Environmental Statement of Commitment

Grootvlei Power Station's (GPS) top management is committed to continually implement and maintain an Environmental Management System (EMS) to ensure effective management of the environmental aspects of the station's activities, products and services. GPS's top management is committed to ensure protection of the environment through prevention of environmental pollution and degradation, to continually improve EMS in order to enhance environmental performance and to fulfil all applicable compliance obligations.

We commit ourselves to:

- Prevention of pollution.
- Protection of biodiversity and ecosystems.
- Responsible waste management and disposal practices.
- Addressing the needs and expectations of Eskom workers (including service providers), customers, interested and affected parties, and stakeholders.
- Maintaining a high awareness of environmental issues in our workplace.
- Managing, investigating and where possible, remedying all significant environmental aspects and impacts.
- Setting a framework of environmental objectives and targets.
- Sound water, air and land management.
- Implementing and maintaining a documentation system that conform to ISO 14001 environmental management system requirements.
- Continual improvement of our environmental management system.
- Communicating environmental issues to all persons working for, or on behalf of the power station, as well as making this statement available to the public and participating in local environmental and community forums.
- Complying with all applicable environmental legislation and other environmental requirements to which the organisation subscribes such Eskom policies, standards, directive, procedures, national, provincial and local regulations etc.
- Management shall provide employees with the resources needed for the implementation of EMS, including support, direction and encouragement to fulfil the requirements, appropriate with their role.
- Ensuring that Grootvlei service providers/ contractors maintain the same level of Environmental performance and requirements.
