### **12.2 Mediation**

12.2.1 If the Contract Data does not provide for dispute resolution by adjudication, not earlier than ten working days after having advised the other Party, in terms of Clause 12.1, that negotiations in regard to a dispute have failed, an aggrieved Party may require that the dispute be referred, without legal representation, to mediation by a single mediator. The mediator shall be selected by agreement between the Parties, or, failing such agreement, by the person named for this purpose in the Contract Data. The costs of the mediation shall be borne equally by the Parties.

12.2.2 The mediator shall convene a hearing of the Parties and may hold separate discussions with any Party and shall assist the Parties in reaching a mutually acceptable settlement of their differences through means of reconciliation, interpretation, clarification, suggestion and advice. The Parties shall record such agreement in writing and thereafter they shall be bound by such agreement.

12.2.4 If either Party is dissatisfied with the opinion expressed by the mediator or should the mediation fail, then such Party may require that the dispute be referred to arbitration or litigation in a competent civil court, as provided for in the Contract Data; *provided that the dissatisfied Party notifies the other in writing within 28 Days of mediator's decision being issued or the mediator declaring the mediation to have ended, as provided for in the Contract Data.* Claims not brought within the time periods set out herein will be deemed to be waived.

- 12.3.3 If a Party is dissatisfied with the decision of the Adjudicator, the Party may give the other Party *written* notice of dissatisfaction within 28 days of the receipt of that decision and refer the dispute to arbitration or litigation in a competent civil court as provided for in the Contract Data. If notice of dissatisfaction is *not* given within the specified time, the decision shall be final and binding on the Parties.

C2.1	PRICING INSTRUCTIONS.....	C-41
C2.2	PRICING SCHEDULE.....	C-44
C2.3	SUMMARY OF PRICING SCHEDULE.....	C-46

## C2.1 PRICING INSTRUCTIONS

C2.1.1 For the purposes of this Pricing Schedule, the following words shall have the meanings hereby assigned to them.

Unit: The unit of measurement for each item of work as defined in the Scope of Works.

Quantity: The number of units of work for each item as provided by the *Service Provider* or as tendered by the Sub-Service Provider.

Rate: The payment per unit of work for which a rate has been provided by the *Service Provider* or for which the Service Provider tenders to do the work.

Amount: The product of the quantity and the rate tendered for an item.

Lump Sum: An amount tendered for an item, the extent of which is described in the Pricing Schedule, the Scope of Work or elsewhere, but of which the quantity of work is not measured in units.

Provisional Sum: An amount allowed for in the Pricing Schedule, for which the quantity of work is not known.

Prime Cost: Is a specific type of Provisional Sum where payment is made on the production of invoices showing the cost price of the implementation or installation of the service required. Services rendered in this manner carry a cost for which a rate or a lump sum is offered at tender stage to cover all the tenderer's handling, supervision and liability costs in providing the item or services.

C2.1.2 The quantities provided by the *Service Provider* in the Pricing Schedule are only approximate quantities. The quantities of work finally accepted and certified for payment, and not the quantities given in the Pricing Schedule, will be used to determine payments to the Sub-Service Provider.

The validity of the Contract shall in no way be affected by differences between the quantities in the Pricing Schedule and the quantities finally certified for payment. Work is valued at the rates or lump sums tendered.

C2.1.3 Rates and lump sums shall include full compensation for overheads, profits, incidentals, tax (other than VAT), etc., and for the completed items of work as specified in the Scope of Works and Contract Data and for all the risks, obligations and responsibilities specified in the General Conditions of Contract, Particular or Special Conditions of Contract, except in so far as the quantities given in the Pricing Schedule are only approximate.

C2.1.4 The tenderer shall fill in a quantity or a rate or a lump sum for each item where provision is made. Items against which no rate or lump sum has been entered in the tender will not be paid for when the work is executed, as payment for such work will be regarded as being covered by other rates or lump sums in the pricing schedule.

The tenderer shall fill in a rate against all items where the words “rate only” appears in the amount column. Although no work is foreseen under such item and no quantities are consequently given in the quantity column, the tendered rate shall apply should work under this item actually be required. Tenders should note the provisions of clause C2.1.10 of this preamble.

The tendered lump sums and rates shall be valid irrespective of any change in the quantities during the execution of the contract.

C2.1.5 The short descriptions of the payment items in the Pricing Schedule are only given to identify the items and to provide specific details. Reference shall, *inter alia*, be made to the Contract Data, General Conditions of Contract and Particular/Special Conditions of Contract and Scope of Works for more detailed information regarding the extent of work entailed under each item.

C2.1.6 Where so indicated under measurement and payment, prices or rates will be subject to adjustment for escalation as provided for below:

- iii. The prices or rates shall be fixed for the first 12-month period determined from the tender base date and no change during this period will be allowed for escalation.
- iv. On the 12-month anniversary date of the Contract base date the rates or sums shall be adjusted by the 12-month year on year CPI index (as published in the monthly bulletin PO141. of Statistics South Africa under table B) and fixed at this value for the following 12-month period. Subsequent 12-month periods shall be dealt with on the same basis.
- v. Adjustment of lump sum prices for escalation shall only be applicable to that portion of the relevant Service which is incomplete at the end of the 12-month anniversary date and shall not be applicable to any progress payments already claimed.

Adjustment for escalation shall only be applicable for services or portions thereof, that are still within the prescribed programme and any approved extensions of time.

C2.1.7 Interim payments for lump sum payment items may be permitted. Such interim payments shall however be limited to proven progress achieved for that particular service deliverable. The sum of any progress payments made under a particular lump sum payment item shall be deducted prior to calculating any adjustments for escalation as described in clause C2.1.6 above.

C2.1.8 Provisional and Prime Cost Sums: Each Sum shall only be used, in whole or in part, in accordance with the *Service Provider's* instructions and the Contract Price shall be adjusted accordingly. The total sum paid to the Sub-Service Provider shall include only such amounts, for the work, supplies or services to which the Sum relates, as the *Service Provider* shall have instructed.

For each Sum, the *Service Provider* may instruct plant, materials or services to be procured by the Sub-Service Provider in accordance with the *Service Provider's* policies, and for which there shall be included in the Contract Price:

- The actual amounts paid (or due to be paid) by the Service Provider under the Sum, and
- An item for compilation and printing of procurement documentation, quotation/tender process and evaluation, and all overhead charges and profit, tendered in the Pricing Schedule. Provided that for Prime Cost Sums only, where a percentage mark-up or lump sum mark-up is tendered, which shall exclude profit.

The Sub-Service Provider shall produce all quotations, invoices, vouchers and accounts or receipts in substantiation of any claim under a Sum.

Any percentage adjustment or lump sum mark-up against the Sum for handling fee, profits, etc. shall not be negative.

C2.1.9. Subject to the conditions stated in Clause C2.1.10 below, the rates and lump sums filled in by the tenderer in the pricing schedule shall be final and binding with regard to submitting the tender and may not be adjusted should there be any mistakes in the extensions thereof and in the total sums appearing in the tender. Should there be any discrepancies between the tender sum and the correctly extended and totalled pricing schedule, the rates and the lump sums will be regarded as being correct, and the *Service Provider* shall have the right to make adjustments to the tender sum to reconcile the tender sum with the total of the pricing schedule. In such an event the tenderer will be consulted but, failing agreement between the parties, the decision of the *Service Provider* shall be final and binding. Adjustment of the tender sum will take place prior to the signing of the contract. In their own interest tenderers must make doubly sure of the correctness of their tendered rates and lump sums, the extensions and the tender sum.

C2.1.10 A tender shall be deemed non-responsive if the unit rates or lump sums for some of the items in the Pricing Schedule are, in the opinion of the *Service Provider*, unreasonable or out of proportion, and if the tenderer fails, within a period of seven (7) days of having been notified in writing by the *Service Provider* to adjust the unit rates or lump sums for such items, to make such adjustments.

C2.1.11 All rates and sums of money quoted in the Pricing Schedule shall be in South African Rand and whole cents

C2.1.12 The item numbers appearing in the Pricing Schedule refer to the corresponding item numbers in the Scope of Work.

### **Notes to tenderer:**

- 1. The tenderer shall note that the Scope of Work contained in this document forms a standard specification for all environmental services required on projects under the South African National Roads Agency SOC Limited (the Applicant). Not all the services may be required on all projects. Those services not required are shown as being struck through and any relevant payment item for that work removed from the standard Pricing Schedule (see part C2.2). ## C3100 GENERAL REQUIREMENTS

### C3101 Scope

This section covers general matters relating to the performance of an environmental management subservice that forms part of the project to be delivered by the *Service Provider* under contract to the South African National Roads Agency SOC Limited (the Applicant), who is seeking environmental services. As the Applicant cannot itself undertake all the various application processes an Environmental Assessment Practitioner (EAP) is to be appointed to perform these services.

The role expected of the EAP extends to more than that of an application manager to cover the complete ambit of environmental management during the various phases of the project. The scope of works is given within the context of the overall project programme and the operating systems of the Applicant. Terms imposed by the subservice General Conditions of Contract are not repeated here except by way of providing detail or explanation and should any conflict between them occur the General Conditions of Contract shall prevail.

### C3102 Project description

This project is situated on National Road R69, Section 5 between N2 (km 0.0) and Golela Border Post (km 9.75) for the improvement of route as well as provide facilities at the border post. A locality plan is included as an appendix to Part C4: Site Information of this document.

The major aspects of this project include the following:

- Increasing road reserve where the road reserve is insufficient to accommodate the cut and fill batters as well as the cut-off berms etc.
- Strengthening the existing pavement,
- General widening of the existing road cross section for climbing lanes and 3.0m surfaced shoulders, except through the nature reserve, where only 0.5m wide surfaced shoulders will be applicable,
- Vertical geometric improvements,
- Widening of river and/or road bridges and some major and minor culverts,
- Possible 6.5m wide temporary deviation to accommodate two-way traffic during construction.
- Possibility of opening of one hard-rock quarry and / or potential borrowpits
- Stockpile areas and vegetation clearance outside road reserve in excess of one hectare.

### C3103 Definitions

The following definitions apply to the subservice:

**Construction Activity:** any action taken by the construction contractor, his sub-contractors, suppliers or personnel during the construction process as defined in the contract documents;

**Service Provider:** is Ilifa Africa Engineers (Pty) Ltd, the service provider who is contracted by the Applicant to deliver, under a separate contract between them, defined services of which these subservices (environmental services) form an integral part;

**Environmental Management Plan (EMPI):** the plan prescribed by the Applicant containing the methods by which proper environmental controls are to be implemented during the construction phase of the project. A copy is included as an annexure to part C4: Site Information of this document;

**Environmental Management Programme (EMPr):** a programme in relation to identified or specified activities as described in regulation 34 of the EIA Regulations and includes project-specific mitigation measures identified by the EAP and any conditions imposed by environmental authorisations granted by DEA or other competent authority as well as the embodiment of the Applicant's EMPI to ensure that undue or reasonably avoidable adverse impacts of the project are prevented and to ensure that positive impacts are advanced;

**Road Reserve:** a corridor of land, defined by co-ordinates and/or proclamation, within which the road, including access intersections or interchanges, is situated. A road reserve may, or may not, be bounded by a fence.

**The Applicant:** The South African National Roads Agency SOC Limited and is the Applicant in any application for environmental approval managed by the EAP.

**Service Provider:** is the same as the **Engineering consultant**.

**Site;** the site is defined by the limits of construction as shown in the drawings or the title of the project and extends to also include the following:

- Areas outside the construction zones where accommodation of traffic is placed;
- All borrow pits
- All haul roads constructed by the construction contractor for purposes of access;
- Parallel service roads that eliminate multiple accesses;
- Any non-adjacent sites specified in the contract documentation;
- The construction contractor's and his subcontractors' camp sites; and
- includes areas outside of, but adjacent to, the road reserve that may be affected by construction activities.

### **C3104 Role of the EAP**

Throughout the environmental application process the EAP has to consult with the Service Provider where applicable. This cannot be construed by the EAP that liability for his work passes to the Service Provider. It shall only mean that the Service Provider has reviewed the EAP's work, engaged in discussion and provided comment.

### **C3105 Applicant's Involvement**

The Service Provider and EAP will involve the Applicant as necessary to deliver the project requirements.

### **C3106 Project programme**

The EAP shall programme its duties in such a manner so as to complete its investigations, public participation meetings and submission of applications seeking environmental authorisations, permits, etc. so as to ensure the Service Provider complies with the timelines for the various phases of the total project according to the tabulated programme below.

**Table 3.1: Project Milestone dates**

**C3107 Penalties and delays**

Penalties shall be applied for each calendar day by which the EAP fails to meet the prescribed dates or is the cause for them not being met. The quantum of the penalty shall be as listed in the Contract Data. Draft reports and documents require submission to the Service Provider in advance of any meetings scheduled for discussion and finalisation thereof. The EAP shall thus take such prescribed periods into account in compiling its programme mindful that late delivery shall attract penalties applied at the rate stated in the Contract Data.

Delays attributable to the EAP's performance that cause project milestone dates to be missed shall, similarly, attract the daily penalty stated in the Contract Data. If a delay is caused after an award of a contract the EAP may be liable for the actual delay damages that the Applicant will incur, calculated as the difference in contract price adjustment had the delay not occurred, plus interest at rates prescribed by Treasury limits. Notwithstanding the different cause of delay, the maximum amount due by the EAP shall not exceed the value stated in the Contract Data.

Any delays to the programme that are attributable to the Service Provider, or to other approved mitigating circumstances, will not be subject to penalties. In the event of such instances arising, any extensions of time granted shall be limited to the equivalent number of calendar days attributable to each instance.

### **C3108 Key persons**

The Tenderer's proposal of key person/s becomes a contractual commitment upon award. Any proposed change should be handled formally by way of written request and approval but does not require a variation order to be submitted. Replacement personnel shall be of same or better competence, experience, and equity status as those initially accepted.

Key person/s required are the EAP (design phase) and/or Environmental Control Officer (ECO – construction phase). The tenderer may propose 1 or 2 different persons to fulfil the two roles.

The key person/s must meet the following requirements:

- a) Be in possession of an NQF Level 8 in Natural Sciences
- b) Have a minimum of 8 years of post-graduate experience conducting environmental impact assessments and/or environmental audits (Form B1 must be completed and copy of certificate provided);
- c) For the design phase be registered with the Environmental Assessment Practitioner's Association of South Africa (EAPASA) as an Environmental Assessment Practitioner (EAP) (Forms B1 and B2 must be completed, and proof provided)

### **C3109 Site visits**

The Applicant has routine road maintenance (RRM) contracts along existing routes. The EAP shall not visit the site for purposes of undertaking any investigation without first approaching the Service Provider who may himself accompany the EAP or arrange as appropriate.

The project is located within Zululand District Municipality (DC 46), with Pongola being the main centre. The Applicant has established public liaison committees (PLC's) with communities adjacent to many parts of the national road network and liaison/ consultation with them is an integral part of the Service Provider 's duties. Contact with the relevant PLC's or tribal authority shall be via the Service Provider / and or Applicant as stated.

### **C3110 Meetings**

The EAP shall liaise with the Service Provider and coordinate his programme so that it aligns with the planned progress meetings arranged between the Service Provider and the Applicant. Provisional dates for these meetings will be as shown above in Table 3.1: Subservice milestone dates. The EAP shall attend Service Provider /Applicant progress meetings to explain the progress being made in the assessment process and report on any delays and impediments encountered, their effect on the programmed due dates for the various authorisations needed for project construction commencement. Particular cognisance shall be given to reporting on events that may result in change management (i.e. give rise to delays that will impact on delivery of the project in such a way that variation orders have to be issued sanctioning the change).

Attendance at these meetings shall not be delegated to another. Inability of the EAP, (who is the contractual key person), to attend may result in the need to reschedule a meeting and any cost consequences therefrom shall be a penalty event or give rise to a claim for delay damages in accordance with C3107: Penalties and delays.

The EAP may propose other meetings with the Service Provider if any are thought necessary and the Service Provider shall not unreasonably deny such a request.

The EAP shall attend the construction contractor tender clarification and later contract hand-over meetings in his/her role as the Environmental Control Officer (ECO). The EAP/ECO plays no role in the construction procurement process other than attendance at these meetings.

### **C3111 Safety**

The Applicant has appointed the Service Provider as its agent for purposes of overseeing compliance with occupational health and safety (OSH) requirements throughout all phases of the project. The EAP is no less exempt from compliance with requirements imposed by the Service Provider than any Service Provider's employee or contractor's (including his subcontractors') employees.

### **C3112 Insurance**

The EAP shall carry insurance to the value and type listed in the Contract Data: Information provided by the Service Provider (refer part C 1.2.2). These insurances shall be kept in place for the duration of this contract and proof of currency shall be attached to each interim payment submitted to the Service Provider for payment.

### **C3113 Payment**

The EAP shall, when submitting certificates for payment, use the Service Provider's standard forms and formats including registering onto the Service Provider's electronic recording and payment system.

#### a) Retention monies

Retention monies deductions shall be deducted by the Service Provider. Deductions shall be applied at 10% of the value of completed services up to a maximum of R30 000.00 (excluding VAT). Such retention monies shall be released by the Service Provider as follows:

- 80% upon receipt of acknowledgement of receipt of the final report from the Competent Authority; and.
- 20% on receipt of the Competent Authority's final decision, which shall not be later than two months after Interested and Affected Parties have been informed of the final decision.

#### b) Contract price adjustment

Contract price adjustment shall apply to some payment items (refer to pricing instructions in clause C2.1.6 of the Pricing Data). Base date shall be the date 28 days prior to the latest date for submission of tenders. Base date for this contract is given in the Contract Data: Information provided by the Service Provider (refer part C1.2.2 of this contract).

## **C3200 SERVICES REQUIRED IN PROJECT DESIGN PHASE**

### **C3201 Scope**

This section covers the services the EAP must provide during the design phase of the project. The culmination of this phase of the project for the EAP is the submission of an application to the relevant competent authorities for environmental approvals to implement the design; and to receive final decisions.

Where regulations of various acts are referred to, the EAP shall ensure that the latest promulgated editions are applied to the project, regardless that reference in these specifications may allude to older versions.

### **C3202 Administration**

The EAP shall only send copies for public review and/or to authorities after receiving the Service Provider and Applicant's input.

After submitting the draft reports to the various authorities, the EAP shall follow up with them that they have been received and that written responses are received from them all.

In the event of any appeal the EAP shall remain involved as provided for in the Pricing Schedule).

### **Public Participation**

Attendance at all public participation meetings shall be the EAP key person. This duty shall not be delegated to another but may be enhanced by including others of the EAP's staff or involved specialists.

Records of meetings shall be minuted, produced and distributed to all attendees by the EAP, but not before the Service Provider has received and reviewed a draft version.

### **Assessment programme**

The EAP's programme shall indicate the time allowed for identified competent authorities in his programme by creating separate line items for submission of reports (BAR, scoping or EIR as appropriate to the application type) and receipt of comments on, or acceptance of, those reports. The programmed time between these line items shall not be less than the statutory limits for responses.

### **Environmental Management Programme (EMPr)**

The EAP shall include with each report a proposed EMPr. The EAP shall study the Applicant's standard EMP and use it as a base EMPr for inclusion in the reports. Unless this project is so uniquely different from the Applicant's standard projects no new EMP will be accepted. However, the EAP shall make project-specific recommendations to the standard EMP.

The final section of the standard EMP makes allowance for project specific application and this shall become the focal point where each aspect of the project EMP is developed and recorded, by cross reference to the relevant item in the standard EMP and any specific change or addition.

### Specialist studies

The EAP shall propose applicable specialist studies to the Service Provider but may not tender for the specialist studies. i.e. the specialists shall be independent of the EAP.

## **C3300 SERVICES REQUIRED IN PROJECT CONSTRUCTION PHASE**

### **C3301 Scope**

This section covers the duties of the EAP during the construction phase of the project. The commencement date of constructions is as shown in C3106: Project programme and is defined as the day on which the Applicant conducts a hand-over meeting with the construction contractor procured by the Service Provider under the Applicant's policies and procedures.

### **C3302 Role of the ECO**

The ECO/ key person nominated (and accepted, thus a contractual entity under this contract) is the Environmental Control Officer (ECO) for the purposes of supervision and monitoring of the project contract.

#### a) Construction hand-over and monthly site meetings

The ECO shall attend the hand-over meeting between the Applicant, the Service Provider and the construction contractor. The date of the hand-over meeting shall be the commencement of the ECO's duties. The ECO shall liaise with the Service Provider and coordinate his programme so that audit dates align with the planned site meetings wherein the ECO shall present his report.

#### b) Liaison with the construction contractor

The ECO shall liaise closely with the construction contractor's designated environmental officer (DEO) to ensure that the construction contractor adheres to the letter of the EMPr and relevant environmental permits. The ECO shall assist the DEO putting in place comprehensive induction and compliance programmes.

The ECO is to assist the construction contractor with the compilation of his carbon footprint throughout the duration of construction. Each construction activity shall be separately recorded and accumulated. A monthly record of carbon expenditure shall be kept and shall appear as a separate part of each monthly report. The ECO shall guide, mentor and assist the DEO in the production of the site record for carbon expenditure. There is no defined calculation or reporting format meaning that the ECO shall, in close cooperation with the Service Provider, develop a reliable system. The ECO shall confirm the accuracy of the DEO's work.

c) Site audits

Notwithstanding that the official record of environmental approval for the project may prescribe a different auditing schedule, the ECO shall visit the construction site once a month and conduct a comprehensive environmental audit. All authorisations for this project shall be used as the basis for the audits (Environmental Authorisation, General Authorisation, EMPr and any others). The audit criteria shall be submitted to the Service Provider for comment and approval before being implemented and any changes to it during the contract shall be similarly treated. A report of each audit shall be compiled and submitted to the Service Provider.

The Service Provider may instruct, dependent on the environmental approvals received from authorities and the quality and consistency of compliance by the construction contractor, that less frequent audits are conducted by the ECO. The Service Provider will provide the ECO with at least one month's notice of any change.

d) Closure of material sources

During clean-up the ECO shall liaise with the relevant authorities to arrange a visit to inspect those borrowpits/quarries that have been rehabilitated. These visits may occur at any time earlier in the contract as the construction contractor completes each material source. The purpose of these preliminary completion inspections is to get approval of the overall shaping and final condition relative to side slopes and even retention of water with the ultimate aim of obtaining closure. Visits to the site for purposes of engaging competent authority about preliminary closure (i.e. to seek comment and approval on the shaping of the rehabilitation work only, and not for purposes of acquiring the closure certificate) of the material sources exploited shall also be measured here. However, any visits scheduled for a date later than the construction contractor's departure from the site shall not be recoverable under this sub-payment item.

**C3303 Measurement and payment**

Item		Unit
<b>33.01</b>	<b>Environmental monitoring</b>	
(a)	Environmental Awareness Training (once-off), including audit criteria	LS
(b)	Monthly Audits by ECO	No.

The unit of measurement for sub-payment item (a) shall be a lump sum each. The sum offered shall be full compensation for the cost incurred to assist the construction contractor with setting up an induction procedure (including giving a presentation to the construction contractor's staff at construction commencement) and setting up a viable and repeatable system to measure the contractor's (and thus the project's) Resource Efficiency and other environmental initiatives. The monthly monitoring of each of these processes shall be included under the rate for sub-payment (b).

The unit of measurement of sub-payment (b) shall be a number (No.). The rate offered shall fully compensate for the cost of time, travel (including accommodation and meals), materials, printing, communicating and all other things required to conduct the specified audits and inspections and to produce and distribute the reports. The rate shall also cover all costs necessary to liaise with the relevant competent authority to secure any amendment to the relevant EMPr provided that such amendments do not require assessments different to those needed during the design phase of the project.

**C3400 OTHER SERVICES REQUIRED**

**C3401 Scope**

This section covers duties of the Environmental Control Officer (ECO) during and after completion of the construction phase of the project. The completion date of construction for the purposes of this contract is the effective date of the taking-over certificate that the Service Provider issues to the construction Contractor.

**C3402 Duties of ECO**

The ECO shall produce a final report on construction monitoring. No final environmental audit report shall be sent by the ECO to any of the competent authorities until the drafts of such reports have been submitted to the Service Provider for comment and discussion.

**C3403 Measurement and payment**

Item		Unit
<b>34.01</b>	<b>Closure of material sources</b>	
(a)	Borrow pits and/or quarries	No.

The units of measurement under this payment section shall be a number (No.) The rates offered for sub-payment items (a) shall be in full compensation for the costs of time, travel, communication, consultation, personnel, material, printing, and all other processes necessary to obtain from the Competent Authority closure certificates for each material source for which permits and/or operating authorisation had been approved.

The rate shall also cover all costs necessary to liaise with the relevant competent authority to secure closure of the material sources, including any amendment to the relevant authorisations.

#### C4.1 LOCATION OF THE PROJECT

The section of the R69 under consideration is located on National Route R69, Section 5 from the N2 (km 0.0) to Golela Border Post (km 9.75). The project limits are indicated on the locality map. This project is in the province of KwaZulu-Natal and in the Zululand District Municipality and the Local Municipalities of uPhongolo. The R69 is a national route which forms part of SANRAL's primary road network which provides access to Eswatini from the N2.

#### C4.2 PROJECT INFORMATION

In general, the project includes the pavement repairs and stone seal / asphalt overlay for the first 4km of road and the Improvement by possibly upgrading the cross section to 2+1 lanes or 4 lane divided carriageway over the last 5.7km of road approaching the border. In addition, the scope includes the provision of street lighting and stacking/parking lanes at the border, upgrading of roadside furniture and widening and upgrading of bridges and culverts.

The various project alternatives currently being investigated includes the following work:

- Adding additional paved shoulder (3m)
- Adding climbing lanes where required (3.6m lane and 1m shoulder).
- Improving of the both the horizontal and vertical alignment for a design speed of 60 and 80km/h.
- Bridges, major culverts as well as minor culverts will be widened / lengthened to meet the new cross sections.
- At the border post a truck staging area is proposed outside of the SANRAL road reserve to provide parking, ablution, eating and resting facilities. This is still to be confirmed with the various stakeholders at the border post as well as SANRAL.
- The pavement will also be strengthened to carry the projected E80's over the design period.
- The route traverses through Pongola Game Reserve between km 4.7 and km 8.7.

#### C4.3 TRAFFIC INFORMATION

The R69 is a major arterial route that connects South Africa with Eswatini. The route has a significant number of heavy vehicles, which is approximately 30% of all vehicles travelling the route. A summary of the traffic is provided in the table below.

**TABLE 4.1**

<b>DESCRIPTION</b>	<b>CURRENT</b>	<b>ENVISAGED</b>
Current traffic	AADT (2025): 1053 AADTT (2025): 306	AADT (2061): 1507 AADTT (2061): 531

#### C4.4 CONSTRUCTION MATERIALS REQUIRED

There are no existing commercial quarries in the immediate vicinity of the R69 route. Two of the closest available quarries are shown in an image in Annexure B. These quarries are the Afrimat quarry in Hluhluwe, which is approximately 80km from the route, and the Afrimat quarry in Vryheid which is approximately 160km away. Exact quantities and materials that are required for the project is still to be determined, based on the selected geometric and cross-section options currently being considered at this stage of the project. An allowance has been made in the pricing schedule for the investigation of one Quarries and / or Borrow Pits should it be found during the preliminary design and/or detail design phase that this will be required.

Information on the proposed quarry or borrow pit will then be shared with the sub-service provider. If this is not required, then the sub-service provider will not be entitled to claim under this item.

At this stage it is envisaged that only gravel materials be obtained from either a quarry or a borrow pit while asphalt and any concrete aggregate be obtained from a commercial source directly or having the supplier of the concrete or asphalt establishing a batch plant.

**TABLE 4.2**

<b>DESCRIPTION</b>	<b>CURRENT</b>	<b>ENVISAGED</b>
Asphalt aggregate	Commercial	Commercial / On-site batch plant
Concrete aggregate	Commercial	Commercial / On-site batch plant
Gravel materials	Commercial and or borrow pits	Commercial or 1 investigations dependant on quantities required.

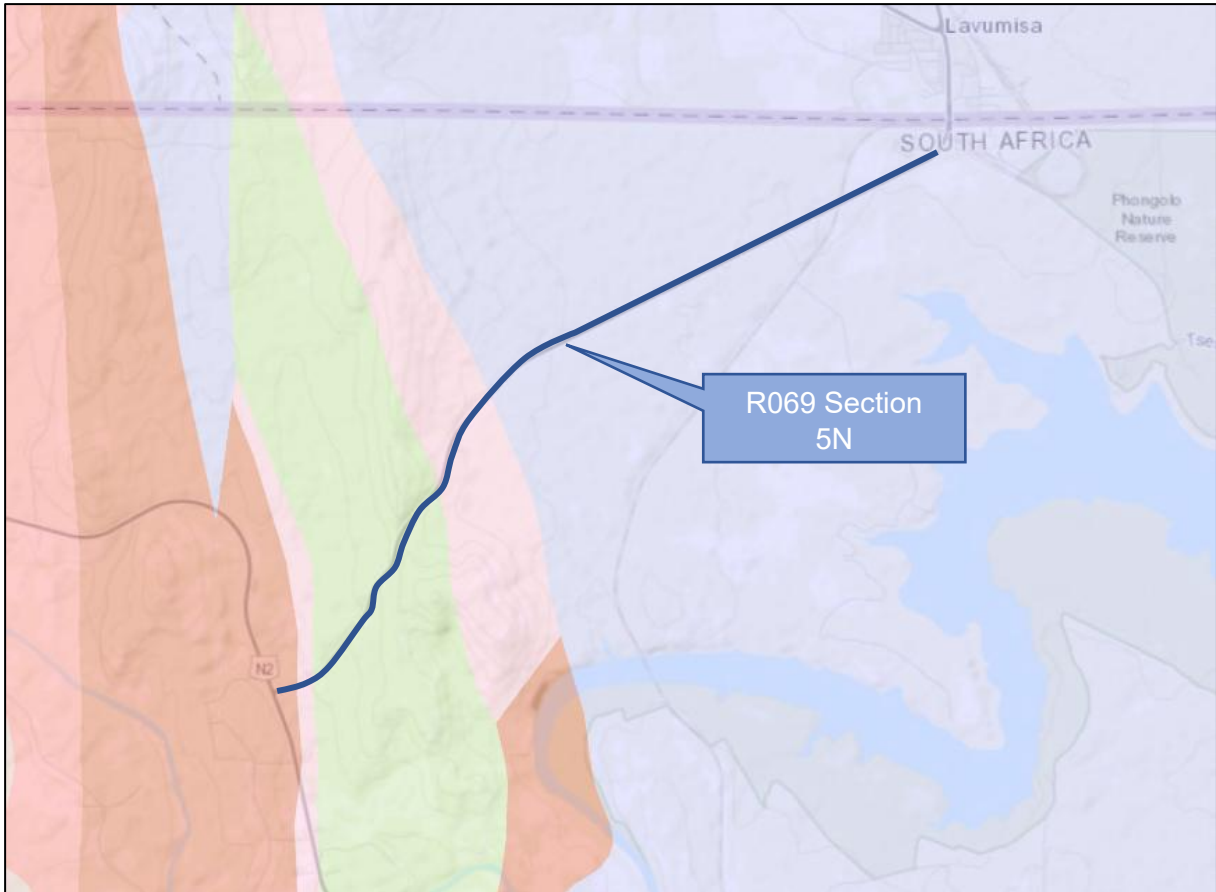

#### **C4.5 GEOTECHNICAL**

There is no known geotechnical problem areas identified on this section of the route. A detailed geotechnical investigation will be undertaken during the preliminary design stage for the Bridges and major culverts as well as any deep cuts. This however will depend on the geometric option that is approved.

Regionally the area includes thin sections of the Elliot formation, Emakwezini formation and Clarens formation. A large section of the region is dominated by the Letaba Subgroup. More detailed descriptions of each formation

- Pvo: (Volkrust) Dark grey shale Emakwezini formation: Mudrock, sandstone, minor coal seams.
- Clarens formation: Massive white to cream, fine-grained sandstone and reddish argillaceous sandstone with minor siltstone.
- Letaba subgroup: Mafic volcanic rocks (tholeiites, picrite basalts and nephelinites)
- Elliot formation: Red and greenish grey mudstone.

The geotechnical map is presented in the figure below:

**C4.6 LAND REQUIREMENTS**

The existing road reserve varies between 25m and 50m and based on the various project alternatives, additional land will be required for the road reserve. According to the SANRAL typical cross sections, a single carriageway with climbing/passing lanes requires a road reserve of 50m in rural areas and 30m in urban areas.

The land acquisition process will involve properties located within these areas, necessitating the relocation of affected structures and residents. The process will be conducted in accordance with SANRAL's land acquisition framework, ensuring that all affected parties are engaged through a transparent consultation process.

As the route passes through environmentally sensitive areas, any additional land required for the road reserve will be minimised to prevent potential impacts on these areas. The road reserve generally consists of the existing road, cut and fill batters, drains for cut conditions and in some cases additional land reserved for further improvements and upgrades.

**C4.7 WORKING AGREEMENTS**

There are no working level agreements between the Applicant and other state departments which are applicable for this project.

#### C4.8 DRAINAGE

There is a total of 53 lesser culverts of which 22 are Armco pipe culverts. There are 9 lesser culverts with insufficient hydraulic capacity which will have to be upgraded in addition to the replacement of the Armco pipe culverts

There are 6 major culverts, 2 cellular bridges and 1 railway bridge on this project route, of which 8 structures serve as drainage structures.

All the major structures have sufficient hydraulic capacity The bridges and culverts will be widened according to the final approved cross section.

All the existing bridges and major culverts have been assessed and recommendations made for the proposed widening, depending on the project option that is selected

**TABLE 4.3**

<b>DESCRIPTION</b>	<b>CURRENT</b>	<b>ENVISAGED</b>
Side drains & kerb and channels	Existing	New level and increased capacity depending on improvement design.
Meadow drains	Existing	To be reshaped were possible and the possible lining of the inverts where required.
Sub-surface drains	Unknown	If existing, then sub-surface drainage will be tested and replaced if needed. New sub-surface drainage will be installed under all drains.
Pipe culverts	Existing	To be lengthened to accommodate new cross section and if inadequate capacity be replaced. All Armco pipes to be replaced.

#### C4.9 CONTRACTOR'S ESTABLISHMENT

The surrounding areas along this route provide plenty of possible locations for the contractors site establishment, however, it is believed that the mountainous terrain from km 0.0 to km 4.5 would not serve the contractor well. Additionally, it must be noted that the route enters the Phongola Nature reserve around km 4.725 which is populated with wildlife including elephants. It is thus believed that the best location for the contractor's site would be close to the Golela border post.

#### C4.10 COMMUNITY

The road section stretches mostly through farms. The first section up to km 2.0 there are sugar cane farming while the remainder up to km 8 is mostly running through game farms. The section between km 8 and km 9.5 is more developed in rural residential area. The last 500m section of road is more densely populated with smaller shops and a school at the border post serving the local.

The rural areas encompassing the R69 Section 5 are characterized by sparse local enterprises and small communities enveloping the Golela border. Among the potential tourist attractions susceptible to impact are the tiger fishing lodges and the entrances to the Phongolo Game Reserve, both accessible directly from the R69 Section 5.

The Employer will still confirm if provision should be made in the main contract for a sub-project for Community Development. The CDP is yet to be identified and endorsed by SANRAL and the community surround this project.

Communication with residents and businesses will be prioritized through direct engagement, local media, and community meetings to ensure transparency and cooperation throughout the project.

**C4.11 RRM**

The RRM information will be provided to the appointed service provider.
