PART C2 PRICING DATA

C2.1 PRICING INSTRUCTIONS

C2.1: PRICING INSTRUCTIONS

1 The Tender Data, the Contract Data, the Scope of Work, the Site Information and the Drawings shall be read in conjunction with the Schedule of Quantities.

2 The Schedule comprises items covering the Contractor's profit and costs of general liabilities and of the construction of Temporary and Permanent Works.

Although the Tenderer is at liberty to insert a rate of his own choosing for each item in the Schedule, he should note the fact that the Contractor is entitled, under various circumstances, to payment for additional work carried out and that the Employer's Agent is obliged to base his assessment of the rates to be paid for such additional work on the rates the Contractor inserted in the Schedule.

The measurement and payment clauses of each Specification, read together with the relevant clauses of the Specification Data, all set out which ancillary or associated activities are included in the rates for the specified operations.

3 Descriptions in the Schedule of Quantities are abbreviated and may differ from those in the Standardized and Specification Data. No consideration will be given to any claim by the Contractor submitted on such a basis. The Schedule has been drawn up generally in accordance with the latest issue of Civil Engineering Quantities¹. Should any requirement of the measurement and payment clause of the appropriate Standardized or Specification Data be contrary to the terms of the Schedule or, when relevant, to the Civil Engineering Quantities, the requirement of the appropriate Standardized Specification or Specification Data as the case may be, shall prevail.

4 Unless stated to the contrary, items are measured and paid for net, in accordance with the Drawings, without any allowance having been made for waste.

5 The amounts and rates to be inserted in the Schedule of Quantities shall be the full inclusive amounts to the Employer for the work described under the several items. Such amounts shall cover all the costs and expenses that may be required in and for the construction of the work described, and shall cover the costs of all general risks, profits, taxes (but excluding value-added tax), liabilities and obligations set forth or implied in the documents on which the Tender is based.

6 An amount or rate shall be entered against each item in the Schedule of Quantities, whether or not quantities are stated. An item against which no amount or rate is entered will be considered to be covered by the other amounts or rates in the Schedule.

The Tenderer shall also fill in a rate against the items where the words "rate only" appears in the amount column. Although no work is foreseen under these items and no quantities are consequently given in the quantity column, the tender rates shall apply should work under these items actually be required.

Should the Tenderer group a number of items together and tender one sum for such group of items, the single tender sum shall apply to that group of items pro rata and not to each individual item, or should he indicate against any item that full compensation for such item has been included in another item, the rate for the item included in another item shall be deemed to be nil.

The tender rates, prices and sums shall, subject only to the provisions of the General Conditions of Contract, remain valid irrespective of any change in the quantities during the execution of the Contract.

7 The quantities of work as measured and accepted and certified for payment in accordance with the General Conditions of Contract, and not the quantities stated in the Schedule of Quantities, will be used to determine payments to the Contractor. The validity of the Contract shall in no way be affected by any differences between the quantities in the Schedule of Quantities and the quantities certified for payment.

The ordering of materials shall not be based on the quantities in the Schedule of Quantities. Materials ordered from the Schedule of Quantities without prior confirmation by the Employer's Agent shall be at the risk of the Contractor. No compensation shall be paid for materials ordered erroneously and all costs shall be borne by the Contractor.

¹ The standard system of measurement of civil engineering quantities published by the South African Institution of Civil Engineers.

- 8 The quantities of work as measured and accepted and certified for payment in accordance with the General Conditions of Contract, and not the quantities stated in the Schedule of Quantities, will be used to determine payments to the Contractor. The validity of the Contract shall in no way be affected by any differences between the quantities in the Schedule of Quantities and the quantities certified for payment.

The ordering of materials shall not be based on the quantities in the Schedule of Quantities. Materials ordered from the Schedule of Quantities without prior confirmation by the Employer's Agent shall be at the risk of the Contractor. No compensation shall be paid for materials ordered erroneously and all costs shall be borne by the Contractor.

- 9 Measurement and payment shall be in accordance with the relevant provisions of Chapter 1, Section C1.1 of the COTO Standard Specification for Road and Bridge Works for South African Road Authorities (Draft Standard October 2020 edition) or as amended in the Scope of Works.

- 10 For the purposes of this Schedule of Quantities, the following words shall have the meanings hereby assigned to them:

Unit : The unit of measurement for each item of work as defined in the COTO Standard Specification for Road and Bridge Works for South African Road Authorities (Draft Standard October 2020 edition) or the Specification Data.

Quantity : The number of units of work for each item

Rate : The payment per unit of work at which the Tenderer tenders to do the work

Amount : The quantity of an item multiplied by the tender rate of the (same) item

Sum : An amount tender for an item, the extent of which is described in the Schedule of Quantities, the Specifications or elsewhere, but of which the quantity of work is not measured in units

- 11 Contractor Skills Development Goals (CSDG)

The Contractor shall determine the Contract Skills Development Goal (CSDG), expressed in Rands, which shall not be less than the tender sub-total multiplied by a CSDG (%) given in Table 2 of the Standard for the applicable class of construction works. T

Table 1: Construction skills development goals for different classes of engineering and construction works contracts.

Final Tender Summary Section

The contractor's attention is brought to the following: The Employer shall include a line item under the final tender summary section. (Described as "Minimum Contract Skills Development Goal (CSDG)" as illustrated in the Table 1.1 below:

To prevent a tender being non-responsive, the Contractor shall take note of the required CSDG percentage (%) as prescribed in the final tender summary section. The percentage (%) factor multiplied by the sub-total of the tender amount will determine the minimum CSDG that needs to be achieved on the contract.

Table 1.1 Final Tender Summary section– Contract Skills Development Goal Example

Item	Description	Percentage (%) factor	Sub-Total of Tender Amount	Amount (Rands)
16	Skills Development			
16.1	Minimum Contract Skills Development Goal (CSDG) Sum = CE (0.25%) x Subtotal of the tender amount	0.25	R60 000 000	R150 000

C3.1: DESCRIPTION of WORKS**C3.1 DESCRIPTION OF THE WORKS****EMPLOYER'S OBJECTIVES**

The employer's objectives are to deliver public infrastructure using labour-intensive methods with the aim of services delivery, job creation and poverty alleviation. The work entails CONSTRUCTION OF SHIKISHA ROAD WITH VEHICULAR BRIDGE WARD 33 from gravel/double seal surface to a formal paved road. As part of the construction of the new road, job creation will occur through the employment of local labourers, and/or local subcontractors.

The Employer desires that the work required be of a high standard and be completed in the shortest practical time whilst creating jobs for local labourers and contractors.

N.B. All labour rates should be as per current SAFCEC rates.

EPWP REQUIREMENT**1. Expanded Public Works Programme (EPWP)**

The service provider must provide the Municipality with a completed list of local labourers for EPWP registration, monthly reports on this to be submitted to the project manager. The aforesaid list must be updated and submitted monthly, inclusive of the following details:

- i. Salary / wages spent on local employees versus total wages / salary budget at site
- ii. Number of local employees employed versus per total workforce at site
- iii. Payments made to the local labourers

2. Demographics

Members of the community who are unemployed and who form part of the targeted groups not less than 60% women, not less than 55% (youth from 18 - 35 years of age) and not less than 2% people with disabilities should be given an opportunity to apply for work.

CONSTRAINTS**Restricted Site Access**

Access to portions of the site may be restricted due to existing infrastructure, adjacent properties, environmental sensitivities, utility services, or operational requirements. The Contractor shall allow for phased construction and restricted access conditions in the tendered rates.

Existing Services

Numerous underground and overhead services may be present within the construction area. The exact location of all services is not guaranteed and the Contractor shall verify service positions before commencing excavation.

Working Around Existing Traffic

The works will be undertaken adjacent to live traffic. The Contractor shall maintain safe traffic movement and shall make provision for temporary traffic accommodation, signage, flag personnel and pedestrian management.

Operational Facilities

The facility shall remain operational throughout the contract period. The Contractor shall minimise disruption and maintain safe access at all times.

Community Sensitivities

The project is located within a populated community area. Provision shall be made for stakeholder

engagement and local labour management.

Security Risks

The Employer does not guarantee the security of materials, plant or personnel on site. The Contractor shall provide site security.

Limited Working Space

Storage areas, stockpiles, plant movement and contractor facilities may be limited.

Weather Constraints

Tenderers are advised that the project area experiences seasonal rainfall which may affect construction operations. The Contractor shall make reasonable allowance for normal weather conditions expected during the construction period.

Geotechnical Constraints

Preliminary geotechnical investigations indicate variable subsurface conditions. Tenderers shall note that excavation conditions may differ from those anticipated and shall inspect available geotechnical information prior to tendering.

Environmental Constraints

Construction activities shall comply with all environmental authorisations and EMP requirements.

Seasonal Watercourses

Water levels may fluctuate significantly following rainfall events. Provision shall be made for temporary works and protection of partially completed works.

Utility Relocations

Certain existing services may require relocation by utility owners. Delays associated with third-party service providers may occur and shall be considered during programme development.

Existing Structures

Existing structures may be fragile, deteriorated or undocumented. Care shall be exercised when working adjacent to them.

Access Through Private Property

Access to portions of the site may require coordination with adjacent property owners. The Contractor shall restrict operations to approved servitudes and construction areas.

School Environment

Particular attention shall be given to learner safety, temporary walkways, barricading and signage.

High Groundwater

Groundwater seepage may be encountered during excavation works. Tenderers shall satisfy themselves regarding groundwater conditions and make provision in their rates where necessary.

Community Business Forums

The Employer does not guarantee uninterrupted access to the site arising from unlawful community disruptions, business forum activities, intimidation, extortion or similar events. Tenderers shall familiarise themselves with local conditions and make reasonable provision for stakeholder engagement.

Material Haulage Constraints

Haul routes pass through residential areas and may be subject to municipal restrictions, speed limitations and road condition constraints.

Working Hours Restrictions

Construction activities may be restricted to approved working hours.

Tenderer's Duty to Inspect

Tenderers shall be deemed to have inspected the site, examined all available information, assessed local conditions and satisfied themselves regarding all matters that may influence the execution of the Works, the Contract Price and the Contract Period.

C3.1.2 OVERVIEW OF THE WORKS

The Contract entails the CONSTRUCTION OF SHIKISHA ROAD WITH VEHICULAR BRIDGE WARD 33 from double seal surface to a formal paved road. The road under consideration is approximately 1.4 km in length and provide access to residential houses located alongside the road. There are no formal cadastral boundaries for most of this area. The road currently meanders in between existing fences and boundary walls.

No formal cross section exists with roadway width varying between 4,0 m to 8,0m. The existing road reserve varies in width of approximately 8 m to 20 m for sections of the proposed route. The road reserve is well defined within the existing boundary fences. The road provides direct access to individual properties. The existing stormwater drainage will be upgraded with a completely new system consisting of pipe culverts and open concrete and earth lined drains in combination with mountable kerbs and edge beams.

Through traffic will be diverted onto adjacent roads. Local traffic will need to be accommodated within the road reserve providing access to local properties adjacent to the road.

The proposed new road will as far as possible follow the same horizontal alignment of the existing road, although improvements will be made to the road alignment (particularly the vertical alignment).

C3.1.3 EXTENT OF WORKS

The Works to be carried out by the Contractor under this Contract comprise mainly the following:

DESCRIPTION OF THE SITE AND ACCESS

PS.2.1 Location of Site

The site is situated in the Shikisha Township in Kabokweni. The proposed access road starts through a turn off from the existing main surfaced major road in Mbombela (municipality) the Kabokweni Road (at Laduma Hardware) that links Kabokweni (and various other villages) with White River and Mbombela. The road is a by-pass road which travels through the central parts of Shikisha from Laduma Hardware towards Mbombela Bricks and most parts of the village. It then connects to other existing access roads through a T-junction adjacent to the Mbombela Bricks Precinct. The site currently has a double seal surfaced road that is dilapidated.

PS.2.2 Access to Site

Access to site is per normal vehicle.

PS.2.3 Nature of the Ground and Subsoil Conditions

A multi-disciplinary geotechnical centerline and materials investigation was conducted for the CONSTRUCTION OF SHIKISHA ROAD WITH VEHICULAR BRIDGE WARD 33. The investigation was undertaken in order to assess the engineering geological character of the area, focusing on the geotechnical properties which will affect the construction of the proposed new road.

The findings of this investigation are elucidated in their report, the summary of which is available from the Employer's Agent at request. All of the relevant material testing data is included in the report.

PS.2.4 Construction in Confined Areas

It will be necessary for the Contractor to work in confined areas. No additional payment will be made for work in "restricted areas", except in the case of structures as described in Sub clause 6108(d) of the Standard Specifications. In certain areas the width of the fill material and pavement layers may reduce to zero and the working space may be confined. The method of construction in these confined areas depends on the Contractor's Constructional Plant. However, the Contractor must note that measurement and payment will be in accordance with the specified cross-sections and dimensions, irrespective of the methods used to achieve these cross-sections and dimensions, and that the rates and amounts tendered will be deemed to include full compensation for any special equipment or construction methods or for any difficulty encountered in working in confined areas and narrow widths, and at or around obstructions, and that no extra payment will be made nor will any claim for payment be considered on account of these difficulties.

PS.3 CONSTRUCTION AND MANAGEMENT REQUIREMENTS**PS.3.1 General**

The Contractor is referred to the relevant provisions of the COLTO Standard Specification for Road and Bridge Works for State Authorities (1998 edition). PS.3.2 Contractor Camp Site

The contractor shall make his own arrangements regarding the establishment of a camp site and housing for his construction personnel and all regulations stipulated by the local authority

shall be adhered to.

It is anticipated that the contractor's choice of a camp site will be influenced by the availability of telephone and electrical connections as well as the supply of potable water.

This contract is to be executed in an area surrounded rural settlements and as such safety will be paramount. Furthermore, all due courtesy must be exercised in so far as local resources are concerned (labour and materials).

The Engineer will facilitate all communication with the target community.

(a) Water and Electricity

The Contractor is to make his own arrangements in this regard and should note that the Employer shall not be held responsible for any shortages of either water or power due to unforeseen circumstances.

All water required for construction purposes is to be sourced by the Contractor and is to be allowed for in his rates.

(b) Location of Site Office

Suitable sites at each location will be identified once work commences. The contractor will need to make all necessary allowances for his own security, fencing etc.
