28.94782) coordinates in Mpumalanga.

Figure 1: Kendal siding in Mpumalanga

Kendal inland terminal strategically operates through TFR rail siding logistic chain. The terminal handles coal cargo received via road trucks to be railed for domestic and export purposes. The site has a capacity to handle 2, 5 million tons per annum. Cargo is offloaded from road trucks into designated stockpiles and loaded onto rail wagons utilising the terminal’s materials handling equipment.

Kendal siding consists of 4 rail lines, and the siding can only be accessed from the Ogies side. Lines are numbered as 1 to 4, terminating at stop block on the Welgedag side. Line 1 and 2 can be used as alternative to load domestic coal at a maximum of 48 CFR wagons, with 24 on each line. Line 3 (60 wagons) and 4 (70 wagons) are longer and used for loading both export and domestic. Rail weighbridge is installed at the entrance of the siding on the Ogies side. All lines are NON-ELECTRIFIED and movement to and from siding is controlled by CTC Ogies.

4.2 Pendoring Site information

Pendoring is located at (-25,634451, 27,8109) coordinates in Northwest.

Pendoring Inland terminal is located in Brits, North-West Province, and the day to day running of the terminal is a collaboration between two Transnet operating divisions namely Freight Rail and Port Terminal. This terminal operation is mainly Chrome, which integrate the supply value chain and increase opportunities and cut the road transportation of cargo. Hence, Pendoring Inland Terminal strategic operational position works as a feeder hub for Chrome Ore destined for the Port of Richards Bay by Rail.

Transnet Port Terminals manages the offloading of Chrome Ore from the tipper trucks coming from the mines onto the stockpiles, which it also manages operations on a day-to-day basis. Chrome is supplied by private Road Motor Transport (RMTs), stockpiled according to client’s specifications and grade. Transnet Freight Rails supplies rail wagons which are then used to load chrome and dispatched by rail and destined for the Port of Richards Bay.
