3. Local to Site			30%		0.0%		0.0%		0.0%		
TOTAL			100%		0.0%		0.0%		0.0%		

The scoring of the Technical Evaluation is conducted as follows:
A supplier is given a score in each of the sub-categories. These sub-categories are requirements detailed in the specification or contract.
Scores are allocated as follows:

- 0 - 0% - Does not meet
- 1 - 75% - Partial meet
- 2 - 100% - Meet

The score is then summed to a weighted average per category. The category scores are analysed as follows:
0% - 79% - Does not meet
80% - 100% - Meet

The category scores are summed to a weighted average, and the average is subject to the criteria as detailed above, thus indicating which suppliers meet the technical requirements.

The following eliminating criteria apply and will result in the tenderer not meeting the requirements of the technical evaluation:
- The tenderer is subject to a capability assessment that will be scored and assessed. If the capability assessment is not passed the technical assessment will be scored as a not meet.
- If the tenderer can not show adequate evidence of experience related to the product/service detailed in the technical specification the technical assessment will be marked as a not meet.
- If there are significant difference, as judged by the Eskom technical team, between the product/service specified in the TRS and the product/service specified in the tender the technical assessment will be scored as a not meet.
