2. SCOPE OF WORK

2.1 Overview

- a) On 1 April 2026, the National Radioactive Waste Disposal Institute (NRWDI) officially assumed full operational responsibility for the Vaalputs facility, including the management and maintenance of its Information and Communication Technology (ICT) infrastructure and network services.
- b) Prior to the transition, NRWDI procured core IT infrastructure to support initial operations. However, during the takeover and subsequent site assessments, several critical gaps were identified where legacy infrastructure remained in operation and where no provision had been made to modernise or expand the network.
- c) The areas affected include:
- i. Security Control Room
 - ii. Security Gate
 - iii. Maintenance Office (new network expansion)
 - iv. Garing Office
 - v. Garing Home
 - vi. Stofkloof Office
 - vii. Waste Acceptance Area (new expansion)
 - viii. Decontamination Area (new expansion)
- d) These offices and operational zones currently rely on decentralised, dilapidated and obsolete network infrastructure that does not meet NRWDI security, availability and operational standard.
- e) This procurement seeks to acquire a server and network components to:
- i. Replace ageing, out of warranty and unsupported server and network equipment.
 - ii. Expand network connectivity to operational areas not previously covered.
 - iii. Standardise and centralise IT infrastructure at the Vaalputs Server Room.
 - iv. Improve cybersecurity posture and service reliability.
 - v. Enable secure integration into NRWDI's Active Directory domain and corporate network.
- f) This upgrade forms the first critical step toward securing and stabilising the Vaalputs network environment. The goods that NRWDI seeks to procure are for existing infrastructure which is mostly HP and Microsoft.
- g) Revamping the Vaalputs network will:
- i. Establish a secure, segmented and resilient network architecture
 - ii. Enable centralised identity and access management
 - iii. Improve monitoring, incident response and disaster recovery readiness
 - iv. Support current and future operational expansion
 - v. Align the facility with NRWDI ICT standards and cybersecurity best practices
