48.24.1.3 Water Allocation Formula

48.24.1.4 It is agreed between SANParks and the concessions that an allocation will be calculated using set bed numbers (guests and staff) and not with

variable amounts. Variable amounts used for the allocation can only be calculated in retrospect at the end of each month and therefore makes rectification overdue. The approach is to use the set and agreed bed numbers for each lodge and have a set water allocation for each concession. This makes for improved and monitoring and rectification.

48.24.1.5 Example of a water allocation for a 30-bed lodge with 60 permanent staff and 25-day staff for a 30-day month:

48.24.1.6 Guests: 350 l x 30 guests x 30 days = 315 000 l

48.24.1.7 Permanent Staff: 270 l x 60 staff x 30 days = 486 000 l

48.24.1.8 Day Staff: 40 l x 25 staff x 30 days = 30 000 l

48.24.1.9 Total Water Allocation = 831 000 l / month.

48.24.1.10 The South African National Standard (SANS) 241 Drinking Water Specification states the minimum requirements for potable water to be considered safe for human consumption. The below tables outline these requirements. Requirements include microbiological, physical, aesthetic and chemical properties. These should be tested every 6 months or when non-conformance is suspected. Records of all tests should be kept on site.

- 48.25.6 If the system is not working correctly, there is strong possibility that the sewerage levels in effluent water will be above recommended standards. The effluent water is currently discharging to holding tanks (irrigation) or direct into the veld and with high levels of sewerage could potentially be health and environmental risks and would trigger an EIA failure.
- 48.26 **Sustainable Sites**
- 48.26.1 Flood Damage
- 48.26.1.1 The main lodge is situated on a confluence of two flowing water bodies / rivers which during heavy rainstorms causes flood damage to the outside deck supporting structures and erosion of underlying earth

embankments.

48.26.2 Construction Activities Pollution Prevention

48.26.2.1 Building construction best management practices were integrated into the EMP as Construction Activities Pollution Prevention and will be applied on site during construction.

48.26.2.2 SANParks waste management policy for the KNP is also included in for construction improvement processes in order to limit waste and pollution as a result of the construction works. This included the sorting of construction waste and diversion of waste to recycling.

48.26.3 Dust control during construction activities

48.26.3.1 As much as possible, trees on the site are to be protected during construction.

48.26.4 Storm Water Quantity & Quality

48.28.3 Energy Performance

48.28.3.1 Compliance and monitoring of the energy, thermal comfort and daylight model that has been developed for the project in the output specification; use model for value engineering and have influenced the selection of glazing, roofing finishes, Air-conditioning Plant, Hot Water Plant & Kitchen Equipment.

48.28.4 ECO Audits

48.28.4.1 The Private Party will be required to perform quarterly audits by an appointed independent Environmental Control Officer (ECO). The ECO must evaluate compliance against the environmental authorisation or any other relevant conservation aspects of managing the Lodge – a checklist of areas to be audited is to be compiled. In addition, a staff member must be allocated to monitor environmental compliance / health & safety requirements on a day-to-day basis.

48.28.5 Hygiene Audits

51.4 **Private Party PPP Fee Offer**

52. **SCHEDULE 7 – ENVIRONMENTAL SPECIFICATIONS FOR THE OPERATION OF CONCESSION AREA WITHIN THE PROTECTED AREAS**

52.1 **Introduction**

52.1.1 This is an undertaking by the Private Party to conduct, manage and carry out the Project at all times in an Environmentally responsible way by adopting appropriate operating methods and practices for conducting such a Project in a proclaimed National Park.

52.1.2 The Private Party undertakes to take all reasonable steps in conducting of the Project to prevent and limit the occurrence of any Environmental or health hazards and to ensure the health and safety of the Private Parties and the general public.

52.2 **Legislative Basis for these Guidelines**

52.2.1 SANParks is bound by a number of statutes with relevance to environmental management of Parks, including (without limitation) the National Environmental Management: Protected Areas Act, 2003 (Act No. 57 of 2003) (NEMPAA); the National Water Act 36 of 1998; the Water Services Act, 108 of 1997; the National Environmental Management Act, 107 of 1998 (NEMA); the National Environmental Management: Air Quality Act; the Hazardous Substances Act, 15 of 1973; and the National Heritage Resources Act.

52.2.2 Authorization of any development in a Protected Area is governed by the NEMA and the NEMPAA, and regulations. Any changes to infrastructure or operations require written approval from SANParks and are subject to the prescribed policies and procedures.

52.2.3 The process for upgrading or refurbishment of Concession Area will be undertaken as per SANParks internal policies and procedures, and authorizations given by the Department of Environmental Affairs and

Tourism where relevant and SANParks.

- 52.2.4 The EIA laws and Regulations do not specifically require an EIA for a development such as the refurbishment and/or expansion of the Concession Area. However, given that the development is taking place within a protected area such as a National Park, SANParks requires environmental scoping to be conducted on any proposal to expand or modify the existing Concession Area or shop that is being bid for. Modifications include both structural changes to the facility and additions to the facility or its environs, including signage. The scoping report must be submitted to DEA, the "relevant environmental authority" as defined in the EIA Guideline documents. **[Drafting Note: In the case of the SANParks, the 'relevant environmental authority' for review of EIAs conducted in National Parks is the national Department of Environmental Affairs and Tourism.]**
- 52.2.5 Private Party proposing significant expansions or structural modifications should anticipate that an EIA will be required, and should factor the cost of carrying out the EIA into their financial PPP opportunity.
- 52.2.6 SANParks will have a role in the EIA process, both as an Interested and Affected Party (IAP), and as the regulatory authority with jurisdiction over the Protected Area. It will be DEA's responsibility to determine whether, on the basis of information provided in the scoping report, a detailed EIA needs to be carried out.
- 52.2.7 In addition to the environmental laws the Private Party will also be bound by any laws pertaining to operation on a railway line as determined by the Rail Safety Regulator.

52.3 **Guidelines Based on SANParks Internal Requirements**

- 52.3.1 The EIA Regulations cover many of the issues that will arise during the assessment of developments within National Parks. In addition,

SANParks undertook a review of its internal policies that may impact on such developments.

52.3.2 As a result, some of the Guidelines contained herein flow from internal SANParks management documents, such as the Kruger National Park Management Plan. In some instances, however, these documents were neither sufficiently comprehensive nor sufficiently detailed as to the allowable parameters for development by commercial operators. Where this occurred, SANParks undertook an internal effort to develop the necessary Guidelines.

52.3.3 A series of workshops were held with SANParks conservation staff, and specifically from KNP, who assisted in establishing standards to be applied to commercial tourism developments within the Parks. Draft standards were reviewed by a wide range of professionals within SANParks, including the Manager, Environmental Management, and Park rangers and staff from Scientific Services, Conservation Services, Park Planning and Technical Services. The Guidelines contained herein are the result of these efforts.

52.3.4 The Environmental Guidelines set out and referred to in this document must be regarded as a first step in SANParks' efforts to compile a comprehensive Environmental Management System (EMS) for the entire Parks. Once in place, the EMS will likely be modified and refined over time, as and when needed to take into account new information, standards and conditions. Private Parties must therefore be aware that the terms and conditions set forth in these Guidelines are subject to amendment. Private Parties will be expected to comply at all times with the provisions of the Environmental Guidelines as they may change from time to time.

52.3.5 The remainder of this document presents the specific standards or parameters that the Private Party will be expected to apply to activities in its Project Site.

52.4 **Precautionary Principle**

Ecological and natural resource processes are not always clearly understood, nor are the interactions among such processes. SANParks recognises that issues may arise suddenly, or circumstances change, due to limitations in current knowledge. SANParks has endeavoured to identify these limitations wherever possible, and to design the concession process in a way that minimises the environmental risk to the national assets under its control. However, situations may arise where changes which have not been anticipated may cause SANParks to require adaptations to the management of the area.

52.5 **Code of Conduct**

52.5.1 The Private Party undertakes to induct all staff employed on the Kruger National Parks Code of Conduct.

52.5.2 The Private Party confirms that the Code of Conduct is understood and will be complied with.

52.6 **Environmental Impact**

52.6.1 The Private Party undertakes to bring to the attention of SANParks any matter which may, in its view, have a detrimental impact on the Environment within the Restaurant and or Concession Area and the Protected Area.

52.6.2 The operator needs to subscribe to the South African Seafood Initiative (SASSI) and only sell/include fish on the menu with green status or SASSI certified.

- 52.7.2 The Private Party undertakes to:

- 52.9.1.2 The Private Party undertakes to manage liquid waste in accordance with national and local legislation requirements;
- 52.9.1.3 The Private Party undertakes to design management techniques to be both economically viable and environmentally sustainable;

- 52.9.1.6.2 that grease traps are cleaned when 25% of the liquid level of

the trap is grease or oil; and

52.9.1.6.3 That waste recovered from the grease traps be removed from the park and disposed of at an authorized facility.
