**APPOINTMENT OF SERVICE PROVIDER(S) FOR THE HIRING OF
MOTORIZED WATER TANKER SERVICES AS AND WHEN REQUIRED
WITHIN VARIOUS MUNICIPALITIES IN KWAZULU NATAL PROVINCE FOR
THE PERIOD FOUR (4) MONTHS**

1. INTRODUCTION

The Provincial Department of Cooperative Governance and Traditional Affairs (COGTA) Province of KwaZulu-Natal (KZN) invites members of their *“Appointment of Service Provider(s) registered with Central Suppliers Database for the hiring of motorized water tanker services as and when required within various municipalities in KwaZulu Natal Province for the period four (4) months (3).”*

2. PROJECT BACKGROUND

The Department of Cooperative Governance and Traditional Affairs (COGTA) has a mandate to support local government and Traditional affairs in their efforts towards service delivery and socio-economic development. As part of this mandate, there is also the need to ensure that local government efforts create a developmental state where local economic development can occur and thrive towards the common problems of unemployment, inequality, and poverty.

The department is in regular receipt of numerous requests from Water Services and further to that various communities have expressed frustrations at their ongoing lack of clean water by protesting, and there is a potential for the protests to become violent. The communities may be taking advantage of the election to make demands on the government. However, the real need for clean water and the supply of clean water is a constitutional right for all South Africans. This can be attributed to the water scarcity across the Province and the delayed bulk infrastructure projects currently at construction phase.

It has been determined that at this time, the prudent way to meet this need is by providing water tankers as an interim solution, while the bulk infrastructure is closely monitored for completion. It has further been determined that, because of the pre-election climate and the level of frustration in the communities, the water tankers must be made available urgently.

3. AIM AND OBJECTIVE OF THE PROJECT

Some municipalities have experienced significant water shortages, inadequate infrastructure, and frequent water service delivery protests. These challenges adversely impact the socio-economic development and well-being of local communities. The project aims to provide clean water to communities .

4. CHALLENGES FACED BY WSA's

Water bulk infrastructure is required to provide a permanent solution to the issue of water shortage. A number of current bulk infrastructure projects in the delivery of Capital Infrastructure Programmes (WSIG, RBIG and MIG) are at the construction phase with completion dates beyond 2027, including the following:

1. Ncwabeni OCS Dam to provide water supply to Umzimkhulu Regional Water Supply Scheme (Ugu DM), which forms part of the KwaZulu Natal's Lower South Coast System, supplies water to the coastal region from Hibberdene to Margate, including Port Shepstone. In addition, the scheme also supplies many rural inland settlements such as Fairview, Kwa-Madlala, Louisiana, Bhoboyi, Murchison, KwaNdwalane, Izontsha, KwaMavundla, Gamalakhe, etc, with a total estimated present rural population size of about 140 000.
2. The Mandlakazi Regional Bulk Water Scheme (MRBWS) which is designed to alleviate water supply challenges in the Mandlakazi area, located between Kwa-Nongoma and Mkhuze towns in Zululand District Municipality, as well as in Hlabisa under uMkhanyakude District Municipality, KwaZulu-Natal. These regions frequently experience drought, and local surface water sources have proven unreliable due to sedimentation, erosion, and seasonal variability, which compromise storage capacity and water quality. The scheme is the second-largest supply area in Zululand District Municipality, targeting a significant portion of the municipality's water backlog.
3. The Lower Umkhomazi Water Scheme aims at augmenting raw water availability and meeting water supply demand to approximately 50,000 households on the South Coast within the municipal districts of Ugu and eThekweni. The project is expected to be completed in December 2027 and is part of the broader uMkhomazi Water Project.
4. Nondabuya Water Scheme aims to provide water supply to approximately 2400 households in the Jozini Municipality. The Nondabuya Water Scheme highlights the challenges of infrastructure delivery in the region, which have prevented the project from achieving its intended impact.

The Municipal Infrastructure Business Unit (MIBU) is tasked with the responsibility of supporting the Local Government (LG) branch in public protests that pertain to Municipal Infrastructure as well as public queries, where water-related queries are dominant.

As a result, the MIBU of COGTA KZN requires a panel of suitable service providers to provide temporary water supply through mobile water tankers within across the Province, on an as and when required basis from date of award until 30 November 2027 (4 months).

5. PROJECT OUTCOMES

Key outcomes of this programme include the provision of water supply through water tankers to the identified needy municipalities:

Please note that bidders may bid for one or more districts. The Department reserves the right not to award the same company for more than one district. In the case that the Department fails to award in a particular district, multiple awards can be made.
