MEMO

Good day,

TENDER CLARIFICATION MEETING ADDENDA.

INVITATION TO TENDER No. E3112GXMPKUS

Replacement of CEMS at Kusile Power Station for 15 Months

Reference is made to enquiry number **E3112GXMPKUS** [Replacement of CEMS at Kusile Power Station for 15 Months]

This addendum serves to notify all prospective tenderers of developments arising from the clarification meeting held on **16 July 2026** via **Microsoft Teams**, attended by Eskom representatives and interested service providers. During the meeting, service providers requested an extension of the tender closing date. The request was made on the basis that further clarification of the project scope is required to enable accurate pricing and preparation of responsive tender submissions. A site clarification session has therefore been arranged as detailed below:

Site Clarification Meeting

- **Venue: Kusile Power Station**
- **Date: 21 July 2026**
- **Time: 11:00 AM**

Kindly send confirmation of attendance to NgwepePP@eskom.co.za with the list of representatives, their ID numbers, vehicle registration numbers and company name to arrange for gate access. Also, bring along your PPE (Safety wear).

In consideration of the above, and to allow sufficient time for bidders to incorporate information gathered during the site clarification session into their submissions, the tender closing date has been extended.

Revised Tender Closing Date

- **Previous Closing Date: 24 July 2026**
- **New Closing Date: 04 August 2026**

	MEMO CLARIFICATION ADDENDA	Unique Identifier	240-51017543
		Revision	Rev. 0
		Revision Date	Aug- 2019
		Group Technology and Commercial Division	

Furthermore, a review of the Bill of Quantities (BOQ) identified certain omissions in the original document. As a result, a revised version of the BOQ will be published during the week.

Drawings Queries

Questions and clarifications relating to project drawings will be addressed separately through a dedicated **Addendum/Memorandum**, which will be issued to all tenderers in due course. Tenderers are requested to acknowledge receipt of this addendum and ensure that the revised requirements and dates are incorporated into their tender submissions.
